# REPORT

OF THE

## STATE BOARD OF EDUCATION.

---

December, 1885.

*To the Honorable the Senate and General Assembly of the State of New Jersey:*

As directed by law, the State Board of Education has the honor to present for your information its annual report.

In the report of the State Superintendent of Public Instruction and the accompanying tables, herewith submitted, will be found full statistics respecting the public schools for the past school year.

At a meeting of this Board, held April 14th, 1885, the State Comptroller presented the apportionment of the State school tax among the counties for the year 1885, as follows: Atlantic, \$12,809.76; Bergen, \$39,575.60; Burlington, \$64,887.99; Camden, \$56,335.40; Cape May, \$8,838.47; Cumberland, \$31,838.51; Essex, \$297,397.27; Gloucester, \$36,793.48; Hudson, \$254,740.24; Hunterdon, \$53,639.48; Mercer, \$81,714.94; Middlesex, \$48,028.58; Monmouth, \$80,434.39; Morris, \$52,450.94; Ocean, \$11,136.20; Passaic, \$77,337.26; Salem, \$35,863.98; Somerset, \$41,819; Sussex, \$25,811.23; Union, \$63,338.43; Warren, \$49,452.85.

The reserve fund, being ten per cent. of the total amount of the State school tax, was apportioned among the counties by this Board at a meeting held April 14th, 1885, as follows: Atlantic, \$9,230.98; Bergen, \$3,957.56; Burlington, \$6,488.80; Camden, \$7,833.54; Cape May, \$2,658.85; Cumberland, \$8,883.85; Essex, \$6,239.73; Gloucester, \$2,506.25; Hudson, \$28,674.02; Hunterdon, \$863.95; Mercer, \$7,171.49; Middlesex, \$9,502.86; Monmouth, \$8,043.44; Morris, \$5,245.09; Ocean, \$8,213.62; Passaic, \$7,733.73; Salem, \$916.40; Sussex, \$6,981.12; Union, \$6,333.84; Warren, \$4,945.28.

The sum of \$2,449,015.61 was expended for public schools, exclusive of the amount expended for new buildings and repairs, during the year—an increase of \$35,139.51 over the amount expended in the previous year.

The total amount of the district and city taxes for the building and repairing of school-houses was \$568,388.68, showing an increase over the previous year of \$43,843.54. This indicates an increased desire on the part of localities to provide school accommodations in some degree commensurate with the increased population. The school property of the State is valued at \$6,832,926, showing an increase over the previous year of \$482,119.

The number of children as shown by the school census is three hundred and sixty-six thousand three hundred and seventeen, an increase of ten thousand two hundred and fifty-six. The number of children enrolled in the public schools during the year was two hundred and twenty-two thousand three hundred and seventeen, an increase of five thousand five hundred and twenty-five. The number of male teachers is eight hundred and eighteen, and of female teachers two thousand nine hundred and ninety-eight. The average salary of male teachers is \$63.56, and of female teachers, \$36.30.

During the year the Board appointed County Superintendents, as follows :

Essex, Charles M. Davis, re-elected ; Hudson, Rev. George C. Houghton, *vice* George H. Barton, deceased ; Hunterdon, Oliver H. Hoffman, re-elected ; Mercer, William J. Gibby, re-elected ; Middlesex, Ralph Willis, re-elected. The terms of these Superintendents will expire September 1st, 1888.

LEON ABBETT,  
*President.*

DEPARTMENT OF PUBLIC INSTRUCTION,  
TRENTON, N. J., November 5th, 1885.

*To the Honorable the State Board of Education :*

GENTLEMEN—In compliance with the requirements of the School Law, I have the honor to present to you the following report, together with the reports of the County and City Superintendents of this State, and accompanying documents, for the school year ending August 31st, 1885.

Respectfully yours,

EDWIN O. CHAPMAN,

*State Supt.*

# ANNUAL REPORT.

---

While the school year just closed has not been remarkable for any great improvement, a steady progress has been made, which, though falling far short of that which is possible, is very encouraging to the friends of education.

During the past twenty-five years the public schools of the State have constantly improved in their efficiency and in no year of this period have they failed to meet the progressive demand of the time. More especially has this improvement been marked from year to year since the enactment of the act of 1867, which forms the basis of our present law, and for which we are indebted to the sagacity and zeal of my predecessor, Prof. E. A. Apgar.

Under this law, we have one of the best systems of public instruction that has yet been devised. By its authority, the State has been divided into school districts in such a manner that to-day there is not a child within the State who has not a school-house within a convenient distance from his home. The State provides so liberally for the maintenance of its schools, that more than half of the districts keep their schools open during the nine school months required by law, solely on the State appropriation. One of the conditions upon which this appropriation is made, is that the districts shall provide a suitable school-house, and in a large proportion of the districts, the tax for this purpose is the only local district or township school tax raised. For the maintenance of the district schools during the past year, the State thus directly appropriated nearly one and a half millions of dollars, or, to be exact, \$100,000 from the revenues of the school fund and \$1,396,968, the proceeds of the State school tax; this being a sum equal to four dollars for every child in the State between the ages of five and eighteen years, as determined by the census of 1884. The census of 1885 show an increase of ten thousand two hundred and fifty-six children of school age, and the amount of State school tax available for the year beginning September 1st, 1885, will be \$1,424,244.

In the following general summary of statistics, the present condition of the schools is compared with that of the previous year :

## SCHOOL REPORT.

## SUMMARY OF STATISTICS.

	1883-84.	1884-85.	Increase or Decrease.
REVENUE.			
State school tax appropriated by the State.....	\$1,375,588 00	\$1,396,963 00	\$21,380 00 increase.
Additional State appropriation .....	100,000 00	100,000 00	
Township school tax.....	35,960 05	30,870 84	5,089 21 decrease.
Interest of surplus revenue .....	32,551 31	32,324 25	227 06 decrease.
District and city tax for teachers' salaries.....	323,346 92	293,187 84	30,199 08 decrease.
District and city tax for building school-houses.....	524,545 14	565,388 68	43,843 54 increase.
Total amount for maintaining the schools.....	1,867,436 28	1,858,350 93	14,135 35 decrease.
Total amount, including that raised for building.....	2,392,031 42	2,421,739 61	29,708 19 increase.
Value of school property .....	6,350,507 00	6,832,925 00	482,119 00 increase.
DISTRICT SCHOOL TAX.			
Number of districts that raise tax to pay teachers' salaries.....	274	304	30 increase.
Number of districts that raise tax to build school-houses.....	399	421	22 increase.
Number of districts that raise no tax.....	570	539	31 decrease.
COST OF EDUCATION.			
Average cost per pupil, calculated on total school census.....	\$5 24	\$5 06	\$0 18 decrease.
Average cost per pupil, calculated on enrolled attendance.....	8 61	8 33	28 decrease.
Average cost per pupil, calculated on average attendance.....	15 19	13 96	1 23 decrease.
NUMBER OF TEACHERS.			
Males.....	837	818	19 decrease.
Females.....	2,850	2,995	143 increase.
SALARY.			
Average salary per month paid to male teachers.....	\$51 63	\$53 56	\$1 93 increase.
Average salary per month paid to female teachers.....	35 64	36 30	66 increase.
TEACHERS' CERTIFICATES.			
First grade.... { Number granted to males.....	46	44	2 decrease.
{ Number granted to females.....	29	36	7 increase.
Second grade... { Number granted to males.....	60	73	13 increase.
{ Number granted to females.....	131	139	8 increase.
Third grade.... { Number granted to males.....	372	353	19 decrease.
{ Number granted to females.....	1,153	1,192	39 increase.
Total number granted to males.....	478	470	8 decrease.
Total number granted to females.....	1,313	1,367	54 increase.
Total number granted.....	1,791	1,837	46 increase.
Total number of applicants rejected.....	787	1,120	333 increase.
Per cent. of rejections out of total number examined.....	.30	.28	.02 increase.
Number of certificates revoked.....	1		1 decrease.
SCHOOL DISTRICTS, HOUSES, ETC.			
Number of townships and cities.....	279	279	
Number of school districts.....	1,356	1,357	1 increase.
Number of school buildings.....	1,596	1,536	10 decrease.
Number of buildings owned.....	1,538	1,512	4 increase.
Number of buildings rented.....	58	44	14 decrease.
Number of school departments.....	3,772	3,796	24 increase.
Number of unsectarian private schools.....	136	115	21 decrease.
Number of sectarian private schools.....	82	90	8 increase.
Number of school visits by county superintendents.....	4,751	4,628	153 decrease.
Average number of visits for each district.....	3.5	3.4	.1 decrease.
CONDITION OF SCHOOL PROPERTY.			
Number of buildings denominated very poor.....	64	62	2 decrease.
Number poor.....	104	103	1 decrease.
Number medium.....	262	228	34 decrease.
Number good.....	531	531	

## SUMMARY OF STATISTICS—Continued.

	1883-84.	1884-85.	Increase or Decrease.
Number very good.....	635	662	27 increase.
Number of new buildings erected.....	29	27	2 decrease.
Number of buildings refurnished or remodeled.....	75	68	7 decrease.

## VALUATION OF SCHOOL PROPERTY.

Number of buildings valued at \$100 or less.....	22	22	.....
Number valued between \$100 and \$500.....	289	262	27 decrease.
Number valued between \$500 and \$1,000.....	458	473	15 increase.
Number valued between \$1,000 and \$5,000.....	531	536	5 increase.
Number valued between \$5,000 and \$10,000.....	91	102	11 increase.
Number valued between \$10,000 and \$20,000.....	69	60	9 decrease.
Number valued between \$20,000 and \$40,000.....	32	59	7 increase.
Number valued above \$40,000.....	26	28	2 increase.
Average value.....	\$4,129 00	\$5,191 00	\$1,062 00 increase.

## ATTENDANCE.

Total school census between five and eighteen years of age.....	356,061	366,317	10,256 increase.
Total enrollment in the public schools.....	216,792	222,317	5,525 increase.
Number attending the public schools ten months.....	9,776	12,824	3,048 increase.
Number attending between eight and ten months.....	62,136	60,441	1,695 decrease.
Number attending between six and eight months.....	40,841	41,296	455 increase.
Number attending between four and six months.....	34,361	36,561	2,200 increase.
Number attending less than four months.....	69,678	71,195	1,517 increase.
Average attendance upon the public schools.....	122,930	132,017	9,087 increase.
Number of children the public schools will seat.....	193,303	200,742	6,939 increase.
Number attending private schools.....	48,952	48,510	452 decrease.
Number attending no school.....	87,200	93,653	6,453 increase.

## PERCENTAGE OF ATTENDANCE.

Percentage attending ten months.....	.04	.06	.02 increase.
Percentage attending between eight and ten months.....	.29	.27	.02 decrease.
Percentage attending between six and eight months.....	.19	.19	.....
Percentage attending between four and six months.....	.16	.16	.....
Percentage attending less than four months.....	.32	.32	.....
Percentage of average attendance.....	.56	.59	.03 increase.
Percentage attending the public schools.....	.61	.61	.....
Percentage attending the private schools.....	.14	.13	.01 decrease.
Percentage attending no school.....	.25	.26	.01 increase.
Percentage of census the schools will accommodate.....	.54	.55	.01 increase.

## SCHOOL TERMS.

Number of districts that maintained school less than six months.....	6	3	3 decrease.
Number that maintained school six months, but less than nine months.....	64	61	3 decrease.
Number that maintained school nine months or more.....	1,286	1,293	7 increase.
Average time the schools have been kept open.....	9 mos., 12 days.	9 mos., 12 days.	.....

## DISTRICT SCHOOL CENSUS.

Number of districts with less than forty-five children.....	127	121	6 decrease.
Number having between forty-five and eighty children.....	622	630	8 increase.
Number having between eighty and one hundred and twenty children.....	275	273	2 decrease.
Number having between one hundred and twenty and two hundred children.....	151	156	5 increase.
Number having between two hundred and five hundred children.....	113	110	3 decrease.
Number having more than five hundred children.....	68	67	1 decrease.
Average number in the districts, excluding the cities.....	129	130	1 increase.
Average number in the districts, including the cities.....	262	270	8 increase.

## APPROPRIATIONS.

Besides the State appropriation of \$1,496,968, for the support of the public schools during the year, there has been appropriated by the townships \$30,870.84, and by the districts \$861,576.52, which, with the interest of the surplus revenue, which is used in only sixteen counties and amounted this year to \$32,324.25, makes a total sum of \$2,421,739.61.

It will be noted that while there has been a marked decrease in local taxes for teachers' salaries, a much larger sum than usual has been raised for building, enlarging and repairing school-houses. Of the one thousand three hundred and fifty-seven districts in the State, eight hundred and thirty-nine, or more than sixty-one per cent. of them, have raised no tax for any purpose. The number of districts which have raised no tax is smaller by thirty-one than the number reported last year, and that was smaller than the number reported the previous year. The advantages of a local tax are not limited to the amount of money received, though the revenues from this source are in some districts very necessary for the support of the schools. In most cases, the sums needed to supplement the State appropriation are so small as not to be felt by the taxpayers, and a very small poll or property tax serves to interest all who are taxable in the success of the school for which they thus directly contribute.

## SCHOOL CENSUS.

The rate of increase in the number of children of school age is growing greater year by year. No year in the past ten has shown a falling off in the number of children, and only three years have shown a falling off in the rate of increase, which has been as follows since 1875:

1876.....	.007
1877 .....	.011
1878 .....	.018
1879 .....	.012
1880 .....	.009
1881.....	.015
1882 .....	.025
1883.....	.016
1884 .....	.02
1885.....	.029

The entire increase in our school population since 1875 has been more than seventeen per cent.

The increase in the several counties is, in most of them, in proportion to the increase in population, but there are a few exceptions which it is not easy to account for. The following are the counties which show an increase in their school census during the past year :

Hudson, more than.....	.09
Camden, more than.....	.07
Atlantic, more than.....	.06
Passaic, more than.....	.03
Burlington, less than.....	.03
Union, more than.....	.02
Ocean, less than.....	.02
Essex, more than.....	.01
Bergen, more than.....	.01
Salem, less than.....	.01
Middlesex, less than.....	.01
Gloucester, less than.....	.01

In the following counties the census remains about the same as in the previous year :

Somerset reports an increase of nineteen children.  
 Cumberland reports an increase of fifteen children.  
 Cape May reports an increase of three children.

In the following counties the number of children has decreased as follows :

Morris, less than.....	.02
Mercer, more than.....	.015
Monmouth, more than.....	.01
Warren, more than.....	.01
Hunterdon, less than.....	.005

The whole number of districts having less than forty-five children is one hundred and twenty-one, or six less than last year. It is the constant effort of this department to reduce the number of small districts. In the counties where the necessities of the past have led to the creation of a considerable number, the schools in them are supported with difficulty, and all of the other districts are disadvantageously affected by the reduction of the per capita apportionment of the State appropriation. A comparison of the several counties as to the sizes of their respective districts will be found in Table III.

## SCHOOL TERM.

Of the one thousand three hundred and fifty-seven school districts in the State, only sixty-four have failed to keep their schools open nine months as required by law, and of these only three kept their schools open less than six months. In the previous year seventy districts maintained their schools less than nine months, and six districts less than six months. While the reports for the past year show an improvement in this respect, and while some schools have been closed on account of the destruction of their school-houses, the prevalence of contagious disease, or for other good reasons, it is clear that the trustees of some of these districts do not feel bound by the statute, and do not exert themselves to comply with its requirements. It is made the duty of the State Superintendent to forbid the payment of any part of the State appropriation to any district that fails to keep its schools open nine months, and close inquiry will be made as to the reasons for any future delinquencies in this respect.

While less than five per cent. of the districts have kept their schools open less than nine months, a much larger percentage have kept theirs open for nine and a half and ten months, so that the average time for all the districts was nine months and twelve days.

## ATTENDANCE.

The enrollment in the public schools has not quite kept pace with the school census, for while the latter shows an increase of .029, the enrollment has increased but .025. The following shows the attendance for the past two years :

	1884-5.	1883-4.
Percentage of total census attending public schools.....	.61	.61
Percentage of total census attending private schools.....	.13	.14
Percentage of total census attending no school.....	.26	.25
Percentage of total enrollment attending ten months.....	.06	.04
Percentage of total enrollment attending from eight to ten months.....	.27	.29
Percentage of total enrollment attending from six to eight months.....	.19	.19
Percentage of total enrollment attending from four to six months.....	.16	.16
Percentage of total enrollment attending less than four months.....	.32	.32

At first sight it would appear that the percentage reported as attending no school is alarmingly large, but when it is considered that this

number includes all children who have finished their school education, as well as all those who are more than five years of age but are not sent to school until they are six or seven years of age, it will be seen that these figures do not make a basis upon which we can calculate the amount of illiteracy among the children of the State. At least fifteen per cent. of our school population are between the years of sixteen and eighteen, and not less than two-thirds of these complete the public school course and their school life ends before the age of sixteen. Eight per cent. of our school population are between fourteen and fifteen years of age, and at least one-half of these complete the course and leave school before the age of fourteen. It may be estimated also that not more than one-half of the children between five and six years of age, and they are at least eight per cent. of the whole, are enrolled in the schools before the age of six years.

In the absence of definite information, it is quite safe to say that ten per cent. of our children receive a fair education and leave school before the age of sixteen; that four per cent. finish their school course before the age of fourteen; and that four per cent. are not sent to school until they are six years of age. This accounts for eighteen of the twenty-six per cent. not enrolled, and to this must be added those who are physically or mentally unfitted for school life, those between the ages of six and fourteen who are kept from school for a year, and the still larger number who are taught at home during a part or the whole of their school age. This will leave a very small margin upon which to base any apprehensions of illiteracy.

But while absolute ignorance of the common branches taught in the schools is not to be feared, there is room for doubt as to whether the best use that is possible is being made of the system of education so liberally provided. The percentage of pupils enrolled who have attended less than four months is certainly much too large.

The following shows the percentage of the entire school population enrolled in the schools during the past year, as compared with the enrollment during the next preceding year in the several counties:

Counties.	—Percentage Enrolled—	
	Year ending Aug. 31, 1883.	Year ending Aug. 31, 1884
Cape May.....	.88	.85
Sussex .....	.86	.86
Hunterdon.....	.84	.82
Cumberland.....	.83	.85
Warren .....	.83	.82
Salem .....	.81	.79
Gloucester .....	.79	.86
Ocean.....	.78	.76
Atlantic .....	.77	.78

Morris.....	.74	.72
Somerset.....	.73	.72
Passaic.....	.71	.71
Monmouth.....	.68	.67
Burlington.....	.66	.69
Bergen.....	.65	.64
Camden.....	.64	.68
Middlesex.....	.63	.63
Mercer.....	.55	.53
Essex.....	.52	.50
Union.....	.52	.53
Hudson.....	.43	.45

In enrollment, it will be seen, there has been an improvement of three per cent. in Cape May and Salem; of two per cent. in Hunterdon, Ocean, Morris, Mercer and Essex; and of one per cent. in Warren, Somerset, Monmouth and Bergen. There has been a falling off in enrollment of seven per cent. in Gloucester, four per cent. in Camden, three per cent. in Burlington, two per cent. in Cumberland and Hudson, and one per cent. in Atlantic and Union.

In the matter of enrollment, the following comparison may be made between the cities of the State and between the last two years:

Cities.	—Percentage Enrolled—	
	Year ending Aug. 31, 1885.	Year ending Aug. 31, 1884.
Millville.....	.92	.89
Phillipsburg.....	.80	.76
Atlantic City.....	.78	.82
Paterson.....	.74	.74
Salem.....	.71	.61
Bridgeton.....	.68	.72
Gloucester City.....	.65	.47
Camden.....	.61	.69
Rahway.....	.61	.70
Plainfield.....	.58	.59
New Brunswick.....	.55	.52
Newark.....	.51	.48
Passaic.....	.51	.62
Morristown.....	.50	.52
Hoboken.....	.47	.50
Trenton.....	.47	.44
Perth Amboy.....	.46	.48
Elizabeth.....	.43	.42
Jersey City.....	.40	.43
Orange.....	.38	.36

From the above it appears that there has been an improvement of eighteen per cent. in Gloucester City; ten per cent. in Salem; four per cent. in Phillipsburg; three per cent. in Millville, New Brunswick, Newark and Trenton; two per cent. in Orange; and one per cent. in Elizabeth. It also appears that there has been a falling off of eleven per cent. in Passaic; ten per cent. in Plainfield; nine per cent. in Rahway; eight per cent. in Camden; four per cent. in Atlantic City and Bridgeton; three per cent. in Hoboken and Jersey City; and two per cent. in Morristown and Perth Amboy.

## SCHOOL ACCOMMODATIONS.

The school population increases so rapidly in some portions of the State, that it is found difficult to supply the new accommodations needed from year to year. This is especially true of the larger cities, and there is no doubt that in these cities the lack of suitable school room largely affects the attendance.

The last report from this department showed a decrease in the value of school property of \$164,813, while the present report shows an increase in value of \$482,119. Twenty-seven new school-houses have been erected, and many have been enlarged, but the schools will still accommodate but fifty-five per cent. of the school population.

A comparison between the counties in this respect may be made as follows, for the past two years:

Counties.	Percentage of School Census that the Schools will Accommodate.	
	1884-5.	1883-4.
Cape May.....	.97	.87
Sussex.....	.92	.88
Gloucester.....	.84	.72
Warren.....	.83	.86
Monmouth.....	.80	.70
Salem.....	.80	.73
Cumberland.....	.78	.74
Ocean.....	.77	.79
Burlington.....	.74	.74
Atlantic.....	.73	.78
Hunterdon.....	.73	.73
Bergen.....	.70	.66
Morris.....	.68	.66
Somerset.....	.68	.65
Camden.....	.56	.54
Passaic.....	.54	.45
Essex.....	.47	.44

Mercer .....	.46	.49
Union .....	.46	.47
Middlesex.....	.44	.57
Hudson.....	.30	.32

Gloucester reports a gain of twelve per cent. ; Cape May and Monmouth, ten per cent. ; Passaic, nine per cent. ; Salem, seven per cent. ; Sussex, Cumberland and Bergen, four per cent. ; Somerset and Essex, three per cent. ; and Morris and Camden, two per cent. The counties that report a smaller percentage of accommodation are Middlesex, thirteen per cent. ; Atlantic, five per cent. ; Warren and Mercer, three per cent. ; Ocean and Hudson, two per cent. ; and Union, one per cent.

In this respect the cities compare as follows :

Cities.	Percentage of School Census that the Schools will Accommodate.	
	1884-5.	1883-4.
Salem .....	.71	.53
Phillipsburg.....	.70	.90
Millville .....	.65	.64
Rahway .....	.63	.65
Atlantic City.....	.61	.64
Bridgeton .....	.58	.60
Paterson.....	.52	.37
New Brunswick.....	.50	.50
Camden .....	.46	.47
Morristown .....	.46	.48
Passaic.....	.45	.48
Newark.....	.43	.40
Gloucester City.....	.42	.47
Plainfield .....	.42	.52
Trenton.....	.40	.43
Hoboken.....	.37	.40
Orange .....	.33	.33
Perth Amboy.....	.32	.33
Elizabeth .....	.30	.30
Jersey City.....	.26	.29

Salem, Paterson, Newark and Millville have increased their accommodations beyond the increase in their respective school populations ; New Brunswick, Orange and Elizabeth have kept pace with their school census ; and all other cities have failed to provide for any increase in the number of their children. The above figures also show that, with the exception of Salem, Phillipsburg and Millville,

and perhaps Rahway and Atlantic City—all among the smallest of our cities—not a city in the State furnishes sufficient school accommodations, and the most notable failures in this respect are on the part of those cities which are increasing most rapidly in population.

In all of the above statistics, those for counties include those for the cities within those counties.

The school buildings may be classified as follows :

COUNTIES.			
	One room.	Two rooms.	More than two rooms.
Atlantic.....	34	6	12
Bergen.....	41	20	9
Burlington.....	92	14	14
Camden.....	38	11	17
Cape May.....	23	6	1
Cumberland.....	43	21	16
Essex.....	14	17	55
Gloucester.....	43	20	8
Hudson.....	2	7	32
Hunterdon.....	81	17	12
Mercer.....	44	8	19
Middlesex.....	56	12	13
Monmouth.....	92	20	12
Morris.....	79	19	11
Ocean.....	40	6	2
Passaic.....	27	8	17
Salem.....	56	13	6
Somerset.....	65	4	2
Sussex.....	86	9	5
Union.....	7	5	20
Warren.....	85	2	6
<b>Total.....</b>	<b>1,053</b>	<b>244</b>	<b>289</b>

Of the one thousand five hundred and eighty-six school buildings in the State, twenty-seven were erected during the past year; of the others, one hundred and three are reported as "poor," and sixty-two as "very poor." Last year, one hundred and four were reported as "poor," and sixty-four as "very poor." The buildings classed as "poor" and "very poor" are distributed as follows among the counties :

	Very Poor.	Poor.
Burlington.....	13	10
Sussex.....	10	10
Atlantic.....	6	7
Gloucester.....	6	11
Passaic.....	5	3
Cape May.....	4	0
Cumberland.....	3	7
Hunterdon.....	3	2
Somerset.....	3	8

Hudson.....	2	6
Salem .....	2	6
Bergen .....	1	0
Camden .....	1	1
Essex.....	1	3
Monmouth.....	1	2
Ocean.....	1	0
Warren .....	0	12
Morris.....	0	10
Union .....	0	2
Middlesex .....	0	2
Mercer .....	0	1

Of very poor buildings, Burlington reports five less than last year ; Passaic, four less ; Cape May, Hudson and Mercer, each two less ; and Ocean, Salem and Sussex, each one less.

Full statistics as to the size, condition and value of school buildings are arranged by counties and cities in Tables VII., VIII., IX. and X.

#### FURNITURE AND SUPPLIES.

In the matter of seats and desks, there has been but little improvement during the year, three hundred and fourteen buildings being still furnished with the inconvenient and ill-looking styles that were in use many years ago. The modern styles are now to be had at reasonable prices, and they contribute so much to the comfort, convenience and health of pupils, that no school-room should be without them. Whatever was possible in past generations, no teacher of to-day can hope to secure the best results in a room furnished with the uncomfortable and unsightly desks of half a century ago.

Two hundred and ninety-two buildings are reported as having insufficient black-boards. These are so essential to good work in the school-room, and they are so easily supplied, that there can be no excuse for their absence.

Of other supplies that should be found in every building, eighty-one per cent. of our schools are supplied with dictionaries, sixty-five per cent. with maps, fifty-eight per cent. with globes, and fifty-four per cent. with gazetteers. For statistics, see Tables XI. and XII.

#### TEXT-BOOKS.

In only one hundred and eighty-two districts are text-books furnished to pupils, and fifteen of these are cities. New Brunswick has

adopted the plan since our last report, and text-books are now furnished in all the cities except Orange, Phillipsburg, Plainfield, Salem and Trenton.

By the unremitting efforts of our County Superintendents the most gratifying results have been obtained in securing uniformity of text-books in the districts. Last year there were reported two hundred and eighty-eight districts in which there was not uniformity. During the past year the number has been reduced to one hundred and fifty-four. See Tables XI. and XII.

#### DISTRICT SCHOOL LIBRARIES.

The following schools have established or added to their free school libraries during the year :

Atlantic county, first application, No. 34 ; fourth application, Nos. 15 and 16.

Bergen county, second application, No. 35½ ; third application, Nos. 12, 13 and 42 ; fourth application, Nos. 19 and 31 ; fifth application, No. 36 ; sixth application, No. 45 ; seventh application, No. 15 ; twelfth application, Nos. 6 and 37.

Burlington county, first application, No. 31 ; third application, No. 15 ; fourth application, No. 29.

Camden county, first application, No. 13 ; second application, No. 16 ; fourth application, No. 39 ; eighth application, No. 21.

Cape May county, first application, Nos. 12 and 24 ; third application, No. 28 ; fourth application, No. 26.

Cumberland county, first application, Nos. 52 and 61 (Schools Nos. 1, 2, 3, 4 and 5) ; second application, Nos. 39 and 60 ; third application, No. 62 (Third Ward School) ; fourth application, No. 51.

Essex county, first application, Nos. 39 (School No. 2), 43 (South Tenth Street, Summer Avenue and South Street Schools) and 44 (Valley School) ; second application, No. 43 (Market Street School) ; third application, Nos. 19 and 44 (Park Avenue School) ; fourth application, Nos. 6, 7 (Berkeley and Brookside Schools) and 43 (Morton Street School) ; fifth application, Nos. 8 (School No. 2), 43 (High, Webster Street, Eighteenth Avenue and Central Avenue Schools), and 44 (Lincoln Avenue School) ; sixth application, No. 44 (High School) ; seventh application, No. 39 (School No. 1) ; eighth application, Nos. 7 (Center School) and 27 ; tenth application, Nos. 4 and 8 (School No. 1).

Gloucester county, first application, Nos. 21, 42 and 58 ; second application, Nos. 1 (Schools Nos. 4 and 5), 2 and 43 (School No. 1) ; third application, No. 1 (School No. 3) ; fourth application, Nos. 7 and 27 ; sixth application, No. 1 (School No. 2) ; ninth application, No. 1 (School No. 1).

Hudson county, first application, No. 11 ; second application, No. 15 (Schools Nos. 4 and 5) ; fourth application, No. 13 (High School and Schools Nos. 14 and 21).

Hunterdon county, first application, No. 6 ; second application, Nos. 49, 68, 70, 88 and 103 ; fourth application, No. 85 ; fifth applications, Nos. 13 and 61 ; seventh application, No. 67.

Mercer county, second application, No. 45.

Middlesex county, first application, No. 61 ; second application, No. 62 ; third application, No. 65 ; sixth application, No. 39 ; eighth application, No. 73 (Livingston Avenue, Carman Street, Guldin Street and French Street Schools) ; ninth application, No. 73 (Bayard Street School).

Monmouth county, first application, Nos. 78 (School No. 1) and 95 ; second application, Nos. 53, 58 and 64 ; third application, No. 67 ; fourth application, Nos. 3, 38, 42 and 47 ; fifth application, No. 102 ; sixth application, No. 49.

Morris county, first application, Nos. 11, 53 and 58 ; third application, No. 44, 48, 68 and 91 ; fourth application, Nos. 1, 45, 59 and 74 ; fifth application, Nos. 20, 52 and 67 (School No. 1) ; sixth application, No. 86 ; fourteenth application, No. 82.

Ocean county, first application, No. 31 ; second application, No. 38.

Passaic county, first application, Nos. 2 and 23 ; second application, Nos. 16, 28 and 35 (School No. 7) ; third application, No. 12 ; fourth application, No. 35 (Schools Nos. 2 and 10) ; sixth application, No. 14.

Salem county, first application, No. 26 (School No. 1).

Somerset county, first application, Nos. 25, 34, 40 and 53 ; second application, Nos. 22 and 31 ; fourth application, Nos. 11 and 47 ; sixth application, No. 66 ; tenth application, No. 29.

Sussex county, first application, Nos. 26, 33, 36 and 74 ; second application, Nos. 3 and 92 ; third application, No. 25 ; fifth application, No. 37.

Union county, first application, No. 17 ; second application, No. 15 ; fourth application, No. 5 (Schools Nos. 1 and 2) ; sixth application, No. 27 ; seventh application, No. 1 ; eighth application, No. 19 ; ninth application, No. 18.

Warren county, third application, No. 31.

The number of first applications made during the year is forty, a decrease of eleven ; of second applications, thirty, a decrease of seven ; of third applications, eighteen, a decrease of fourteen ; of fourth applications, thirty-one, an increase of fifteen ; of fifth applications, fourteen, an increase of three ; of sixth applications, nine, an increase of three ; of seventh applications, six, a decrease of six ; of eighth applications, eight, a decrease of one ; of ninth applications, three, an increase of one ; of tenth applications, three, an increase of three ; of eleventh applications, none, a decrease of one ; of twelfth applica-

tions, two, an increase of two; of thirteenth applications, none, a decrease of one; of fourteenth applications, one, an increase of one. The total number for the year is one hundred and sixty-five, a decrease of thirteen.

¶ Seven hundred and forty-seven schools have established school libraries; one hundred and sixty-one have made the second application; seventy-eight have made the third application; sixty-one have made the fourth application; thirty-two have made the fifth application; twenty-five have made the sixth application; eighteen have made the seventh application; fifteen have made the eighth application; five have made the ninth application; four have made the tenth application; two have made the twelfth application; one has made the fourteenth application. The total number of applications is one thousand eight hundred and twenty-four.

Table XVII. gives full statistics of the sums expended and of the present condition of the school libraries in all the counties.

The following table shows, by counties, the number of schools having libraries, and the number of payments made to the several schools:

COUNTIES.	First payment.	Second payment.	Third payment.	Fourth payment.	Fifth payment.	Sixth payment.	Seventh payment.	Eighth payment.	Ninth payment.	Tenth payment.	Eleventh payment.	Twelfth payment.	Thirteenth payment.	Fourteenth payment.	Whole number of schools having libraries.	Total number of payments.

## CURRENT EXPENSES IN CITIES.

In table XV. is given a financial report, showing the current and permanent expenses in each of the twenty cities from which we receive

separate reports. An examination of the figures under the several heads of "Permanent Expenses" shows that laudable efforts have been made in most of the cities to enlarge and improve their school accommodations, while the sums reported under "Current Expenses" show an effort to meet the increased demands for maintenance.

In the cities where the school population is rapidly increasing, the constant demand is for more room and more teachers. The percentage of increase over last year in the amounts paid for teachers' salaries, and also for total incidental expenses, as nearly as such percentage can be expressed by two figures, may be presented as follows :

	Increase in teachers' salaries.	Increase in total current expenses.
Orange.....	.19	...*
New Brunswick.....	.17	.12
Millville.....	.13	.12
Paterson.....	.13	.11
Atlantic City.....	.12	...*
Newark.....	.10	.12
Gloucester City.....	.09	.14
Passaic.....	.09	.09
Perth Amboy.....	.06	.06
Plainfield.....	.06	.12
Camden.....	.03	.18
Morristown.....	.03	.01
Trenton.....	.03	.06
Hoboken.....	.02	...*
Jersey City.....	.02	.03
Phillipsburg.....	.02	.03
Rahway.....	.02	...*
Bridgeton.....	.01	.03
Elizabeth.....	.01	...*
Salem.....	...*	...*

\* Atlantic City and Rahway report a decrease of .03 in incidental expenses, Salem a decrease of .04, and in Orange and Hoboken the incidental expenses are very nearly the same as last year. Salem also reports a decrease of .04 in the amount paid for teachers' salaries.

The following table gives the per capita expense for cities based on the total school census, also the same based on the total number enrolled in the schools and on the average attendance, together with the aggregate current expenses and the time the schools have been kept open :

CITIES.	Number of months the schools have been kept open.	Aggregate current expenses.	Per capita expense on total school census.	Per capita expense on enrolled attendance.	Per capita expense on average attendance.
Atlantic City.....	9.5	\$10,202 10	\$5 46	\$6 96	\$13 49
Bridgeton.....	10.7	14,293 06	5 74	8 95	13 66
Camden.....	10.7	81,850 97	5 94	9 33	16 94
Elizabeth.....	10.1	37,253 74	4 44	10 30	14 96
Gloucester City.....	10.7	6,594 24	3 96	5 90	14 55
Hoboken.....	10.1	71,549 01	6 10	12 98	18 41
Jersey City.....	10.	126,664 50	3 24	8 25	12 75
Millville.....	10.	18,443 32	7 18	7 84	11 78
Morristown.....	10.	12,053 22	6 95	13 95	17 05
Newark.....	10.	251,246 09	5 81	11 32	16 66
New Brunswick.....	10.5	28,499 14	6 03	9 97	14 36
Orange.....	10.	23,281 23	5 27	14 03	17 75
Passaic.....	10.	14,794 67	6 52	11 92	16 62
Paterson.....	10.	91,700 65	5 38	7 27	10 94
Perth Amboy.....	10.5	6,441 17	4 11	8 91	15 98
Phillipsburg.....	10.	15,495 06	6 03	7 61	9 68
Plainfield.....	10.	19,957 72	8 09	14 62	19 91
Rahway.....	10.	12,304 83	6 92	11 40	15 50
Salem.....	10.	8,218 90	5 95	8 30	12 90
Trenton.....	10.5	49,266 05	5 77	12 04	18 23
Total.....	10.1	\$963,109 67	\$5 01	\$9 74	\$14 76

The average increase over last year of expense per capita, based on the total school census, is \$0.22. This increase in the several cities is as follows: Millville, \$0.89; Passaic, \$0.69; New Brunswick, \$0.65; Newark, \$0.58; Trenton, \$0.53; Gloucester City, \$0.43; Camden, \$0.41; Paterson, \$0.34; Bridgeton, \$0.21; Phillipsburg, \$0.15; Perth Amboy, \$0.07; Orange, \$0.06; Plainfield, \$0.05. A decrease of expense per capita is found in the following cities: Atlantic City, \$1.36; Rahway, \$0.97; Hoboken, \$0.45; Morristown, \$0.24; Jersey City, \$0.22; Salem, \$0.16; Elizabeth, \$0.01.

#### CURRENT EXPENSES IN COUNTIES.

When the average of expense per capita is taken for entire counties, including the cities in their respective counties, it is considerably increased when based upon the census, or upon the average attendance. The average for the entire State is \$5.72, as against the average of \$5.01 for the cities. In all of the counties from which no cities make separate reports, except Burlington and Ocean, the per capita expense is above the average of expense in cities, and in one-half of the counties containing cities the low averages in the latter help to reduce the average per capita expenditure in the counties.

In the following table is given the current expense per capita on the three bases used in the table for cities:

COUNTIES.			
	Per capita expense on total school census.	Per capita expense on enrolled attendance.	Per capita expense on average attendance.
Atlantic.....	\$6 14	\$8 05	\$14 39
Bergen.....	6 71	10 39	17 42
Burlington.....	4 78	7 20	14 41
Camden.....	5 66	8 50	16 21
Cape May.....	6 93	7 46	10 73
Cumberland.....	6 23	7 81	12 80
Essex.....	6 20	12 22	13 17
Gloucester.....	6 12	8 22	15 43
Hudson.....	3 95	9 17	14 30

Warren.....	5 98	7 18	11 94
	\$5 72	\$9 43	\$15 88

## TEACHERS AND SALARIES.

In tables I. and II. will be found full statistics for cities and counties, of the number of teachers of each sex employed and the average salaries paid to each. The whole number of teachers employed was three thousand eight hundred and sixteen, being one hundred and twenty-nine more than was reported the previous year. The number of male teachers, however, has been reduced from eight hundred and thirty-seven to eight hundred and eighteen. Of these, one hundred and eleven males and one thousand four hundred and seventy-seven females are employed in the cities. In the previous year there were one hundred and eight males and one thousand three hundred and ninety-nine females employed in the cities.

This falling off in the number of male teachers has continued from year to year to such an extent that it is worthy of notice. It is probably due to a desire on the part of the school districts to economize, which has led to a reduction of salaries to sums which will not secure the services of men. It cannot be said that our women teachers, as a whole, are less efficient than those of the other sex, or that their services are worth less, but the conditions of society permit them to take less. Where the competition for appointment is limited to this single condition, there can be no objection if the woman wins; but I find a disposition in some parts of the State to give the preference to the lowest bidder, without a proper consideration for the fitness of the

teacher or the special needs of the district. Such economy is extremely unwise, whether the teacher employed be a male or a female. The best teacher is not always the highest priced, but it is never the lowest priced.

Whatever may be the fact in our ungraded district schools, I am very certain that more male teachers should be employed in the large, graded, city schools. There is much to be done in these schools that a woman cannot do and ought not to be asked to do.

The average salary paid to male teachers was \$63.56 per month, an increase over the previous year of \$1.97; and to female teachers, \$36.30 per month, an increase of \$0.66. The highest salaries are paid to both men and women in Essex county; the lowest salaries to men, in Sussex county, and the lowest salaries to women, in Gloucester county. Comparing the year just closed with the previous year, we find that the counties of Atlantic, Hudson, Monmouth, Salem and Sussex have increased the salaries of both male and female teachers, while Burlington, Camden, Cumberland, Hunterdon, Ocean and Somerset have decreased the salaries of both. Bergen, Mercer and Passaic have paid more to males and less to females, and Cape May, Essex, Gloucester, Morris and Warren have paid more to females and less to males. In Middlesex, the salaries of the men have been increased, while the salaries of the women remain the same, and in Union, the salaries of females have been reduced, while the pay of the males has averaged the same.

Taking the cities by themselves, the average salary per month paid to men was \$116.18, and to women, \$43.86. This is \$3.01 more per month for the men and \$0.53 more per month for the women than during the previous year. Comparing with the previous year—in Atlantic City, Hoboken, Millville, New Brunswick, Salem and Trenton, the salaries of both male and female teachers have been increased; in Paterson, the average salary of males is higher, while that of females is lower; in Elizabeth and Orange, the males are paid same and the females more; in Morristown, Newark and Phillipsburg, the females are paid more and the males less; in Camden, the females are paid the same and the males less, and in Perth Amboy, Plainfield and Rahway, the males are paid the same and the females less. In Bridgeton, Gloucester City, Jersey City and Passaic, the salaries average exactly or about the same as last year.

The greatest average increase in the salaries of males is reported by Trenton, it being \$54.50 per month. Millville reports an average increase of \$10.59 per month, and Atlantic City an increase of \$10. The greatest reduction in the average salary of males is reported by Camden, \$11.73. Newark reports the greatest increase in the average monthly salary to female teachers, \$4.97, and Paterson shows the greatest reduction, \$8.

## TEACHERS' CERTIFICATES.

In table XVI. will be found full statistics of certificates issued during the year in the several counties. The total number issued may be compared as follows with the number issued last year :

	1883-4.			1884-5.		
	To males.	To females.	Total.	To males.	To females.	Total.
First grade.....	46	29	75	44	36	80
Second grade.....	60	131	191	73	139	212
Third grade.....	372	1153	1525	353	1192	1545
Total.....	478	1313	1791	470	1367	1837

This shows a slight improvement in the grades of the certificates issued, but the proportion of first and second grade certificates is much smaller than it should be. The counties that show the greatest improvement in this respect are Burlington, Monmouth, Sussex and Union.

The number of teachers holding each grade of county and State certificates in the several counties is given in the following table :

COUNTIES.	STATE CERTIFICATES.			COUNTY CERTIFICATES.			CITY CERTIFICATES.			Special certificates.	Without certificates.
	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.		
Atlantic.....	1	7	2	17	20	20	2	10	3	.....	1
Bergen.....	10	12	2	29	36	35	.....	.....	.....	.....	.....
Burlington.....	6	5	4	30	29	111	.....	.....	.....	.....	.....
Camden.....	10	6	1	13	3	35	25	29	75	.....	3
Cape May.....	3	1	.....	9	10	19	.....	.....	.....	.....	.....
Cumberland.....	9	4	3	15	16	61	17	14	23	.....	.....
Essex.....	24	21	6	28	37	60	354	5	.....	2	3
Gloucester.....	6	6	3	17	20	52	.....	.....	.....	.....	.....
Hudson.....	29	10	1	17	33	35	193	195	45	1	.....
Hunterdon.....	7	8	2	13	21	93	72	.....	.....	.....	6
Mercer.....	7	9	.....	11	7	43	.....	.....	.....	.....	.....
Middlesex.....	7	11	3	10	16	66	46	3	.....	.....	.....
Monmouth.....	5	7	3	28	33	122	.....	.....	.....	1	.....
Morris.....	4	2	6	10	15	104	14	.....	.....	.....	.....
Ocean.....	1	.....	.....	5	15	38	.....	.....	.....	.....	.....
Passaic.....	8	10	1	7	7	16	43	70	62	.....	2
Salem.....	.....	5	3	11	15	50	.....	3	14	.....	.....
Somerset.....	5	5	3	19	21	56	.....	.....	.....	.....	.....
Sussex.....	3	1	.....	14	17	86	.....	.....	.....	.....	.....
Union.....	11	6	1	19	12	13	27	45	15	1	.....
Warren.....	3	.....	.....	33	47	65	.....	.....	.....	.....	.....
Total.....	159	136	53	355	430	1,188	793	374	237	5	15

It will be noted that fifteen teachers are reported as without certificates. These teachers are all in the cities, and for various reasons they are allowed to teach on temporary permits. It is impossible to grade city certificates with those issued by county superintendents, for the reason that in cities the grades are fixed and the certificates issued by the city boards of education.

## CERTIFICATES TO GRADUATES OF THE STATE NORMAL SCHOOL.

## FEBRUARY CLASS.

*Advanced Course.*

NAME.	RESIDENCE.	DATE OF ISSUE.	DATE OF EXPIRATION.
Josephine Carll.....	Bridgeton, Cumberland County.....	January 29, 1885.	January 29, 1895.
Charles M. Dalrymple.....	Baptistown, Hunterdon County.....	"	"
Louisa F. Eudres.....	Trenton, Mercer County.....	"	"
Lizzie V. Gilbert.....	Hackensack, Bergen County.....	"	"
Lizzie T. Hubbard.....	Princeton, Mercer County.....	"	"
Mary R. Mattix.....	Mays Landing, Atlantic County.....	"	"
Julia G. O'Brien.....	Trenton, Mercer County.....	"	"
Nellie M. Wallace.....	Trenton, Mercer County.....	"	"

*Elementary Course.*

## NORMAL TEACHERS.

In the following table is given the number of graduates of our State Normal School who have taught in the several counties during the year. There are nineteen more graduates and thirty-six more undergraduates than last year. The undergraduates took but a portion of the Normal School course :

COUNTIES.	Graduates.	Undergraduates.
Atlantic.....	7	7
Bergen.....	20	12
Burlington.....	22	13
Camden.....	10	7
Cape May.....	2	3
Cumberland.....	6	11
Essex.....	36	20
Gloucester.....	9	11
Hudson.....	8	2
Hunterdon.....	11	18
Mercer.....	53	11
Middlesex.....	18	17
Monmouth.....	22	13
Morris.....	9	15
Ocean.....	1	2
Passaic.....	14	1
Salem.....	8	3
Somerset.....	9	19
Sussex.....	2	6
Union.....	11	2
Warren.....	7	2
Total.....	285	195

## SCHOOL METHODS.

The methods of teaching, by which the efficiency of teachers may be judged, cannot of course be fully presented by tables of figures, but an effort has been made for a number of years past to get statistics on some features of school-room work, in order that comparisons

may be made between the years. These statistics cannot be exact, because much must be left to the judgment of the county and city superintendents, and each has a standard of his own. For this reason, too, no comparison as between different counties or cities can be fair. But as, in the main, the statistics are gathered for a series of years by the same superintendents, a comparison may very justly be made between the statistics of two or three successive years. In the following table is presented these figures for the past year, as reported by the county superintendents :

COUNTIES.	Number of teachers too closely confined to the text-book in bearing recitations.	Number of teachers not thus too closely confined to the text-book.	Number of schools in which the children are required to study at home.	Number of schools in which the children are not required to study at home.	Average number of studies pursued in the room.	Average number of recitations heard daily.
Atlantic.....	43	40	81	2	16	16
Bergen.....	1	123	98	26	7	16
Burlington.....	18	167	164	21	19	18
Camden.....	27	173	143	57	16	14
Cape May.....	14	28	31	11	19	20
Cumberland.....	77	85	55	167	11	12
Essex.....	47	493	213	327	10	10
Gloucester.....	15	89	86	13	19	21
Hudson.....	51	508	347	212	8	7
Hunterdon.....	30	114	80	64	19	22
Mercer.....	.....	171	164	7	17	17
Middlesex.....	5	155	129	31	11	10
Monmouth.....	18	181	194	5	17	18
Morris.....	68	87	29	126	12	13
Ocean.....	5	54	35	24	18	20
Passaic.....	41	152	178	48	12	11
Salem.....	70	51	89	12	16	16
Somerset.....	9	100	81	28	19	20
Sussex.....	55	66	27	94	19	23
Union.....	8	142	116	34	10	9
Warren.....	15	136	66	35	15	15
Total.....	620	3,125	2,466	1,339	15	15

The most noteworthy fact shown in the above, is that about one-seventh of all the teachers in the State make an improper use of the text-book in recitations. Hearing recitations from a text-book is not teaching, and this truth should be impressed upon the minds of school boards. Text-books are useful to the pupils for study, and to the teacher for reference. In some of the branches taught in our public schools, they save a great deal of labor for both teacher and pupil, but they never should be so necessary to either that they cannot be put aside during a recitation. Perhaps the greatest fault in our schools is that words are taught and studied rather than things, and books take the place of subjects. It would be a good rule for school boards not to employ any teacher who is *obliged* to use a book at all in the school room.

Comparing our figures, however, with those presented last year, we find a very encouraging improvement in this respect, for the number of teachers who helplessly rely on their text-books is decreased by a full hundred.

As to the number of children required to study at home, the question was hardly a fair one. If we knew to what extent the home study was carried, we could form some opinion as to how far this aid to the teacher is used and to what extent it is abused. In future reports, an attempt will be made to present more definite information on this point. There is reason for fear that laborious home study is often relied upon to supply the deficiencies in teaching. There can be very little teaching in a school where the entire time is consumed in testing what pupils have learned at home.

The average number of recitations, as reported above, is puzzling to me, and quite likely these figures are misleading, because of a failure to make the questions which elicited the reports perfectly clear.

An attempt is made in the following table to present the condition of the city schools in these respects:

CITIES.	Number of teachers too closely confined to the text-book in bearing recitations.		Number of teachers not thus too closely confined to the text-book.		Number of schools in which the children are required to study at home.		Number of schools in which the children are not required to study at home.		Average number of studies pursued in the schools.		Average number of recitations heard daily.	
Atlantic City.....	10	9	18	1	12	12						
Bridgeton.....	23	6	29	6	10	10						
Camden.....	9	119	83	40	12	9						
Elizabeth.....	2	52	33	21	7	6						
Gloucester City.....		11	5	6	10	9						
Hoboken.....		105	97	8	7	7						
Jersey City.....	40	310	175	174	8	7						
Millville.....	16	21	2	35	11	11						
Morristown.....	1	17	12	6	7	6						
Newark.....	43	324	109	258	9	10						
New Brunswick.....	3	44	24	23	9	8						
Orange.....		32	19	13	8	7						
Passaic.....		25	13	12	10	8						
Paterson.....	41	121	132	30	7	7						
Perth Amboy.....		10	6	4	7	8						
Phillipsburg.....		34	3	31	12	8						
Plainfield.....		23	16	9	8	3						
Rahway.....		31	17	4	9	8						
Salem.....		8	17	4	11	10						
Trenton.....		78	78	.....	11	10						
Total.....	261	1,372	865	708	9	8						

Many of the cities make a better showing than the counties, and it should be said of those that do not—Atlantic City, Bridgeton, Jersey City, Millville, Newark, Paterson and Salem—that the standard on these points is high, and the superintendence thorough and critical.

## TERMS OF SERVICE OF TEACHERS.

The injury resulting from a frequent change of teachers was long ago recognized by our local school boards, and New Jersey was one of the first of the Eastern States to drop the old New England system of a winter term and a summer term, with a different teacher for each. The custom is very general now, throughout the State, to make a contract with a teacher for the entire school year, and to renew it for the next year if the parties can agree to the terms. Notwithstanding the desire of teachers of experience to seek larger fields and larger salaries, it is not unusual to find teachers who have labored in the same district school for five or ten successive years, and a considerable number have served a longer time.

In the table below is shown the lengths of time that the teachers have taught in the schools where they are now teaching :

COUNTIES.	Number who have been in the same school one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average time.		Longest time by any one teacher, in years.
								Years.	Months.	
Atlantic.....	39	39	5	.....	.....	.....	.....	2	4	9
Bergen.....	32	64	22	5	.....	.....	.....	4	.....	17
Burlington.....	77	68	21	11	6	2	.....	3	8	23
Camden.....	31	61	58	36	4	5	5	7	6	35
Cape May.....	18	20	3	.....	1	.....	.....	2	6	16
Cumberland.....	45	75	26	11	3	2	.....	5	5	24
Essex.....	79	197	111	85	42	12	14	7	1	34
Gloucester.....	46	45	6	2	3	1	1	3	4	29
Hudson.....	76	175	149	109	37	8	5	7	3	33
Hunterdon.....	61	59	15	5	3	.....	1	3	3	27
Mercer.....	40	61	55	17	9	6	3	6	7	29
Middlesex.....	48	71	20	10	4	6	1	5	.....	25
Mummouth.....	64	99	28	8	.....	.....	.....	3	4	15
Morris.....	65	73	13	3	1	.....	.....	3	8	17
Ocean.....	27	29	3	.....	.....	.....	.....	1	8	8
Pasajic.....	42	104	33	29	12	6	.....	5	.....	23
Salem.....	49	38	10	2	2	.....	.....	4	.....	19
Somerset.....	57	41	6	4	1	.....	.....	2	4	18
Sussex.....	66	47	6	2	.....	.....	.....	2	.....	13
Union.....	35	49	29	20	13	2	2	6	7	34
Warren.....	66	62	15	3	5	.....	.....	4	1	18
Total.....	1,063	1,477	614	362	147	50	52	4	4	.....

From the above it appears that nearly three per cent. of our teachers have been in their present schools more than twenty years; nearly seven per cent. more than fifteen years; sixteen per cent. more than ten years, and more than one-third of all the teachers have served more than five years. It also appears that the tenure of position is longest in Camden, Hudson and Essex, and shortest in Ocean and Sussex.

In the following table the same statistics are given for the cities :

CITIES.	Number who have been in the same school one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average time.		Longest time by any one teacher, in years.
								Years.	Months.	
Atlantic City.....	5	14						2	6	5
Bridgeton.....	11							2		22
Camden.....	34	47	31	1	5			8	5	35
Elizabeth.....	3	12	15	15	6	1	2	10	3	34
Gloucester City.....	3	3	3	2	2		1	11		30
Hoboken.....	12	27	30	26	10			7	7	19

New Brunswick.....	3	14	13	6	4	6	1	9	4	29
Orange.....	4	9	11	6	1		1	7	6	26
Passaic.....	4	12	4	4	1			5	4	17
Paterson.....	21	75	25	24	11	6		6	1	23
Perth Amboy.....	3	6		1				3		11
Phillipsburg.....	7	13	7	3				6		16
Plainfield.....	8	9	4	1	3			4		19
Rahway.....	2	6	6	3	3	1		9		25
Salem.....	5	6	6	2	2			6		19
Trenton.....	7	25	18	14	6	5	3	9		29
Total.....	182	533	391	283	113	42	29	7	1	

Taking all the cities together, the average term of service is seven years and one month. Nearly two per cent. of the teachers have served in their present schools more than twenty-five years; nearly five per cent. have served more than twenty years; about twelve per cent. have served more than fifteen years; about thirty per cent. more than ten years, and nearly fifty-five per cent. more than five years. The longest average term of such service is in Gloucester City, eleven years. Elizabeth reports an average of ten years and three months; New Brunswick, of nine years and four months, and Rahway and Trenton each report an average of nine years. The shortest average is in Atlantic City, two years and six months.

#### EXPERIENCE OF TEACHERS.

In total teaching experience our teachers will compare favorably with those of any other State, as may be seen by the following table :

COUNTIES.	Number who have been teaching one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average time.		Longest time by any one teacher, in years.
								Years.	Months.	
Atlantic.....	11	51	14	2	1	2	2	5	2	31
Bergen.....	15	36	34	20	6	4	9	9	1	26
Burlington.....	24	69	37	26	19	5	5	7	7	39

Somerset.....	24	40	25	7	5	4	4	6	6	34
Sussex.....	21	55	23	12	7	1	2	6	1	31
Union.....	13	38	50	22	18	3	6	9	2	35
Warren.....	21	58	43	18	6	2	3	7	1	49
Total.....	427	1,355	893	571	272	118	109	7	7	.....

Only about one-ninth of all the teachers of the State have a teaching experience limited to one year. About three per cent. of them have taught more than twenty-five years; about six per cent. more than twenty years; about thirteen per cent. more than fifteen years; about twenty-nine per cent. more than ten years, and about fifty-two per cent. more than five years. In none of the counties is the average experience of their teachers less than five years. The highest average is in Camden, ten years and one month; the next highest are in Union, Bergen and Essex. The lowest averages are reported from Atlantic and Ocean counties.

The average for the entire State is a month higher than last year. There is reported a smaller number of one-year teachers; twenty-three more who have taught twenty-five years; twenty-four more who have taught fifteen years; thirty-six more who have taught five years, and fifty more who have taught from one to five years.

The same statistics for the cities are presented as follows:

CITIES.	Number who have been teaching one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average time.		Longest time by any one teacher, in years.
								Years.	Months.

Orange.....	2	10	9	5	4	1	1	9	.....	28
Passaic.....	1	11	6	4	2	.....	1	7	3	28
Paterson.....	13	67	34	26	13	4	5	8	.....	40
Perth Amboy.....	2	3	2	3	.....	.....	.....	6	1	12
Phillipsburg.....	4	14	9	2	4	.....	1	7	.....	28
Plainfield.....	3	5	9	4	4	.....	.....	8	4	20
Rahway.....	1	5	6	4	4	1	.....	10	4	25
Salem.....	1	7	8	2	.....	.....	1	8	6	28
Trenton.....	5	21	16	18	10	3	5	10	1	33
Total.....	131	488	400	296	151	52	55	9	.....	.....

The average for all the cities is nine years, while last year it was eight years and eight months. Only four cities last year reported an average experience of more than ten years, while this year six cities exceed that term, Bridgeton, New Brunswick and Rahway being added to the list. Salem, which last year reported an average experience of eleven years and one month, this year reports an average of eight years and six months.

In the cities seven per cent. of the teachers have an experience of more than twenty years; eighteen per cent. more than fifteen years; thirty-five per cent. more than ten years, and sixty per cent. more than five years. Less than twelve per cent. have a teaching experience of one year or less.

#### REGULARITY AND PUNCTUALITY OF ATTENDANCE.

In the attendance of pupils enrolled there has been a noteworthy improvement in twelve counties, while three show the same percentage as last year and six counties report a very small decrease. In punctuality the record is not so high as last year, but is better than in previous years.

In the following table the average enrollment, attendance and cases of punctuality are given for each county:

## COUNTIES.

	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Percentage of daily attendance.
Atlantic.....	41	34	1.82	.76
Bergen.....	43	34	1.03	.79
Burlington.....	39	29	1.89	.79
Camden.....	51	36	2.51	.73
Cape May.....	36	29	2.34	.69
Cumberland.....	42	34	2.09	.79
Essex.....	44	39	2.70	.88
Gloucester.....	39	30	2.47	.76
Hudson.....	46	40	.94	.82
Hunterdon.....	42	30	1.94	.71
Mercer.....	37	29	1.64	.74
Middlesex.....	44	38	.88	.82
Monmouth.....	49	34	2.22	.66
Morris.....	48	40	1.32	.81
Ocean.....	52	34	1.93	.69
Passaic.....	43	38	1.46	.83
Salem.....	40	32	5.41	.76
Somerset.....	40	30	1.80	.72
Sussex.....	30	23	1.61	.74
Union.....	47	44	1.63	.85
Warren.....	71	33	1.41	.77
Total.....	44	34	1.86	.77

The best attendance is in Essex, the percentage being .88. The other counties that report an average attendance of more than eighty per cent. of pupils enrolled are Union, .85; Passaic, .83; Hudson and Middlesex, .82, and Morris, .81. The average attendance is lowest in Monmouth, .66. Cape May and Ocean report an attendance of .69, and all the other counties are above .70.

In the following table are presented the same statistics for the cities:

CITIES.				
	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Percentage of daily attendances upon average attendance.
Atlantic City.....	48	40	1.72	.83
Bridgeton.....	46	40	.77	.85
Camden.....	49	37	1.85	.77
Elizabeth.....	53	49	.64	.94
Gloucester City.....	68	45	3.60	.68
Hoboken.....	42	37	.95	.85
Jersey City.....	53	48	1.03	.90
Millville.....	39	31	2.89	.75
Morristown.....	54	50	1.14	.90
Newark.....	49	44	.11	.89
New Brunswick.....	45	44	.04	.88
Orange.....	40	36	.92	.91
Passaic.....	43	35	1.16	.84
Paterson.....	45	41	.43	.90
Perth Amboy.....	45	41	1.35	.82
Phillipsburg.....	102	34	1.06	.76
Plainfield.....	47	40	2.80	.85
Rahway.....	56	50	2.00	.82
Salem.....	38	30	9.29	.77
Trenton.....	40	34	1.24	.81
Total.....	50	41	1.75	.84

Comparing these items with those reported last year, we find an increase of two in the enrollment in each room, a decrease of one per cent. in attendance, and a slight increase in tardiness. Elizabeth has the best attendance, it being in that city ninety-four per cent. of the enrollment. The other cities having an average attendance of more than eighty per cent. are Orange, .91; Jersey City, .90; Morristown, .90; Paterson, .90; Newark, .89; New Brunswick, .88; Bridgeton, .85; Hoboken, .85; Plainfield, .85; Passaic, .84; Atlantic City, .83; Perth Amboy, .82; Rahway, .82; Trenton, .81. The lowest percentage of attendance is in Gloucester City, .68.

#### OVERCROWDED SCHOOL-ROOMS.

In some of our cities, and in a large number of districts in which the schools are ungraded, so many pupils are crowded into a single room, in charge of a single teacher, that good work, or even fair work, is impossible. In the overcrowding of a school-room there is a limit beyond which we cannot go without injury to the children, and I am convinced that there are many school-rooms in the State where more harm is being done to the intellectual as well as the physical activities of the pupils than can be compensated for by the little correct teaching that is possible under the conditions. Most of this overcrowding is in the primary departments, where there should be the least. It is

in the primary department where children acquire their habits of observation and reasoning, which often cling to them through life, and mistakes made here are not easily remedied in the higher departments. In the matter of health, the younger the child the more sensitive it is to unfavorable conditions, and no little one can pass four or five hours of every school day in an overcrowded, badly-heated and badly-ventilated room without great injury to its health.

The cities in which there are rooms having more than eighty scholars under a single teacher are as follows :

CITIES.	Number of rooms having from 80 to 90 children.	Number of rooms having from 90 to 100 children.	Number of rooms having from 100 to 110 children.	Number of rooms having from 110 to 120 children.	Number of rooms having more than 120 children.

<b>Total.....</b>	<b>32</b>	<b>18</b>	<b>14</b>	<b>6</b>	<b>11</b>

Eighty is by no means the lowest limit to the number of children who can safely be placed in one room or successfully taught by one teacher; it is selected here to show the most flagrant cases of overcrowding. These rooms are all in the lowest classes of the primary departments and, in most cases, are placed under the charge of the least experienced teachers. The most expert teacher would find it a difficult task, in any of these rooms, to accomplish any of the results that our schools are intended to accomplish, and the ablest expert in the care and culture of the physique could hardly hope to protect the children from injury. It is gratifying, however, to be able to report a decrease in the number of such rooms. Last year there were one hundred and five; this year there are but seventy-three reported.

In the following table is given the number of schools having eighty or more pupils in charge of one teacher in each county, excluding the cities :

COUNTIES.	Number of district.	Grade.	Average number enrolled.

.....	32	Primary	113

Here, also, we are glad to note a slight improvement. The number of such rooms reported was fifty-seven; this year it is four less. There are nine more having from eighty to ninety pupils, but the number of those having a larger number enrolled is reduced about one-half. Gloucester, Passaic, Sussex and Union disappear from the list, and the number of crowded rooms has been reduced in Hudson, Middlesex, Ocean, Somerset and Warren, and increased in Essex, Hunterdon, Monmouth and Morris.

## CONDITION OF THE SCHOOLS.

In order more clearly to present their condition and to make comparisons year by year, the schools of each county are divided into five grades: first, as to the extent to which blackboards are used; second, as to the degree of excellence in recitations; third, as to the degree of order maintained; fourth, as to cleanliness of the school-room, and, fifth, as to the general character of the school, considering all of its features and conditions. These tables are given as follows, the first grade in each table being the highest:

## THE USE OF BLACKBOARDS IN COUNTIES.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	33	39	8	3	.....
Bergen.....	61	63	.....	.....	.....
Burlington.....	54	129	2	.....	.....
Camden.....	119	68	13	.....	.....
Cape May.....	6	20	11	5	.....
Cumberland.....	66	73	18	4	1
Essex.....	328	192	18	1	1
Gloucester.....	33	62	9	.....	.....
Hudson.....	420	97	24	18	.....
Hunterdon.....	57	47	40	.....	.....
Mercer.....	97	73	1	.....	.....
Middlesex.....	105	43	12	.....	.....
Monmouth.....	57	79	60	3	.....
Morris.....	38	76	38	3	.....
Ocean.....	5	39	12	2	1
Passaic.....	125	91	9	1	.....
Salem.....	36	45	20	.....	.....
Somerset.....	60	39	5	4	1
Sussex.....	4	26	86	5	.....
Union.....	71	74	4	1	.....
Warren.....	73	56	20	2	.....
Total.....	1,848	1,431	410	52	4

Comparing with last year, we have twenty-four less schools of the first grade, two hundred and thirty-seven more of the second grade, sixty-six less of the third grade, twenty-two less of the fourth grade, and three less of the fifth grade. A slight improvement is shown in nearly all of the counties.

## THE USE OF BLACKBOARDS IN CITIES.

CITIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic City.....		13	3	3	
Bridgeton.....	10	13	5	1	
Camden.....	75	47	6		
Elizabeth.....	9	45			
Gloucester City.....	2	5	5		
Hoboken.....	105				
Jersey City.....	240	77	16	17	
Millville.....	9	19	8	1	
Morristown.....	18				
Newark.....	206	144	15	1	1
New Brunswick.....	24	18	5		
Orange.....	16	16			
Passaic.....	5	18	2		
Paterson.....	121	34	6	1	
Perth Amboy.....	7	1	2		
Phillipsburg.....	34				
Plainfield.....	24	1			
Rahway.....	3	16	3		
Salem.....	13	5			
Trenton.....	77	1			
Total.....	993	471	79	24	1

The above does not compare favorably with the table presented last year. While we have but little change in the number of schools of the three lowest grades, we have twenty-seven less of the first grade and one hundred and one more of the second grade.

## EXCELLENCE OF RECITATIONS IN COUNTIES.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	23	51	9		
Bergen.....	95	29			
Burlington.....	24	145	15		1
Camden.....	77	99	23	1	
Cape May.....		14	26	2	
Cumberland.....	49	72	32	8	1
Essex.....	117	366	51	6	
Gloucester.....		95	8		
Hudson.....	292	220	37	9	1
Hunterdon.....	57	47	40		
Mercer.....	67	92	12		
Middlesex.....	38	101	21		
Monmouth.....	53	118	28		
Morris.....	72	75	7	1	
Ocean.....	2	42	12	2	1
Passaic.....	14	162	48	2	
Salem.....	48	43	5		
Somerset.....	47	50	10	2	
Sussex.....	21	38	61	1	
Union.....	54	80	14	2	
Warren.....	104	45	2		
Total.....	1,234	1,990	461	36	4

As compared with last year this table shows a decided improvement. We have eighty-six more schools of the first grade, one hundred and fifty-one more of the second grade, ninety-six less of the third grade, fifteen less of the fourth grade, and the fifth grade almost disappears.

## EXCELLENCE OF RECITATIONS IN CITIES.

CITIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic City.....	.....	2	14	3	.....
Bridgeton.....	5	10	8	6	.....
Camden.....	54	51	22	1	.....
Elizabeth.....	16	30	8	.....	.....
Gloucester City.....	.....	11	.....	.....	.....
Hoboken.....	75	30	.....	.....	.....
Jersey City.....	171	141	29	8	1
Millville.....	12	14	10	1	.....
Morristown.....	4	11	3	.....	.....
Newark.....	108	205	48	6	.....
New Brunswick.....	4	26	17	.....	.....
Orange.....	9	23	.....	.....	.....
Passaic.....	.....	25	.....	.....	.....
Paterson.....	11	106	43	2	.....
Perth Amboy.....	8	2	.....	.....	.....
Phillipsburg.....	34	.....	.....	.....	.....
Plainfield.....	.....	22	3	.....	.....
Rahway.....	3	17	1	.....	.....
Salem.....	14	7	.....	.....	.....
Trenton.....	22	53	3	.....	.....
Total.....	550	786	209	27	1

The same improvement is not noticed here as in the county schools. The totals show a slight increase in the third and fourth grades, and an increase of seventy-five in the second.

## GOOD ORDER IN COUNTIES.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	30	32	17	2	2
Bergen.....	81	35	7	1	.....
Burlington.....	168	15	1	1	.....
Camden.....	120	66	12	2	.....
Cape May.....	3	23	16	.....	.....
Cumberland.....	77	55	21	8	1
Essex.....	303	181	41	13	2
Gloucester.....	80	15	6	1	2
Hudson.....	382	123	37	12	5
Hunterdon.....	57	47	40	.....	.....
Mercer.....	157	10	2	2	.....
Middlesex.....	108	45	6	.....	.....
Monmouth.....	75	109	15	.....	.....
Morris.....	116	37	2	.....	.....
Ocean.....	3	3	3	1	1
Passaic.....	51	140	32	3	.....
Salem.....	82	12	6	1	.....
Somerset.....	72	32	1	2	2
Sussex.....	92	25	3	4	1
Union.....	77	51	17	.....	.....
Warren.....	75	52	21	1	2
Total.....	2,209	1,144	319	54	19

In the matter of good order the improvement is very encouraging. We note an increase of one hundred and nineteen in the first grade and of nineteen in the second, while the number of fifth grade schools is still further diminished.

## GOOD ORDER IN CITIES.

CITIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic City.....	1	7	9	2	.....
Bridgeton.....	11	3	10	5	.....
Camden.....	72	42	12	2	.....
Elizabeth.....	23	23	8	.....	.....
Gloucester City.....	.....	11	.....	.....	.....
Hoboken.....	105	99	29	11	3
Jersey City.....	208	99	29	11	3
Millville.....	16	15	5	1	.....
Morristown.....	14	4	.....	.....	.....
Newark.....	194	126	32	13	2
New Brunswick.....	25	20	2	.....	.....
Orange.....	23	8	1	.....	.....
Passaic.....	11	14	.....	.....	.....
Paterson.....	47	82	30	3	.....
Perth Amboy.....	8	1	1	.....	.....
Phillipsburg.....	34	.....	.....	.....	.....
Plainfield.....	21	3	.....	1	.....
Rahway.....	6	10	4	1	.....
Salem.....	18	2	1	.....	.....
Trenton.....	71	4	1	2	.....
Total.....	908	474	145	41	5

The same degree of improvement is observable in the cities as in the schools outside of the cities. The number of the first grade is increased by fifty-three. The number of the third grade is still much too large.

## CLEANLINESS IN COUNTIES.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	32	46	5		
Bergen.....	109	13	2		
Burlington.....	176	6	1		
Camden.....	182	16	2	1	1
Cape May.....	11	17	13	1	
Cumberland.....	87	55	17	3	
Essex.....	389	116	25	7	
Gloucester.....	84	15	5		
Hudson.....	454	82	20	2	1
Hunterdon.....	57	47	40		
Mercer.....	158	9	4		
Middlesex.....	112	42	6		
Monmouth.....	108	82	9		
Morris.....	143	12			
Ocean.....	4	38	14	2	1
Passaic.....	77	143	6		
Salem.....	96	6			
Somerset.....	68	37	4		
Sussex.....	95	20	7		1
Union.....	106	39	4	1	
Warren.....	103	33	12	3	
Total.....	2,648	874	199	20	4

In this important matter of cleanliness, our report, as compared with that of last year, is very gratifying, and the more so because the improvement has been noticeable from year to year for a series of years. When we consider the many unfavorable conditions and surroundings of many of our school-houses, that nearly three-fifths of them are kept in a condition of cleanliness that is satisfactory to our careful and exacting superintendents is creditable alike to teachers and school officers.

## CLEANLINESS IN CITIES.

CITIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic City.....	1	18			
Bridgeton.....	12	5			
Camden.....	111	15	6	3	
Elizabeth.....	23	30	1		
Gloucester City.....	11				
Hoboken.....	103	2			
Jersey City.....	276	59	12	2	1
Millville.....	23	12	2		
Morristown.....	18				
Newark.....	256	80	24	7	
New Brunswick.....	26	19	2		
Orange.....	28	4			
Passaic.....	15	10			
Paterson.....	73	85			
Perth Amboy.....	9	1			
Phillipsburg.....	34				
Plainfield.....	24			1	
Rahway.....	16	5			
Salem.....	21				
Trenton.....	73	5			
Total.....	1,153	350	56	13	1

This table shows an increase of fifty-seven in the first grade and a slight decrease in all of the other grades.

## GENERAL CONDITIONS IN COUNTIES.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	23	45	14	1	
Bergen.....	83	32	9		
Burlington.....	9	14	128	26	8
Camden.....	91	102	7		
Cape May.....	5	17	17	3	
Cumberland.....	60	69	23	10	
Essex.....	278	208	50	3	1
Gloucester.....	8	11	54	16	15
Hudson.....	379	133	32	15	
Hunterdon.....	57	47	40		
Mercer.....	114	50	7		
Middlesex.....	33	36	71	20	
Monmouth.....	76	104	18	1	
Morris.....	26	32	86	11	
Ocean.....	2	36	18	2	1
Passaic.....	26	171	26	3	
Salem.....	34	44	20	3	
Somerset.....	48	48	11	2	
Sussex.....	30	12	71	7	1
Union.....	89	44	13	4	
Warren.....	64	62	23	2	
Total.....	1,535	1,317	738	129	26

In the grading in this and the following table, all of the foregoing conditions are taken into account. In comparison with last year, the showing is a very good one. The first grade schools are increased by one hundred and thirty-six and the second grade by sixty-nine, while there is a decrease of sixty-six in the third grade and seventeen in the fourth grade.

## GENERAL CONDITIONS IN CITIES.

CITIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic City.....	1	7	11		
Bridgeton.....	5	8	10	6	
Camden.....	50	71	7		
Elizabeth.....	18	27	9		
Gloucester City.....		11			
Hoboken.....	105				
Jersey City.....	213	105	21	11	
Millville.....	12	19	5	1	
Morristown.....	14	4			
Newark.....	175	158	30	3	1
New Brunswick.....	21	22	4		
Orange.....	28		4		
Passaic.....		24	1		
Paterson.....	26	110	23	3	
Perth Amboy.....	8	1	1		
Phillipsburg.....	34	3		1	
Plainfield.....	21				
Rahway.....	21				
Salem.....	13	5	3		
Trenton.....	70	5	3		
Total.....	835	580	132	25	1

Here there is shown the same noteworthy improvement as in the county schools. The number of schools classed as first grade is increased by thirty-seven, and the number of second grade by eighteen.

There is no attempt made here to compare the schools of one county or city with those of another county or city in any of the above conditions, because the standards of the several local superintendents cannot be alike. It is only when the reports are made by the same superintendent for a series of years that they can be of value, and then only for comparison with similar reports made by the same officer.

These conditions were not selected because they are all that are essential, but because they are easily ascertained, and improvement was especially desired in these respects.

## AGES OF SCHOOL CHILDREN.

In table XIII. is given the number of children of each year of their school age enrolled in the schools of the several cities, and table

XIV. shows the percentage of each age. The figures in the latter do not vary materially from those given in a similar table last year; the only changes in the averages for all the cities being an increase of one per cent. in the proportion of children between six and seven years of age, and a decrease of one per cent. in the proportion between nine and ten years of age. The largest percentage of children enrolled between the ages of five and six years is fourteen per cent., reported by Passaic. Fifty-one per cent. of all the children enrolled are under ten years of age, and five per cent. are over fifteen.

## EVENING SCHOOLS.

Evening schools were opened during the past winter in seven cities. The following table presents the statistics reported concerning them :

CITIES.	Number of evening schools have been kept open.	Number enrolled.	Average evening attendance.	Number of teachers.	Average salary per week to teachers.	Total appropriation for evening schools.
Camden .....	52	559	294	10	\$9 44	\$1,250 00
Gloucester City.....	30	260	133	3	9 53	500 00
Hoboken.....	67	455	172	8	7 50	600 00
Millville.....	60	430	250	17	4 00	1,000 00
Newark.....	100	2,641	1,334	54	9 56	9,143 00
Paterson.....	49	2,796	1,079	51	4 00	2,964 75
Salem.....	60	65	35	2	10 00	120 00
Total.....	468	7,206	5,302	145	\$7 72	\$15,577 75

The list of cities is smaller by two than last year, these two being Elizabeth and Trenton. In the other cities, with the exception of Millville, the enrollment was much larger than in the previous year, and the pupils were much more regular in their attendance. In the previous year the average attendance was less than one-half of the number enrolled; this year the average attendance was nearly three-fourths of the number enrolled.

# REPORT OF SUPERINTENDENT.

49

## APPORTIONMENT OF THE RESERVE FUND FOR THE YEAR 1885-6.

COUNTIES.	Amount of tax.	Amount received from \$100,000.	Amount of surplus revenue.	Amount paid to reserve fund.	Amount received from reserve fund.	Total amount received.	Amount out.	Amount in. Total.....	\$1,424,214 00	\$100,000 00	\$32,551 31	\$142,424 40	\$142,424 40	\$1,556,795 31	\$37,025 00	\$37,025 00	.....	.....	636	127	.....	.....

The school census of 1884 was three hundred and fifty-six thousand and sixty-one, an increase over the previous year of six thousand eight hundred and nineteen. The school tax, based upon that census, is \$1,424,244, or \$27,276 more than that of the previous year. The ratables of the State are \$554,828,114.34, and the rate of school tax .00256+.

Ninety per cent. of the State school tax raised by each county is appropriated directly to said county, and ten per cent., which is known as the "reserve fund," is apportioned among the several counties by the State Board of Education. In apportioning the reserve fund, regard is had for the school necessities of the counties, that the *per capita* appropriation shall be sufficient to carry out the intention of the law as to the maintenance of free schools, and also to the rights of counties, that none may be compelled to contribute an unjust amount to aid other counties. The counties that receive more than they pay are termed "receiving counties;" those that receive just what they pay are termed "medium counties;" and those that contribute something to the necessities of other counties are called "paying counties." By the apportionment made in April last they are classed as follows, being arranged according to the amounts appropriated for each child:

## RECEIVING COUNTIES.

	Per Child.
Camden.....	\$3 23
Cumberland.....	3 30
Middlesex .....	3 40
Atlantic .....	3 60
Cape May.....	3 60
Hudson .....	3 68
Sussex .....	3 76
Ocean .....	3 78

## MEDIUM COUNTIES.

	Per Child.
Morris.....	\$3 65
Passaic.....	3 71
Bergen .....	3 94
Union .....	4 27
Warren.....	4 38
Burlington.....	4 57
Monmouth .....	4 65

## PAYING COUNTIES.

	Per Child.
Essex .....	\$4 95
Gloucester .....	4 95
Hunterdon.....	4 95
Mercer .....	4 95
Salem .....	4 95
Somerset .....	5 36

Last year there were ten receiving counties, three medium counties and eight paying counties. This year there are eight of the first, seven of the second and six of the third. The large percentages received by Atlantic and Ocean are due to the fact that those counties contain comparatively few *per capita* districts. Somerset contributes ten per cent., its entire proportion of the reserve fund, and Essex and Hunterdon respectively contribute eight per cent.

## TECHNICAL SCHOOLS.

The subject of industrial education is receiving much attention, and it is hoped that some form of manual education will soon be attached to our public school system in all of our larger cities.

In 1881, the Legislature enacted a law providing that whenever, in any city, town or township, there should be raised by subscription or otherwise, a sum not less than \$3,000, for the purpose of establishing a school or schools for industrial education, the State should appropriate an equal amount, and thereafter, in each year, the State should appropriate a sum equal to that raised by the locality, in that year, for the same purpose. It provided that each school so established should be under the supervision of a board of trustees, consisting of the Governor, two persons selected by the State Board of Education, two selected by the citizens or associations contributing, two by the local board of education, and one by the common council or other local governing body.

As yet, but one school has been established under this act, that in the city of Newark. The trustees are: Governor Leon Abbett, president (*ex-officio*); Edward Goeller, vice president; William N. Barringer, secretary; Augustus F. R. Martin, treasurer, and Edward Weston, George H. Phillips, Moses Bigelow and James F. Connelly. The director is Charles A. Colton.

## NEWARK TECHNICAL SCHOOL.

No official report has yet been made by the trustees, but the following extracts are taken from a circular issued at the beginning of the present year :

"It is not expected that the students will become experts in any of the branches taught; but if at the end of the course they shall have been trained to better habits of thinking, closer methods of observation and a greater ambition to excel in the various employments in which they are engaged, having thus developed into workmen of greater skill, the friends of the school will have accomplished the object designed in its establishment.

"Applicants must not be less than sixteen years of age, and must be residents of Newark; of good moral character, and well grounded in the studies of a grammar school education, viz : spelling, reading, writing, grammar, geography, arithmetic and history of the United States. Certificates of graduation from any grammar school in Newark will be accepted as the requisite qualification for admission. Applicants who have not graduated at a grammar school must pass an examination equivalent to the above.

"The course of study will require three years, or possibly four, a school year lasting six months, viz : from October to the following April, or longer if deemed advisable.

"By permission of the trustees, students not desiring to take the full course may take a special course in any of the branches taught.

"The sessions of the school will be five evenings in the week, viz. : from Monday to Friday inclusive.

"The hours of each session will be from 7:20 to 9:30.

"The first full course will begin about February 9th, 1885.

"The studies will include algebra, geometry, trigonometry, descriptive geometry, physics, chemistry—theoretical, descriptive and applied—and free-hand and mechanical drawing.

"A well-equipped room for drawing will furnish ample opportunity for practice in this branch.

"The best models will be used that can be procured, and special attention given to the training of students so that they may give a proper representation of an object on paper, and prepare themselves for draughtsmen.

"The department of chemistry and physics will be well supplied with the necessary apparatus.

"Special instruction will be given in the nature, care and proper use of tools.

"Tuition will be free.

"Students must provide themselves with text-books and drawing materials.

"The following text-books will be used: Wells' Algebra, Davies' Legendre's Geometry, Church's Descriptive Geometry, Elliot & Storer's Chemistry, Gage's Elements of Physics."

The following statistics have also been furnished:

"Number of applicants for Newark Technical School, February 9th, 1885 .....	156
"Number of applicants admitted.....	106
"Number of students on the roll, February 23d.....	96

"*Occupations Represented.*—Machinists, 39; clerks, 20; book-keepers, 5; carpenters, 3; painters, 3; draughtsmen, 3; electricians, 3; plumbers, 2; printer, 1; engraver, 1; locksmith, 1; grocer, 1; janitor, 1; harness-maker, 1; pattern-maker, 1; jeweler, 1; tinsmith, 1; dyer, 1; out of business, 8; total, 96.

" Oldest student, 42.

" Eight of the students are married."

## THE MONTCLAIR TECHNICAL SCHOOL.

Though not established under the act of 1881, a technical school has been in operation for three years in Montclair, directly attached to the public school and under the supervision of the district board of trustees. A committee was appointed in May, 1881, to investigate the subject, but it was not until May, 1882, that the voters, in school meeting, decided that "it is the opinion of the people of this school district that the pupils in the grammar schools, from twelve to fourteen years of age, be given opportunity learn the proper use of wood-working tools under a competent instructor, and that a change in the studies and recitations of such pupils as elect to do this work be made, so as not to interfere with the regular studies of the school."

During the summer vacation, a room in the school-house was fitted up with plain benches and tools, and a special teacher was engaged. Work was begun in this room in October with a class of about fifty boys, taken from the higher grammar classes. While the boys were in the workshop, the girls of the same classes were given lessons in needlework, etc. In February, 1884, the instructor, Mr. John V. Shaw, reported to the trustees:

" We have now in the technical school four classes, each receiving two lessons of one hour per week. Two of the classes are learning the use of carpenters' tools, the others taking rudimentary lessons in carving. The average attendance in the carpentry classes is eighteen and twenty, respectively; that in the carving, sixteen. The plan of instruction is the same as that of last year, and is substantially as follows: In the first lesson the pupils were taught the names of the various tools, and their uses explained. In the second, the class was supplied with blocks, which were spaced off, and practice given in striking straight blows with the hammer. In the several succeeding lessons, practice was had in driving nails, and in the use of planes and saws, in accurate boring with brace and bit, also in lining with chalk-line, and in the uses of gauges, mallet, and chisels; then followed planing to gauge mark and planing boards out of "wind," practicing in tool sharpening, &c. These exercises occupied the lessons to the sixteenth, inclusive, after which pupils were given practice in mak-

ing mortises and tenons, and then taught to make a frame with halved corners. This was followed by instruction in the manner of making dove-tails; also, in making frames with mitered joints, in the construction of which no miter box was allowed, the miters being struck out by measure. They were next instructed (drawing on black-board) in the manner of laying out and constructing a box with corners dove-tailed together. Then came practice in making frames with locked joints, or with corners halved, and the ends of wood projecting. We are now engaged on the last frame in the course of lessons, the joints of which are to be mortised and tenoned together.

"In addition to this work, the carpentry classes have assisted me in constructing sixteen tool-boxes for the use of the carvers; they have also made six frames of a somewhat ornamental character, for mottoes, intended for the walls of the work-room. The work of the mottoes was done by the girls of the industrial classes.

"With regard to the conduct of the boys, it may be stated that we have no incorrigible ones, but some who require restraining influence, and who, after a short departure from strict discipline, can easily be brought again to perfect order. The percentage of boys who seem to have a natural aptitude for mechanical operations exceeds that of last year. We have some not over twelve years who show a proficiency beyond others of sixteen, and are giving evidence of superior ability. The ardor with which the boys continue to enter upon and pursue their studies is to me still a matter of surprise. With very few exceptions, there seems no diminution in their former eagerness to commence their work, or in their unwillingness to desist when the lesson-hour has expired. Some so love their work that they have requested me to let them practice a short time during the noon hour. A number have a fine artistic taste, and desire to produce beautiful objects. I have employed these in gilding the scroll and ornamental work on the motto frames, in which occupation they have been much interested, and I may say delighted. This artistic work has been done after the school hours, so as not to interfere with any of their studies."

In February, 1885, the instructor reported as follows:

"In carpentry, the work has been nearly the same as during the first six months of the preceding two years, namely, the first lesson was devoted to teaching the names and uses of tools; in the second, some practice was given in nail driving and striking straight with the hammer. In the remainder of the lessons, up to the present time, the boys have been employed in making the various joints used in carpentry, such as the mortised, halved, mitered, dove-tailed, &c., the joints forming the corners of frames. They are now about to commence a box nearly two feet long, the making of which they have looked forward to as something to be desired. In the carving classes, the pupils were for a time employed on straight-line carving. This work, although intended as an initiatory step in tool-handling, was put in the form of a panel. After some practice they were advanced and employed on designs with curved lines, forming scrolls and leaves. They are now engaged upon their fifth design, which is put in the form of a small 'wall pocket,' the upper portion showing a bunch of grapes with leaves, the lower a basket of fruit. I shall, during the remainder of the year, depart from the course pursued last year, when the work was all in form of panels, and let the pupils work on articles which may be in some degree useful, as brackets, picture frames, inkstands, &c. This, while it will afford equally good practice in tool-handling, will render the studies of the boys more interesting, and give a greater zest to their labors. With regard to the proficiency the boys have made in the carpentry classes, I think that it is about the same as during the first six months of last year. I find the same difference in their natural aptitude—some taking to the use of tools almost intuitively, others learning it with much difficulty. In the carving classes, the percentage of boys showing marked ability seems to be greater than that of last year; indeed, I have been somewhat surprised at the degree of skill some have exhibited during the comparatively short time they have been at work, and also at the unabated enthusiasm shown by the members of both the carpentry and carving classes. In the latter there are some of marked ability, showing a persistency,

skill and love for their work that is quite remarkable in such young persons. In some cases I have permitted them to work after hours, as they seemed to have a strong desire to pursue their studies."

It is the conclusive testimony of the instructor and trustees of the Montclair school that the industrial work of the pupils has not interfered with their regular class-work or impeded their progress in their regular studies.

#### THE STATE COLLEGE.

Though the State College is not supported by the moneys annually appropriated for the support of the public schools, it has a place in the comprehensive system of public instruction which the State has established. It is intended to supplement the work done in the district schools by giving an extended course of training and instruction to young men who desire to fit themselves for usefulness in developing the material resources of the State, by the practical applications of science to agriculture and the mechanic arts. This State College is the scientific department of Rutgers College. During the twenty years of its existence it has been closely and helpfully identified with the development of the material interests and the industries of our State. Under the direction of members of its faculty, the State Geologic Survey and the Coast Survey in this State have been carried forward, while the work of the Agricultural Experiment Station of the State has been conducted in the college laboratories and on the college farm. The great value of these practical applications of science to the development of our resources has been evident to all who have watched their effects; and so thoroughly and efficiently has this work been done that commendation of its methods has come from all parts of the United States. Its value is too well known to our own people to need more than a passing notice here.

These results are evidence that the scientific work of the State College is under wise and competent direction.

The college is well equipped with excellent chemical laboratories, good collections for illustrating the natural sciences taught, good apparatus, a well-equipped astronomical observatory for use by the students, and well-selected libraries. It has a faculty of fourteen experienced instructors.

The portion of the public land of the United States which New Jersey received as a trust fund for this College could be received by the State only on condition that such a college should be organized and supported. The State simply acts as trustee in paying to the college annually the income from this fund. The trustees of the college have each year expended for the support of the scientific department a sum very much larger than that received from the State.

The institution is subject to the supervision of a Board of Visitors, two from each congressional district, nominated by the Governor and confirmed by the Senate. The Governor, the Chief Justice and the State Treasurer are *ex-officio* members of the Board of Trustees.

The State has the right to forty free scholarships in the college, and these are assigned to the various counties in proportion to their representation in the State Legislature.

Where the quota from a certain county is full, and still other students from the county desire scholarships, they are, with the consent of the Superintendent of a county where vacancies exist, assigned to such a county until its own students need the advantages of the course.

Thus the State offers a college course, with the most careful and complete training in scientific studies, free of all charge for tuition, to every intelligent and ambitious boy in the State who may wish to avail himself of it.

This fact should be made known in every school district. One of the best effects of higher institutions of learning is seen in the increased interest which the prospect of taking a higher course gives to the work of students in the lower schools.

For admission to the State College, applicants are examined in arithmetic, algebra to series, plane geometry, English grammar, geography (descriptive and physical), history of the United States, and the simplest elements of physics (natural philosophy) and chemistry.

These branches are taught in the public schools throughout our State. The requirements of the college authorities are based upon thoroughness in the work required rather than upon a large amount of work. The State College is not an experiment. Several hundred young men who have been wholly or in part trained at this institution are now filling positions of responsibility and usefulness in all parts of our State and in other States.

It wisely continues and supplements the school system of the State, and it is to be hoped that a constantly-increasing number of the young men of the State will each year avail themselves of its advantages.

#### THE NEW ORLEANS EXPOSITION.

To the World's Exposition, which was opened at New Orleans, December 16th, 1884, New Jersey sent a large educational exhibit, made up of contributions from every county. The specimens of pupils' work may be thus classified: Mathematics, grammar, composition, spelling, penmanship, drawing, map-drawing, primary work and miscellaneous work. Of these the several counties contributed as follows:

	Specimens-
Atlantic.....	925
Bergen.....	2,058
Burlington.....	1,810
Camden.....	1,215
Cape May.....	419
Cumberland.....	920
Essex.....	2,272
Gloucester.....	731
Hudson.....	2,648
Hunterdon.....	922
Mercer.....	1,332
Middlesex.....	845
Monmouth.....	1,898
Morris.....	1,194
Ocean.....	205
Passaic.....	2,514
Salem.....	1,135
Somerset.....	425
Sussex.....	975
Union.....	2,447
Warren.....	1,071

The State Normal School exhibited three hundred and ten of these specimens, and also botanical specimens and drawings, collections of minerals and chemical compounds, collections of insects, etc.

The Newark High School made also a special contribution of drawings, and District No. 36 of Essex county (East Orange), sent a handsome set of philosophical apparatus made by the pupils.

Kindergarten work was sent from Paterson and Summit, and a mineralogical collection from Jersey City. There were also contributed a set of geometrical forms, and wood ornaments and maps, made by the pupils of School No. 4, Paterson; a collection of marine algæ made by Supt. S. R. Morse, of Atlantic county; drawings and special work of students of Long Branch; and an herbarium, prepared by Mr. C. A. Gross, of Atlantic county. The exhibit also contained two hundred and eighty photographs of school houses.

The entire collection contained no less than twenty-nine thousand five hundred and sixty-nine specimens of pupils' work.

At the close of the Exposition the following awards were made:

#### DIPLOMAS OF HONOR.

State of New Jersey—Collective exhibit of works from three thousand four hundred and fifty public schools.

Jersey City Public Schools—Pupils' work.

Newark Public Schools—Pupils' work, scrap-books and drawings from High Schools.

New Jersey State Normal School—Pupils' work, herbaria, cases of minerals, chemicals, insects, &c.

Paterson Public Schools—Pupils' work, kindergarten work, ornaments and geometrical solids in wood.

#### DIPLOMAS.

Camden Public Schools—Pupils' work.

Davey's (Vernon L.) School, District No. 36, Essex county—Home-made philosophical apparatus.

Elizabeth Public Schools—Pupils' work.

Long Branch Public Schools (J. M. Green), District No. 85, Monmouth county—Pupils' work and photographs.

Landisville (C. A. Gross)—Herbarium.

Hasbrouck Institute, Jersey City—Students' work, framed drawings from casts.

Hoboken Public Schools—Pupils' work.

Morse, S. R., Atlantic county—Herbarium of marine algæ.

Orange Public Schools—Pupils' work.

Trenton Public Schools—Pupils' work.

#### CERTIFICATES OF MERIT.

Bridgeton Public Schools—Pupils' work.

Millville Public Schools—Pupils' work.

New Brunswick Public Schools—Pupils' work.

Plainfield Public Schools—Pupils' work.

Rahway Public Schools—Pupils' work.

Salem Public Schools—Pupils' work.

#### ARBOR DAY.

In accordance with a proclamation issued by the Governor, April 24th was observed as Arbor Day. Circulars of direction and suggestion were sent out from this office, and most of the County and City Superintendents prepared programmes. In many districts trees were planted and the day was made interesting and profitable by addresses, recitations and music. Arbor Day promises to be one of special interest to the children of the State, and of signal advantage to her future prosperity.

EDWIN O. CHAPMAN,

*State Superintendent of Public Instruction.*

---

# STATISTICAL TABLES

# REPORTS OF COUNTY SUPERINTENDENTS.

---

## ATLANTIC COUNTY.

S. R. MORSE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I have the honor to present my eighth annual report of the progress and condition of the public schools of Atlantic county.

SCHOOL CENSUS.—The number of children in the school census of 1884 was five thousand four hundred and thirty-two; for 1885, it is five thousand seven hundred and sixty-five, an increase of three hundred and thirty-three. The number registered in 1884 was four thousand two hundred and seventeen; for 1885, it is four thousand four hundred and two, an increase of one hundred and eighty-five. The average attendance of 1884 was two thousand three hundred and sixty-five; of 1885, it is two thousand four hundred and sixty-one, an increase of ninety-six. The average time the schools have been in session during the year is 8.835 months, an increase of .035 over the previous year.

SALARIES.—The average salary per month for male teachers has been \$56.75, an increase over the previous year of \$4.75; for female teachers, \$37.77, an increase of \$1.39.

There have been employed eighty-two teachers; thirty male and fifty-two female.

There were twelve districts that received from State and county appropriations \$200, twenty districts that received \$350, and ten districts that received more than \$350.

SCHOOL-HOUSES.—District No. 2, Brigantine, has voted money to

erect a new school building. The house in No. 46 was destroyed by fire, during one of the great bush fires last summer, which we hope was a blessing in disguise, as the district has voted money to build a new one.

Needed repairs have been made in nearly every district. There are several new houses yet needed which we hope to report as built another year.

OFFICERS.—I wish to express my thanks for the hearty co-operation of trustees, collectors and others, who have given me most cordial support in my school work. It is a great satisfaction to have the appreciation of one's work-fellows.

VISITS.—I have made two hundred and forty-five school visits, and held the usual number of meetings of trustees and teachers. The office work is continually increasing.

There has been considerable work in settling disputed boundary lines. As soon as possible I shall have the boundaries of all districts printed in pamphlet form for the school officers. I have already made maps of the county, and also of the townships, with the boundaries of the districts on them, and given one to each township.

ARBOR DAY.—I was pleased with the great interest that all of the schools took in Arbor Day. Although the notice to me from the State Superintendent to arrange a programme for the day, came late, I had printed several selections for recitation, reading and singing and sent copies to every school in my county, requesting each teacher to make a report of the work done by his school. I received a report from nearly every teacher.

The reports showed that several hundred trees were planted, beside many shrubs and flowering plants. I am satisfied that much good will result from the exercises of this day. We expect to do more the coming year.

TEACHERS' ASSOCIATION.—The regular meetings of the Teachers' Association have been held during the year. Our best teachers are always to be found at these meetings. No Teachers' Institute was held during the year.

LIBRARIES.—Not so much interest has been taken in school libraries as in some past years. Yet several schools have made good additions to their libraries.

TRUSTEES.—During the last days of August, I held township meetings of trustees, with collectors present, to look over and compare their accounts, and collected their reports. In this way everything is kept straight, and much trouble avoided.

SCHOOLS—TEACHERS.—The work of the school year just closed has been the best we have had during my term of office. Although we have had many new teachers, the most of them were our own graduates, who understood the workings of our course of study and

knew just what to do. Our teachers as a whole are live, active, conscientious persons, willing to try any plan that seems most beneficial to the children under their charge. All have given me their hearty support, which has been a source of great pleasure to me.

ANNUAL EXAMINATION AND GRADUATION.—Our seventh annual examination of the pupils in our schools, was held in April, commencing Wednesday, the 8th, and closing Tuesday, the 15th. Commencing the examination in the middle of the week and finishing the middle of the following week, thereby giving the pupils the rest of Saturday and Sunday, breaks that continuous mental strain of which we have heard much complaint in conducting the examinations through a regular school week.

Each school in the county returned to me some work done by the pupils.

We have five grades of questions, graded from the lowest to the highest branches taught in our schools, by which we learn what work has been done during the year by all of the pupils.

Four pupils passed the examination in the advanced course and received Certificates of Honor, and eighteen pupils passed the regular examination for graduates and received Diplomas.

---

## BERGEN COUNTY.

JOHN A. DEMAREST, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

SIR—In obedience to law, I herewith respectfully submit my tenth annual report of the condition of the public schools in Bergen county, for the year ending August 31st, 1885.

The following is a summary of the resources and expenditures of the past year, viz. :

Balance due the districts September 1st, 1884.....	\$17,889 25
Amount received from the State.....	42,825 32
Amount received from the surplus revenue.....	1,795 08
Amount received from other sources.....	4,044 67
Amount collected for teachers' wages.....	23,950 00
Amount collected for incidentals, buildings, repairs, &c...	18,595 60
Total resources.....	<u>\$109,099 92</u>

## Amount expended :

For teachers' wages.....	\$65,765 66
For fuel.....	3,146 59
For incidentals.....	11,146 95
For buildings, repairs, &c.....	11,831 66
	<u>91,890 86</u>
Total balance now due the districts.....	<u>\$17,209 06</u>

This is a reserve fund mostly from district tax, kept to supply the needs of our schools until the State moneys become due.

Number of districts which ordered a district tax for salaries, incidentals, buildings, repairs, &c.....	45
Number of districts which ordered a district tax for repairs, &c., only.....	7
Total number which ordered a district tax... ..	<u>52</u>

**SCHOOL CENSUS.**—The whole number of children in the county between the ages of five and eighteen years is eleven thousand and thirty-eight. While several districts show a decrease through local causes, still the aggregate is one hundred and forty-seven more than the census of last year.

**TIME THE SCHOOLS WERE KEPT OPEN.**—The general time for the closing was June 26th, but some were open until July 3d, to make up days lost, as some of our trustees are very particular in auditing their accounts. Six were open 11 months, one 10.85 months, four 10.75 months, eight 10.5 months, one 10.45 months, five 10.25 months, one 10.15 months, one 10.2 months, thirty-one 10 months, one 9.25 months, seven 9 months and one 7.5 months. The latter one named found their building inadequate to the wants of their children, and hence rebuilt the same, which will explain the reason why it was not open the number of months the law requires. The

average number of months the schools have been open is 10.11 months, showing a decrease of .1 months as compared with the preceding year.

#### ATTENDANCE, &c.—

Number who attended 10 months or more.....	486
Number who attended 8 months, but less than 10.....	1,942
Number who attended 6 months, but less than 8.....	1,429
Number who attended 4 months, but less than 6.....	1,083
Number who attended less than 4 months.....	2,186
<hr/>	
Total enrollment in the public schools.....	7,126
Estimated number who have attended private schools.....	1,347
<hr/>	
Total attendance.....	8,473

TEACHERS EMPLOYED.—Forty-six male and seventy-eight female teachers have been employed in the county the past year, showing an increase of five over the previous year. The average salary paid males per month is \$70.60 and females \$38.07, being an increase of \$1.63 per month for males, and a decrease of \$1.31 for females.

The following shows the classification of their certificates, viz. :

Males holding first grade State.....	10
Males holding second grade State.....	2
Females holding second grade State.....	10
Females holding third grade State.....	2
Males holding first grade county.....	20
Females holding first grade county.....	9
Males holding second grade county.....	10
Females holding second grade county.....	26
Males holding third grade county.....	4
Females holding third grade county.....	31
<hr/>	
Total.....	124

Twenty of the above are graduates of the New Jersey State Normal School, and twelve are undergraduates who have not completed the course.

SCHOOL LIBRARIES.—Since my last report, a library has been established in District No. 22. Districts Nos. 6, 12, 13, 15, 19, 35½, 36, 37, 45 and 57 have added to those established. Much of this money is now used to supply the school-rooms with needed apparatus.

**SCHOOL-HOUSES.**—No new school-houses have been completed, but several are now in the course of erection. Our people are alive to the necessity of good school-houses and are agitating the question wherever they are needed. One drawback is, "An act for building school-houses in townships," approved March eleventh, eighteen hundred and eighty, which should be repealed at the next meeting of the Legislature; or, if not repealed, it should be so modified that the voting for moneys for that purpose should be done according to the directions of the old law.

**DISTRICT BOUNDARIES.**—One new district was formed at Westwood, in June last, from District Nos. 21 and 22, and is now known as District No. 21 $\frac{1}{2}$ . While I have always opposed the formation of new districts, on the ground of *weakness*, still, this, from the position in which the people of Westwood were placed, was an exceptional case, and hence the application was granted.

**QUARTERLY EXAMINATIONS.**—Four examinations have been held during the year, on the days designated by the State Board. Seventeen males and sixty-eight females applied for certificates, but only fourteen males and fifty-three females passed the required examinations, and eighteen were rejected. The following certificates have been granted, viz.:

First grade granted to males.....	3
First grade granted to females.....	1
Second grade granted to males.....	6
Second grade granted to females.....	8
Third grade granted to males.....	5
Third grade granted to females.....	44
Total granted.....	67

**SCHOOL VISITATION.**—All the departments have been visited twice, and some a greater number of times. They are in excellent working condition, producing splendid results. I feel that too much praise cannot be bestowed upon both teachers and pupils for their earnestness and zeal. While I find many defects in our schools, in my opinion they will compare favorably with any in the State.

**ANNUAL EXAMINATION.**—Our fifth annual examination of the public schools commenced April 9th, and terminated on the afternoon of April 17th. Forty-two schools took part in the same, with the following result, viz.: Twenty-seven passed successfully in the fourteen subjects; one hundred and five in eight or more, but less than fourteen; one hundred and one in four or more, but less than eight, and seven in the Post-Graduate Course.

While I find a few who discourage county examinations, for rea-

sons best known to themselves, still, as a whole, they have worked wonders in our schools, infused pupils and teachers with new educational life, and elevated them to a standard which could not have been reached in any other way.

**COMMENCEMENT EXERCISES.**—The fifth annual exercises were held in the First Reformed Church, Hackensack, July 2d, at 1:30 P. M. Long before the hour of opening, the spacious building was filled to overflowing. The programme was a choice one, and the exercises were well received by the audience. Ex-Governor Rodman M. Price, the father of the New Jersey State Normal School, delivered an excellent address, after which the Diplomas were awarded to the successful pupils. The public press commended the whole affair in the highest terms, and it was generally conceded to be the best we have held in the county.

**TEACHERS' ASSOCIATION.**—This is still in active operation and largely attended. While all should avail themselves of this excellent opportunity to secure help, still there are those who never grace the meeting with their presence. It would be well, I think, if the State Board would pass a rule requiring every teacher to be present at all such meetings.

**ARBOR DAY** was generally observed among the schools. In the absence of a regular formulated programme, various exercises in keeping with the day were arranged by the teachers and thus it became one of interest and profit. It has been truthfully said that "Youth too often sow only where they can quickly reap, and a meagre crop in hand soon outweighs a golden harvest long in maturing." Hence, the necessity of teaching the lesson "To forecast the future is the condition of wisdom." If rightfully observed Arbor Day must teach this great truth, and be of great good to the rising generation.

**EXHIBITION WORK.**—Immediately on the receipt of notice from the State Department the teachers were called together and informed what was required from them. With a will they went to work and as a consequence a fair showing was soon collected. While some very fine work was sent to the New Orleans Exposition, still on account of the shortness of time we were compelled to take what was obtainable through daily work, and unable to send as fine specimens as we should have liked. However, we were gratified to learn that some of it was admired by our foreign neighbors, and through their request was presented to them.

**CONCLUSION.**—As we look back over the field for the last decade, many pleasant memories crowd upon us, which will be a source of pleasure as we quietly journey the pathway of life. Helping hands have been freely offered, cheering words spoken, and, I believe, heartfelt prayers presented for the success of the great work. Whether

we have reached this point we will leave a criticising public to decide; still, one thing cheers us, the marked contrast between the past and the present. But time has wrought changes and we are forced through circumstances to say "good bye." While we part with a consciousness of having performed our whole duty, still there are defects which we will kindly leave with our successor and prayerfully wish him a "god-speed."

---

## BURLINGTON COUNTY.

EDGAR HAAS, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

SIR—In compliance with the law, I herewith respectfully submit my tenth annual report of the condition of the public schools of Burlington county, for the year ending August 31st, 1885.

The finances for the coming year ending August 31st, 1886, are as follows:

Amount of interest from surplus revenue.....	\$1,363 92
Amount of interest from surplus revenue for the Batsto portion of Pleasant Mills district, of Atlantic county, containing thirty-one children.....	8 92
Amount from the State appropriation of the \$100,000...	4,252 66
Amount apportioned out of the reserve fund by the State Board of Education.....	6,488 80
Amount reserved by the county, being ninety per cent. of the State school tax.....	58,399 19
Total amount apportioned among all the districts of the county.....	73,504 57
Amount apportioned to each child from surplus revenue,	.287611

Amount apportioned to each child from the State appropriation of \$100,000.....	280351
Amount apportioned to each child from the reserve fund of ten per cent. of the State school tax.....	428529
Total amount apportioned to each child in those districts that have more than seventy-five children.....	4.613497
Amount of district school tax voted to be used for the payment of teachers' salaries.....	\$325 00
Amount of district school tax voted to be used for building, purchasing, hiring, repairing or furnishing public school-houses.....	11,205 64
Balance in the hands of the township collectors, exclusive of money for building and repairing purposes.....	18,515 52
Balance in the hands of the township collectors, to be used for building, repairing, &c.....	2,740 68
Total amount for teachers' salaries, fuel and incidentals..	92,845 09
Total amount for building, repairing, &c.....	13,946 32
Total amount for all school purposes.....	106,791 41
Number of districts having not more than seventy-five nor less than forty-five children, receiving each \$350 .....	39
Number of districts having less than forty-five children, receiving each \$200.....	11
Number of children in the county, according to the school census of 1884.....	15,142

The total amount for all school purposes for the coming year exceeds that of last year by \$3,476.39.

The average salary per month for male teachers is \$51.23, being \$1 less than that for the previous year; that for female teachers is \$33.65, being twenty-one cents less than that for the previous year.

The whole number of teachers employed is one hundred and eighty-seven, of which forty-one are males and one hundred and forty-six females.

The value of the school property in the county is \$232,950.

The school census is fifteen thousand five hundred and forty-three, being an increase of four hundred and one over that of the previous year; the number of children enrolled in the school register is ten thousand three hundred and sixteen, being 66.37 per cent. of the school census, and 2.37 per cent. less than that of the previous year; the number estimated as attending private school is one thousand nine hundred and sixty-six, being 12.65 per cent. of the census, and 1.59 per cent. more than that of the previous year; the number estimated as not attending any school is three thousand three hun-

dred and seventy-four, being 21.71 per cent. of the census. Seventy-three-hundredths of one per cent. is gained in the estimation of the last two items. The average number attending the schools during the year is five thousand one hundred and fifty-nine, being 50.01 per cent. of the enrollment, and 1.18 per cent. greater than that of the previous year.

The seating capacity of the school-houses is eleven thousand five hundred and twenty-nine, being 74.17 per cent. of the census, and 7.80 per cent. greater than that of the enrollment.

The average time for which the schools were kept open during the year is 9.3 months: one school was kept open eleven and a half months; two, for eleven months; forty-seven, for ten months and upward; forty-five, for nine months and upward; those in districts Nos. 84, 89, 92, 103 and 107 were kept open for eight months; the one No. 87, for eight and one-half months; the one in No. 76, for eight and three-tenths months; the one in No. 98, for seven and a half months; those in Nos. 100, 101 and 104, for seven months; those in Nos. 54 and 83, for six months; the one in No. 109, for five and eight-tenths months; and the one in No. 33, for five months. The schools in districts Nos. 54, 83, 84, 89, 92, 98, 100, 101, 103, 104 and 109 were closed for want of sufficient pupils to warrant the employment of the teacher for a longer time. Those in Nos. 76 and 87 were closed on account of sickness. And the one in No. 33 (colored), was closed for want of funds, it being a \$200 district.

The quarterly examinations of applicants for teachers' certificates were regularly held in Burlington, on the days directed by the State Board of Education. Thirty-five males and one hundred and fifty-five females applied for certificates; twenty-five males and ninety-three females passed the examination, and ten males and sixty-two females failed. The certificates granted, are as follows:

First grade to males.....	4
First grade to females.....	7
Second grade to males.....	1
Second grade to females.....	4
Third grade to males.....	20
Third grade to females.....	82
<hr/>	
Total.....	118

District No. 31, applied to the State for the first time for library aid during the year, making the whole number that have applied for it forty-four. Districts Nos. 15 and 29 are the only ones that made a re-application for it during the year.

Whole amount raised by the districts.....	\$1,630 88
Whole amount received from the State.....	1,330 00
Whole amount expended for apparatus.....	1,330 58
Number of books bought.....	2,217
Number of books on hand.....	1,809

On visiting District No. 110, on the eighteenth of December, I found that the trustees had completed their new school-house at a cost of about \$1,500. It is a good-sized, convenient and comfortable building, and a credit to the district, and too much cannot be said in praise of the trustees for their efforts in inducing their people to provide it. District No. 1 put in some new furniture in one of her departments. Districts Nos. 49 and 113 repaired their houses and put in new furniture. District No. 53 built a new house, but owing to the want of sufficient action by the district, the contractor would not give the trustees possession of it, and so they were compelled to open their school this fall in the old house, which is anything but comfortable and convenient. The majority of the legal voters in the district labor under the impression that the act to authorize the building of new school-houses in such townships as have township boards of education, approved April 20th, 1885, is applicable to their township, and that the township committee ought to provide their school-house. I am in hopes that they will soon see their error, when the district may make arrangements with the contractor for occupancy of the said new house by the school. District No. 57 built a new house at a cost of \$600. The small school-house in District No. 103 was destroyed by fire, and a new one costing some \$300 has been put in its place. By looking over the statistical report, you will see, as I reported before, that there are some other houses marked "very poor," that ought to be replaced with new ones.

Our eighth annual examination of the schools for Diplomas and Certificates of Distinguishment and Merit, commenced on the thirtieth of March, and continued until the ninth of April. The questions in the fifteen studies were prepared as those were for the previous year, that the pupils might have the use of the books in the examination. The grade of the questions was a little higher than that used and printed in the report last year. The whole number of pupils examined, is three hundred and seventy-six, fifty-six of whom, with an average age of sixteen years, successively passed the Diploma grade with an average standing of eighty-seven per cent.; one hundred and twenty-six with an average age of fourteen years, passed the Distinguishment grade with an average standing of eighty-two per cent.; one hundred and seventy with an average age of thirteen years, passed the Merit grade with an

average standing of eighty per cent.; and twenty-four in the various grades, with a standing of less than seventy per cent., were rejected.

The reason that the number passing this year is not so great as that of the year before, is because of the absence of the pupils through sickness and out-door employment about the time of examination. In general, the examination was very good, and even superior to that of the year before, and although the gain is but about five per cent., yet it shows, by reference to previous years, a steady and continuous increase in the intellectual standing of the schools examined.

This new method of examination is now no more, in our county, a mere experiment, but a well-tested and firmly-established system, giving better results than all the others that we have ever tried.

The number of pupils that are old enough to graduate and receive Diplomas this year is fifty-six.

Our eighth annual commencement of the public schools will be held on Saturday, November 21st, in the Opera House, Mt. Holly. That of the Class of 1884 was held at the same place on Saturday, November 16th. The building was filled with the parents and friends of the graduates. The exercises, consisting of music, recitations and essays, were opened with prayer by Rev. Dr. Smith, of Mount Holly. It is due to the graduates to say that their programme was well rendered and greatly appreciated. The salutatory with essay, "Common Sense," was given by Fannie T. Taylor, of Mount Holly, and the valedictory with essay, "Popular Education," by Samuel F. Clevenger, of Burlington. The young lady appointed to deliver the alumni address being absent, the Rev. Dr. Smith gave a brief but very suggestive address upon the subject, "Good School Buildings and Suitable Accommodations."

On April 10th, 1885, I received instructions from you to adopt some plan for the suitable observance of Arbor Day, twenty-fourth of April, in every school under my supervision. In accordance with these instructions, on the thirteenth of the month I issued a card to the teachers, suggesting that they should take the lead in the furtherance of the movement that I had started a year and a half before. In compliance, the teachers of sixty-seven school districts sought the influence of their representative men, in the matter, and with it they instituted such exercises in their schools as should tend to educate the children up to a proper appreciation of tree-planting for the best agricultural and other interests of the country.

Twenty-four districts had exercises only; forty-three districts had exercises and tree-planting. In ten of the districts the exact number of trees was not given; each planted "some," or "several." In the other thirty-three of the forty-three districts above named, were planted two hundred and forty-five trees. The planting was mostly upon the school grounds, for ornament and shade.

For a few years we have not had any Teachers' Institute, from the fact that we believe that we do much more in our Teachers' Associations, that meet every month, than we would do in an institute. In one of them, the Superintendent and a few of his superior teachers give instruction in the common branches most immediately needed in the schools. This last year it consisted of grammar, book-keeping, arithmetic, and the analysis of "Paradise Lost." In the other, where the instruction is of a higher grade, there was taught by the Superintendent, the subject "Definite Integrals," and so well did the work progress that a treatise upon the subject was wholly mastered. The next or coming year the Superintendent will teach in the one, "How to Teach," and in the other, "Analytical Mechanics as Treated by the Infinitesimal Calculus."

The good of our work in these associations is immediately seen in the results of our examinations of the schools, in the spring.

If it were possible for our associations to draw the \$100 that is allowed for an institute, we could make our work much more effective through the employment of greater means for our instructors.

There is one subject to which I wish to call your attention, and that is, the method of our examination of applicants for teachers' certificates. The examinations of to-day do not test the qualifications in any department of our schools.

In the higher departments of our graded schools, where nearly all of the children of the populous communities expect to finish their education, there is felt a great want in the ability of the teachers just below the principal, who has to supplement their work in his own room at the expense of the time that ought to be devoted to his own higher studies. In course of time this so lowers the grade of his department that those that would go higher leave the school with the fixed belief that nothing more can be done for them, which is true.

In the primary departments, teachers are employed that know little or nothing of the capacities of the child, of the consecutiveness of gradation adapted to the infant mind, or of the best methods of imparting instruction. Instead of prescribing a gradual increase of strength of diet for the mind, they spasmodically change from milk to meat, and meat to milk, and thus, through the demoralization, they disappoint the child that goes to school for the express purpose of surrendering himself to proper guidance for continuous increase of intellectual power and confidence. He feels it very soon, and for relief absents himself from school by truancy. This child is no more to be blamed for this than the student of the high department before spoken of, is for his withdrawal.

In the ungraded schools of the country where the pupils necessarily demand all grades of instruction from the same teacher, from

that of the primary to that of the high department, teachers are employed that can no more than pass the examination for a Third Grade Certificate. In a short time their schools are completely demoralized, and the most sanguine expectations of parents and guardians are disappointed.

All this state of things takes place in consequence of the misapplication of the system of examination to determine the fitness of the applicant for the position. No one would ever think of testing the necessary qualifications of an applicant for the pulpit by questioning him upon the principles of materia medica or jurisprudence, and yet this very thing takes place in our system of examination.

In examining for the primary department, the questions should be prepared with special reference to effective drill in the method of the gradual development suggested by mental philosophy; for the high department they should be as comprehensive and general as the subjects to be taught, and for the ungraded school they should be as special and particular as those for the primary and as comprehensive and general as those for the high department.

When such an examination is once passed and certified to, do not compel the applicant to submit periodically to the indignity of a re-examination, but let it stand for all time, so far as the ground is covered. This will give dignity to the calling and rank it on equality with the other professions.

During the year I made some three hundred and eighty school visits. All the schools were visited twice, with the exception of two or three which were closed at the time of my call. Some were visited three and four times.

The trustees were called together as usual, when boundary lines were considered, accounts settled, &c.

Thanks to all officers and teachers in official relations with me, for their efficient and hearty co-operation.

## CAMDEN COUNTY.

F. R. BRACE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

The annual report of the condition of the public schools in Camden county for the year ending August 31st, 1885, is herewith presented.

FINANCES.—The amount of district tax voted this year for all purposes is \$81,696.21, being \$8,280.04 less than last year. The amount of moneys from the State is \$63,891.98, an increase of \$1,734.45 over last year's amount. The county raises by district tax \$17,804.23 more than it receives from the State, and for the purpose of paying teachers' salaries it raises by district tax \$29,453.80, nearly one-half as much as the whole amount received from the State. The amount of the State school moneys per child, except in the \$350 and \$200 districts, is \$3.11, but taking the census of this year, which gives the number of children to be educated out of this fund, the amount will be only \$2.86. Taking last year's census, on which the apportionment of moneys was based, Camden city raises by district tax to pay teachers' salaries at the rate of \$1.69 per child; Gloucester City, \$0.56; Merchantville, \$2.05; Stockton township, \$1.22; Delaware, \$1.95; Haddon, \$3.15; Centre, \$0.81; Gloucester, \$1.38; Waterford, \$1.36; Winslow, \$0.03. From this it will be seen that all the large districts are required to raise very heavy district taxes to pay teachers' wages. Twenty-five districts are \$350 districts; three are \$200 districts, and fourteen receive the pro rata amount.

The average salary paid to male teachers is \$77.96, a decrease of \$1.90; to female teachers, \$39.25, a decrease of twenty-six cents. Outside of Camden and Gloucester Cities, the average salary paid to male teachers is \$44.29, an increase of \$5.68; to female teachers, \$37.17, a decrease of eighty-two cents.

SCHOOL-HOUSES.—The school-houses are in much the same condition as last year. Some repairs have been made in Nos. 5, 18, 21

and 32. In No. 5 the water-closets have been removed from the interior of the building and placed outside, and heaters placed in the cellar take the place of stoves in the school-rooms. The school-house in No. 18 has been repainted and the porch repaired. A much-needed porch has been added to the school-house in No. 21. A new roof has been put on the school-house in No. 32. A new building is in course of erection in the village of Pensauken, in District No. 3.

Much attention has been paid to the size of rooms in the construction of school-houses, so that there shall be furnished for each child at least one hundred and fifty cubic feet of air. That standard has been reached and exceeded in nearly all the buildings erected since 1870.

The only method of ventilation, except in a few instances, is by windows. In some of the buildings erected prior to 1876, the old method of ventilating through cold flues was tried, but it has proved an entire failure. The new school-house in Haddonfield and the upper room in Berlin school-house are ventilated by warm flues, and the ventilation is almost perfect.

Forty-two school-houses are constructed of wood, five of brick, one of stone, and one is a stone basement of a church.

The position of every school-house in the county is an eligible one. The yards of some have been beautified by nature with fine groves, as in Nos. 3, 4, 15, 27, 31, 35, 36, 38, 39, 40, 44. Groves adjoin some of the school-yards, as in Nos. 16, 20, 26, 34, 37, and some yards have several fine trees growing in them that afford a pleasant shade for the children, as in Nos. 6, 7, 9, 11, 13, 17, 19, 21, 24, 32, 41, so that twenty-seven districts are already provided with shade trees. Much, however, remains to be done in the way of making the yards neat and attractive.

ARBOR DAY was observed in a large number of the districts, but I fear that the drought of last summer caused many of the trees to perish. Reports of the exercises of Arbor Day have been received from eighteen districts.

SCHOOLS.—Our schools have maintained their former standing. Every passing year convinces me more and more of the necessity of a regular course of study for all the schools in the county. By no other method can the schools be kept up to the highest standard. While there are teachers who constantly aim to lead their pupils to higher grades of knowledge, there are others who are satisfied with the performance of a mere routine of duties. We cannot shut our eyes to this fact. It is in the department of teaching as it is in every other department of life's work; only the few reach the top. Were the course of study and the amount of work to be accomplished left to each teacher, there would be in some schools such a

condition of things as existed in the schools of this county in 1870, some of the teachers at that time devoting not more than thirty minutes of the entire day to Arithmetic, some of them ignoring Grammar in any form altogether, very few teaching United States History or Physiology. I do not mean to say that any course of study is perfect, but if it is made on correct principles, in accordance with the development of the mind, it is a very important, a very necessary, guide. Inasmuch as many of our teachers are young and inexperienced, it becomes even more needful. We have had our course of study now, fifteen years, and regular examinations in connection therewith, nine years.

At the last annual examination seventeen pupils passed the advanced grade, from twelve districts; thirty-five the first grade, from sixteen districts; eighty-three the second grade, from twenty-two districts, and one hundred and forty-four third-grade, from thirty-one districts.

TEACHERS' ASSOCIATION AND TEACHERS.—The Teachers' Association met regularly every two months during the year. Very valuable assistance was given by Mr. Fry, of Camden, in Natural Philosophy; Mr. A. Pressey, of Haddonfield, in Geometry, and Professor A. Ivins, of Philadelphia, in Arithmetic.

One hundred and fifteen applicants have been examined for licenses, twenty-nine males and eighty-six females. Forty-five, or thirty-nine per cent., received certificates, nine males and thirty-six females; and seventy, or sixty-one per cent., were rejected, twenty males and fifty females.

EXAMINERS.—Mr. C. S. Albertson, Principal of Greenland School, No. 15, has been appointed one of the Board of Examiners. Mrs. R. H. Strong continues to give her efficient aid.

LIBRARIES.—Some progress has been made in establishing libraries and placing proper apparatus in the schools. The best libraries are found in Nos. 16, 21, 26, 27 and 30. A very good beginning has been made in Nos. 7, 11, 12, 17, 18, 19, 34, 39 and 40.

CONCLUSION.—One hundred and ninety-eight visits have been made to school departments and fourteen meetings of township boards of trustees have been held. Numerous meetings of the patrons of the schools have been attended and addresses have been delivered.

## CAPE MAY COUNTY.

VINCENT O. MILLER, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

I herewith submit my annual report for the school year ending August 31st, 1885.

The census taken this spring shows the whole number of school children in the county to be two thousand eight hundred and fifty-six, a gain of one hundred and twenty-five over last year. The number enrolled in school registers during the year was two thousand two hundred and seventy-one, while twenty-nine are reported as attending private schools, and three hundred and thirty-eight as attending no school. About one-half the average number, six hundred and fifty-seven (657), attending during the year, were present between six and eight months, while a large proportion, eight hundred (800), attended less than four months. With two exceptions the schools have been open nine months, the average being 8.92 months.

The average salary paid to male teachers is \$47.88 per month, \$2.52 less than last year; the average salary paid female teachers is \$30.45, a gain of eighty cents over last year.

Upper and Dennis townships levy a tax equal to \$1.50 per pupil, in addition to the State tax; Cape May City appropriates \$1,800; while a majority of the schools in the other townships and boroughs levy a district school tax.

In a few districts the State or township school fund accumulates until there is a large surplus. These districts do not attract the best talent to their school-rooms, and suffer accordingly.

The buildings of five school districts are marked "poor" and four "very poor" in statistical report, their value ranging from \$250 to \$600.

A new district has been formed at Holly Beach, a seaside resort, and three thousand dollars (\$3,000) voted to build a school-house,

with five hundred (\$500) additional to carry on the school during the current year.

Work was furnished for the State School Exhibit at New Orleans in all the schools except two, and the promptness of teachers and pupils in this matter deserves special commendation.

Most of our schools have made marked progress during the year. With a single exception, all took part in the examination in March, and over three hundred and forty certificates of merit of the various grades were distributed.

Teachers' examinations have been regularly held. Messrs. Vanaman, Hand and Cole are on the Examining Board, and have shown themselves to be competent and impartial in their duties. Sixty applicants have been examined; forty-two were given certificates and eighteen were rejected. Messrs. D. C. Vanaman and H. W. Hand and Miss Anna C. Weatherly hold first grade State certificates while Mr. R. C. Godfrey holds a second grade State.

The thanks of all interested in school work are due to my predecessor, Rev. E. P. Shields, for his efforts to raise the standard of education in our public schools, and he retires from the office bearing the esteem of the entire county.

In closing my first report, I desire to acknowledge the uniform courtesy that I have received from teachers, school officers and fellow-superintendents during the past year.

---

## CUMBERLAND COUNTY.

JOSEPH MOORE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

The various items embraced in the accompanying report relating to the public schools of Cumberland, show a moral and intellectual advance alike gratifying to parents, teachers and school officers.

Much of this is due to the successful efforts of my predecessors, seconded by the labors of a corps of skillful instructors. In most of these districts the same teachers are continued from year to year, while in others, I regret to say, there are annual or semi-annual changes. In the former abundant harvests are gathered; in the latter the harvests are light, and the golden opportunities of childhood and youth are lost.

It is noticeable in those districts where parents and trustees make frequent visits to the schools, that teachers and scholars are more enthusiastic, recitations are better, and the percentage of absence and tardiness is less.

Some of our teachers holding third grade certificates, do first grade work, and it is to be hoped that the time is not far distant when eminent success in the school-room will be a mighty factor in determining the grade of a certificate.

The text-book method of examinations suggested by the Superintendent of Burlington, is a departure from usage that commends itself to the attention of educators, and I shall not hesitate to urge its adoption by our teachers.

Meetings of township boards of trustees have been productive of much good. A session of two hours' length, is a period too brief in which to finish the discussion of the numerous topics that come up for consideration.

As shown in my report on the condition of school-houses in District Nos. 1, 40 and 45, new houses and new furniture should be substituted for the old, and there is reason to hope that the present school year will witness these improvements.

In District 44, Vineland, the enterprise of its inhabitants is again manifested in the erection of a commodious brick edifice provided with the best of furniture.

My thanks are due to teachers and pupils for valuable contributions to the Exposition at New Orleans, also to my predecessor and the State Superintendent for courteous and timely aid in the discharge of responsibilities which, however easy for veterans, severely tax the energies of a novitiate.

## ESSEX COUNTY.

CHARLES M. DAVIS, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

In obedience to law, I have the honor to make this report concerning the public schools of Essex county.

According to the census of 1885 there are two hundred and thirteen thousand six hundred and thirty-seven inhabitants in this county, of whom fifty-nine thousand three hundred and eighty-four are between the ages of five and eighteen years. The following table exhibits the population of each city and township, the number of school children and the percentage the latter bear to the former :

Cities and townships.	Census of 1885.	School children of 1885.	Per- centage.
Newark.....	152,858	43,263	28 $\frac{1}{8}$
Orange.....	15,232	4,415	29
Belleville.....	3,285	855	26
Franklin.....	1,602	655	41 $\frac{1}{2}$
Bloomfield.....	6,502	1,656	25 $\frac{1}{2}$
Montclair.....	6,327	1,592	25 $\frac{1}{6}$
Caldwell.....	3,336	782	23 $\frac{1}{2}$
Livingston.....	1,275	391	30 $\frac{2}{3}$
Milburn.....	2,023	435	21 $\frac{1}{2}$
Clinton.....	2,833	720	25 $\frac{1}{2}$
East Orange.....	10,327	2,485	24
West Orange.....	3,812	1,006	26 $\frac{1}{3}$
South Orange.....	4,225	1,119	26 $\frac{1}{2}$
	<hr/> 213,637	<hr/> 59,384	<hr/> 27 $\frac{4}{5}$

The percentage of Franklin, forty-one and one-half, so greatly exceeds the average, twenty-seven and four-fifths, as to cause a suspicion of some error, either in the census of population or in

that of school children. The discrepancy is somewhat lessened by grouping Belleville and Franklin, both of which were in one and the same township when the districts were formed. When Franklin was set off from Belleville the district lines were not disturbed, thus leaving a part of Belleville in District No. 4. But when so grouped the percentage, thirty-one, is still high.

During the past school year thirty thousand nine hundred and seventy-two pupils have been enrolled, under the charge of five hundred and forty-three teachers. The average attendance was twenty-one thousand one hundred and thirty-five; not quite forty to each teacher. The average salary to male teachers was \$131.80; to female teachers, \$54.90. The difference between the pay of male and female teachers for the same services is not great. There are but fifty-three of the former, most of whom are principals or assistant principals of large schools, while of the latter there are four hundred and ninety, mostly assistants. In the ungraded district schools the salaries vary but little. Of these teachers, four hundred are employed in the cities of Newark and Orange, under City Superintendents, leaving one hundred and forty-three under the immediate supervision of the County Superintendent. They may be arranged as follows :

Graduates from college.....	16	
Graduates from New Jersey State Normal School.....	16	
Undergraduates, New Jersey State Normal School.....	4	
Graduates from Normal Schools of other States.....	29	
Graduates from Academies and High Schools.....	44	
	<hr/>	109
Not graduates.....		34
		<hr/>
Total.....		143

#### CERTIFICATES.

State second grade.....	11	
State third grade.....	4	
	<hr/>	20
County first grade.....	28	
County second grade.....	36	
County third grade.....	57	
	<hr/>	121
Licenses, special.....		2
		<hr/>
Total.....		143

No school district extends into a neighboring county, and, except in cases where great inconvenience would result from too strict adherence to the rule, township lines have been made lines of districts, so that if any time a law should be passed establishing township boards of education, the system could be easily introduced into this county.

All the districts except two voted special taxes for the support of the schools. In these two districts the balance in the hands of the Collector was thought sufficient for the year. East Orange votes a township tax of \$5 for each child on the census list, in addition to the money voted in the respective districts.

After making due allowance for children from five to seven years of age, whose parents think them too young to attend school, and for those from fifteen or sixteen to eighteen, who have left school to engage in work, there are still too many reported as "attending no school during the year." The County Superintendent does not seem to have any legal power to act in regard to these delinquents.

One new school-house has been built outside of the cities—in No. 7, Bloomfield. This district now has four fine school buildings, all of brick, valued at \$70,000. Ashland district, No. 37, East Orange has made a large addition to its main school building, at an expense of \$10,000. There are no "very poor" school-houses in the county; but one that is "poor;" two "medium." The rest are "good," or "very good." There is constantly a demand for more room, either by enlarging present buildings, or by erecting new ones. Where the districts are large the tendency is toward additional buildings.

Contributions were made to the New Orleans Exposition by every school that was in session when the blanks were circulated, except the schools of District No. 7, Bloomfield. Gen. C. H. Barney, Commissioner for New Jersey to the Exposition, reported that of twenty-one awards to the State, five were to single institutions, the remaining sixteen for exhibits made by cities or towns. The Newark public school received diplomas of honor for pupils' work, scrap-books and drawings from high schools. The Orange public school received diplomas for pupils' work. Vernon L. Davey's school, District No. 36, received a diploma for home-made philosophical apparatus.

Of the one hundred and forty-three teachers under my especial superintendence, about one hundred and thirty are in graded schools in which so-called methods are more or less employed. The danger of carrying method to extremes is beginning to be appreciated, and I am happy to say that there is among the teachers a growing effort to make individuality, both of the teacher and the scholar, more prominent, and to use methods as mere means, not an end.

It will easily be gathered from the above statements that the

present school system is highly valued by the people of the county, who contribute liberally to its support; that school officers are quite generally faithful and interested in their work, and that we have a body of well-educated, earnest and successful teachers. But we have not attained to perfection; when our children leave school, we find that they are not as well-fitted for self-support as we could wish. How to remedy this is one of our great unsolved problems. But we are working earnestly at it.

---

## GLOUCESTER COUNTY.

WILLIAM MILLIGAN, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

In obedience to law, I have the honor to submit my nineteenth report as Superintendent of the county.

One district, No. 55, Bellevue, has been abolished and divided among Districts Nos. 46, 47 and 53. There are three others, viz., Jackson, Chewsville and Clem's Run, that will soon have to be consolidated with some of their neighbors, as their houses are poor and their numbers running down.

SCHOOL-HOUSES.—Districts Nos. 29 and 59, Good Will and New Brooklyn, opened their schools in their new houses early in the year. They, as well as the new house erected in No. 38, Pitman Grove, during the summer, are a credit to their respective neighborhoods. No. 15, Gibbstown, have remodeled the old house and they have now a good stone house containing two school-rooms. No. 30, Battentown, is now engaged in building a new house. No. 31, Swedesboro, feeling the need of an extra department, divided the lower room, which was a very large one, into two, and both are now well filled. Swedesboro is growing, and I should not be surprised to hear

of a demand for another department soon. No. 57, Williamstown, has changed the stairways and made some other needed improvements.

**SCHOOLS.**—The county "Course of Study" is still pursued. The number of pupils who completed the course and received their Diplomas in May and June is three in District No. 1, two in District No. 19, one in District No. 27, one in District No. 30, five in District No. 31, and two in District No. 57. Another pupil of No. 57 received an average of eighty-five, but as he was only thirteen years of age, he was not granted a Diploma.

Night schools were opened in Woodbury, Glassboro, Clayton and Williamstown for the benefit of the boys employed in the glass houses. The schools were well attended and the boys seemed anxious to learn.

**TEACHERS.**—One hundred and twelve teachers were employed in the schools during the year, viz., thirty-four males and seventy-eight females. A few of these were engaged as assistants during the winter months.

We did not hold an institute during the year, but our associations were regularly held and well attended. The teachers received instruction from Prof. Apgar and Dr. Hasbrouck, of our Normal School; Dr. Brooks, of the Millersville, Pa., Normal School; Professors Ivins and Maris, of the Friends' Schools in Philadelphia; Prof. F. W. Christine, of the Central High School, and Mrs. I. Cassell, of Kindergaten Institute.

**SCHOOL LIBRARIES.**—I am very sorry that more of our schools do not avail themselves of the benefit of the "Library Act," as many are sadly in need of books of reference and the necessary apparatus so essential to every well-organized school. I have endeavored to stir up an interest in the schools on this very important subject. Many of the school trustees are opposed to entertainments and subscriptions, and say they would act in the matter if they could give the money out of the district tax.

**TEACHERS' EXAMINATIONS.**—I still have had, during the year, the faithful services of Messrs. Bugbee, Gallaher and Tharp. We have examined one hundred and thirty-three applicants for teachers' certificates. Of this number, fifty-four, failing to receive the required average, were rejected. One first and four second grades were granted; the remaining seventy-five certificates issued were of the third grade.

**ARBOR DAY.**—Most of our schools observed the day by special exercises. Trees and bushes were set out and flower-beds made, which, later on, were supplied with bedding plants and seeds.

For further information as to the details of the school interests of the county, financial and otherwise, I must refer you to the accompanying statistical tables.

## HUNTERDON COUNTY.

OLIVER H. HOFFMAN, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I herewith submit my third annual report of the condition of the public schools of this county.

The accompanying statistical tables may be summarized thus :

Amount of money received from State.....	\$52,043 13
Amount of money received from surplus revenue.....	2,297 43
Amount of district tax for teachers' salaries.....	3,865 03
Amount of district tax for building and repairing.....	12,943 54

Total from all sources for school purposes.....	\$72,146 13
---	-------------

Valuation of school property.....	\$192,200
-----------------------------------	-----------

As compared with the sums received and raised for the same purposes the preceding year

The amount received from State is.....	\$114 60 less.
The amount of district tax for salaries is.....	716 99 less.
The amount of district tax for rebuilding, &c., is....	6,690 15 more.
The amount from all sources for school purposes is..	5,858 87 more.

The valuation of school property is \$14,150 greater than in the preceding year.

Number of children within the school ages.....	10,284
Average number of months the schools have been open.....	9.9
Total enrollment.....	8,164
Average daily attendance.....	3,950
Estimated number of children in private schools.....	357

Estimated number attending no school.....	1,381
Number of male teachers employed.....	58
Number of female teachers employed.....	90
Average monthly salary of male teachers.....	\$42 57
Average monthly salary of female teachers.....	31 25
Number of districts in the county.....	105
Number of \$200 districts.....	5
Number of \$350 districts.....	53
Number receiving more than \$350.....	47

The foregoing summary presents, as accurately as mere statistics can, the condition of the public schools of this county. In some respects the exhibit is not an encouraging one. This is especially true of the number of districts which, under the law, must receive \$350 each. During my superintendency, the number of these districts has increased from forty-five in 1883, and forty-nine in 1884 to fifty-three the present year. During the same period, and as a consequence of the increase in the number of these districts, the amount of money per child apportioned to the larger districts has as steadily decreased. This amount, which is \$4.95 the present year, was \$5.04 in 1884 and \$5.09 in 1883.

Nor is the outlook for the future reassuring. The school census of this county for the present year shows that several districts, that are, as yet, among the larger ones, are rapidly approaching the \$350 border line, so rapidly that they may be expected to cross it in the near future. While the amount of money required by law to be appropriated to these districts is less than their schools should have, it diminishes very materially the amount received by the larger districts.

In this county, these smaller districts, with a school population of three thousand children, receive the present year \$19,550, or about \$6.50 per child; while the larger districts, with a school population of seven thousand two hundred and twenty-seven children, receive \$35,787, or \$4.95 per child.

The Legislature should relieve this unsatisfactory condition of affairs by appropriate legislation. To require these smaller districts to supplement the aid received by them from the State by taxing themselves for teachers' salaries is in my judgment neither just nor wise. It is not just, because it imposes a burden upon them from which many of the larger ones are free. It is not wise, for the reason that the raising of funds in this way almost invariably stirs up bad blood in school districts (especially rural ones), divides them into factions and seriously mars, if it does not wholly destroy that harmony and unity which are so essential to the well-being of our schools. As the public schools are virtually State institutions,

organized under State laws, supported (partially, at least,) from State funds, and supervised by officers appointed by the State, she should extend to them the same generous aid and fostering care that she does to her other institutions. She should so increase her appropriations for their support as to enable them, without resorting to district taxes, to employ and *retain* competent and efficient teachers.

**ATTENDANCE.**—During the school year just closed the average daily attendance in our public schools was less than fifty per cent. of the enrollment. That irregularity in attendance is a serious hindrance to successful school work is self-evident. It disorganizes classes and adds greatly to the labor and anxiety of the teacher. Nor is this all. A school in which it prevails can maintain but a very low standing; and as the teacher is held responsible for the condition of his school, his reputation suffers with that of his school. While this evil is attributable mainly to the indifference, negligence and unwise indulgence of parents, the teacher is not always free from blame. Boys and girls, like their elders, love to attend those places which afford them the greatest amount of happiness. This being so, the most effective correction for this irregularity in attendance is to implant in the breast of the pupil a love for his school second only in intensity to that which he feels for his home; to invest the daily exercises of the school-room with so much interest that they afford him as much pleasure—though of a different kind—as do his games outside. This is not only possible, but very feasible. Let the teacher, as he enters his school, greet his pupils with a pleasant smile, show a lively interest in their welfare, aid them willingly, but judiciously, in their studies, manifest towards them a warm, human sympathy in their childish griefs and disappointments, and he will bind their young affections to him by cords of love stronger than hooks of steel. He will have no trouble in securing the general and willing attendance of his pupils. They will take a just pride in their school and contribute their best efforts to its success. The influence for good of such a teacher cannot be measured. It accompanies the pupil along the journey of life like a benison; it reaches beyond time, into the misty shadows of eternity. On the other hand, the teacher whose brow is constantly clouded by a frown, who addresses his pupils only to chide or find fault, who “scolds and frets all day, from dewy morn to even,” will succeed only in securing the hatred and contempt of his pupils. Truancy, absenteeism, disorder, hatred of school work, in short, all the ills which afflict badly-conducted schools will abound in his.

**EXAMINATIONS.**—The usual examinations were held, at which two hundred and thirty-two applicants for certificates presented themselves for examination. Of these, one hundred and forty-one received certificates, while ninety-one were rejected.

Seven first grade, nine second grade and one hundred and twenty-five third grade certificates were issued. These were divided between the sexes as follow :

First grade, males.....	1
First grade, females.....	6
Second grade, males.....	4
Second grade, females.....	5
Third grade, males.....	36
Third grade, females.....	89

Of the rejected, thirty-four were males and fifty-seven females. In the number rejected are included five whose certificates were withheld for dishonest practices at examination. That cheating at examinations, as elsewhere, is reprehensible will be generally and readily conceded. It would naturally be supposed that one aspiring to be a teacher of the young, their exemplar and guide, would scorn to resort to means so base to win a transient advantage. I say transient advantage, for detection and exposure are sure to follow with their inevitable consequences, the humiliation and degradation of the misguided teacher.

Nevertheless, there are a few teachers in this county (happily but *very* few) who, either from lack of a proper appreciation of the true nobility of the teacher's profession, or from blunted moral perception, not only *do* resort to such means, but take credit to themselves for "smartness" when they succeed in eluding the vigilance of the Superintendent and his assistants and securing a certificate. The remedy for this evil lies, I think, with the State Board of Education. Let that body adopt a rule to the effect that any teacher detected in cheating at an examination shall not only receive no certificate, but shall be prohibited from teaching in the public schools of this State for the period of time that would have been covered by the certificate applied for had it been granted. It is very doubtful whether the present method of examining and grading teachers is the best that can be devised. The object of examinations is to test the qualifications of the teacher and to exclude from the school-room the unqualified and the incompetent. The teacher should be subjected to no greater trouble or annoyance than is necessary to attain these ends. Especially should nothing be required that tends to humiliate him.

Under the present method, the teachers are required to attend examination at stated periods, determined by the expiration of their certificates. None exempt. The teacher and his own pupils—he, with an experience of many years behind him, and the novice yet in his teens—*all* must attend, and attend as equals. Success in the

school-room, established reputation count for nothing. Is this fair treatment of the veterans in the profession? Is it not subjecting them to annoyance and humiliation from which their experience and attainments should spare them? Examinations for third grade county certificates should be confined to the younger teachers, and those who have not given satisfactory proof that they possess the requisite scholarship. To all others who, by the crucial test of actual school work, have demonstrated both their ability and their willingness to teach, a professional certificate should be issued without examination. The certificate should be issued by the County Superintendent, and should entitle the holder to teach in the county in which it is issued until it is revoked for cause.

While examinations, as now conducted, are a fair test of scholarship, there are other and rarer qualifications, that constitute essential elements in the make-up of the true teacher, of which they are no test at all. Skill in teaching, tact in governing and kindred qualities, can neither be discovered by a written examination nor graded with mathematical exactness. Nor can they be acquired by all in equal degree. Normal training may develop, but it cannot create them. They are innate. The true teacher, like the real poet, is born not made.

Endowed with these qualities, a teacher of but ordinary book attainments will rise to eminence in his profession, while another, though an encyclopedia of erudition, but, wanting these, will surely fail. Any system of marking based upon scholarship alone is misleading. It overrates some teachers while it underrates others.

SCHOOL VISITATIONS.—Every school in the county received the number of visits required by law.

In teaching method is everything. If proper methods be employed, no anxiety need be felt about results. Thoroughly convinced of this truth, in my visits to the schools during the year I have devoted much more time and attention to the investigation of the methods of teaching and of disciplining prevailing in them than to propounding questions to pupils. In this way the teacher has been made to feel that it is he, and not his pupils, that is undergoing examination; that the superintendent's estimate of his school and of his ability as a teacher is based, not upon the amount of cramming, but of real teaching that has been done; not upon the parrot-like answers his pupils may be able to make, but upon the development of their thought-power, their ability to discover and analyze principle, and their capacity to digest and assimilate their mental food. Necessary criticisms have not been spared. These, offered as they have been, in the spirit of the sympathizing friend, and not of the censorious critic, have been kindly and gratefully received.

TEACHERS' INSTITUTES.—No institute was held in the county during the year.

As originally conducted, institutes were productive of much good. Teachers assembled themselves together for the purpose of exchanging views as to methods of instruction and of school government. The arrangement of the order of exercises was in their hands. If outside aid was desired, it was sought among those whose eminent success as teachers in the public schools qualified them to give practical and helpful instruction to their less experienced fellow-teachers. In short, they were teachers' institutes.

Of late years, however, the tendency has been to convert institutes into mere schools, with the teachers as pupils. They have no control of the order of exercises but are expected to be passive recipients of whatever is presented to them. Little or no opportunity is afforded for discussion. The conductors, though excellent and able men, are usually from other States and therefore labor under the disadvantage incident to strangers—ignorance of the condition of our schools and of their needs. As a consequence, the matter presented by them very often fails to interest the teachers; either because it is beyond the grasp of many of them, or because they feel that it is not of such a character as to aid them in their work. This, like most general statements, has its exceptions.

Institutes have been held in this county, that have had a very beneficial influence on our schools. The last one, held in 1884, was one of these.

TEACHERS' ASSOCIATIONS.—I think that teachers' institutes could be supplanted by teachers' associations, very much to the advantage of our schools.

Such an association organized in every county in the State, and devoted to the discussion of subjects in which, from their intimate connection with his school work, every teacher would feel a warm personal interest, would, I am confident, give an impetus to the cause of public school education that institutes have thus far failed to give. Let the State require such an association to be organized in every county, of which every teacher shall be a member and whose meetings he must attend. Let the association be required to meet quarterly, and let it receive the same pecuniary aid from the State yearly, that institutes now do.

SCHOOL BUILDINGS.—Districts Nos. 39 and 63 have replaced their old structures by new and commodious edifices, which in size, plan and furniture are all that these districts require for the accommodation of their children. District No. 9 has enlarged and beautified its building by the erection of an additional wing. Several other districts have repaired and refurnished their school-houses. I have been compelled by a sense of duty to the children of that district, to condemn the building in District No. 65 as utterly unfit for school purposes, and to close the school until such time as the district shall

manifest sufficient interest in the education of its children to provide such a building for their accommodation as the law very properly requires.

**SCHOOL LIBRARIES.**—But one district, No. 6, established a library during the year. Districts Nos. 13, 30, 49, 61, 67, 68, 70, 85, 88, 103, have added to their libraries. The present system of library reports is very unsatisfactory. It fails to show the condition and even the number of the books. This arises from the lack of interest manifested on the part of both teachers and patrons in this important auxiliary to the education of our youth. That a well-selected library is a very material aid to both teachers and pupils cannot be successfully denied. They cultivate in the pupil a taste for literature of a much higher grade than they, with a taste not thus cultivated, would select. The pernicious dime novel trash of the day must be kept out of the hands of our boys and girls. To do this, we must supply them with reading-matter that will enable them to discern and love what is true and noble and condemn what is vile and base. To this end every school district should have a well-selected library to which, under proper and necessary restrictions, every pupil should have access. The teacher should have charge of the books and he should be held responsible for their condition and safe-keeping. The report of the condition of the library should be made by him and not by the district clerk.

**SCHOOL LAW.**—Our school law, notwithstanding its general excellence, could be advantageously amended in some respects.

As it now stands, it requires but one qualification in a trustee—ability to read and write. The same moral qualifications should be required of him that are required of the teacher, and like him, the trustee should be subject to removal for the same moral, or immoral, delinquencies.

It punishes the district for the negligence of its clerk (*See Sec. 93*). The clerk, like other delinquents, should himself receive the punishment, which should be removal from office by the County Superintendent.

A species of nepotism prevails in some of our districts which exerts a hurtful influence upon the schools. Trustees put their own sons or daughters in the schools as teachers and keep them there, often against the wishes of the district and the interests of the schools. The law should prohibit the employment of a teacher in a school of which the father is trustee.

The law should require a teacher to be at least eighteen years of age. School children should not be allowed to be school teachers.

The provision of the school law which prohibits the use of more than \$20 of the funds derived from the State, for purposes other than teachers' salaries and fuel, is evaded in some districts in this county in a manner more ingenious than ingenuous.

A teacher is engaged at a yearly salary nearly equal to the amount of the State funds received by the district, but with the understanding that he is to refund a large part of it. The order is drawn for tuition, presented to the township collector and paid by him. The teacher retains the amount that he is to receive, his real salary, and hands the remainder to the district clerk, to be appropriated to repairing the school building or the discharge of a district debt. This is a violation of the spirit if not the letter of the law and should be prevented. If existing laws are inadequate to do this, the Legislature should remedy the defect by enacting others.

CONCLUSION.—On a careful review of the condition of our schools at this, the close of the year, it is highly gratifying to be able to say of it that it affords rational grounds for encouragement. The schools of this county are certainly much better than they were less than a half decade ago. Our teachers are, for the most part, competent and faithful; conservatively progressive, they neither reject old methods merely because they are old nor adopt new ones without testing their merits in the school-room. They remember that under these same old methods, have been educated men and women who have gone forth to life's duties and, by their attainments, both of mind and heart, have contributed not a little to the honor and the glory of our noble commonwealth. At the same time, they do not forget that the rapidly increasing and diversifying business interests of our country will demand of the men of the future, qualifications differing very much in extent if not in kind, from those possessed by their sires. They realize that, to meet and satisfy these demands, the main reliance must be upon our public schools.

---

## MERCER COUNTY.

WILLIAM J. GIBBY, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

This, my seventeenth annual report, leaves me as I am about to enter upon another term of three years. Although, undoubtedly, the future will be a counterpart of the past, made up of successes

and failures, encouragements and discouragements, still, if on the whole I shall be able at its close to look back over a period whose end shall exhibit as marked a substantial and permanent progress over the condition at its beginning, I shall not regret that another cycle has been added to the extensive service already rendered.

It is enough to say that the past year ranks with its predecessors in the faithful and tireless performance of their several duties by the teachers, trustees, assessors and collectors. Especially are thanks merited by our efficient County Collector, Capt. F. W. Van Kirk, to whom we are indebted for the management of our State tax business, which was so thorough and prompt that no delay was occasioned in getting those funds back into the hands of the several Township Collectors in time to meet payments of the teachers' salaries. But all have been so faithful that distinctions are invidious.

It strikes me that it would be wise if the Legislature would authorize the State Superintendent to rewrite or revise the general school law. The various amendments have brought in some inconsistencies, while the fact that many of the provisions are nearly twenty years old and were, withal, trimmed and reefed to conciliate and frustrate bitter opponents, would seem to justify the attempt to conform the school law to the advanced sentiment of the times. I am more and more convinced that August should be entirely expunged from the school vocabulary. The Legislature would do well to require all schools to be closed on the last Friday of June, to require the trustees to give all orders for moneys before August 1st, and to make all reports by this time. Such a provision would give the trustees the whole month in which to engage a teacher, clean the school building and attend to such other matters as are necessary to be done before opening school in September.

There is an increase of six in the number of teachers employed in the county, there being one hundred and seventy-four, an increase of four males and two females. The average monthly salary paid to males is \$80.75, an increase of \$9.40; the average to females, \$36.08, a decrease of \$2.04.

Certificates were granted to ninety-seven teachers, nine more than last year. All were third grade. Thirty-nine candidates were rejected. Twenty-eight certificates were granted to males and sixty-nine to females. As was remarked in my last report, the low grade of certificate is explained by the fact that many of the teachers are provided with State certificates and the higher grade county certificates.

The total number of children in the county, between five and eighteen years of age, according to the census of 1885, is sixteen thousand nine hundred and five, a falling off of two hundred and sixty from last year. The whole number enrolled in the schools is

nine thousand four hundred and seventy-eight, an increase of two hundred and sixty. The average daily attendance is five thousand three hundred and thirty, a decrease of one thousand two hundred and fifty-nine.

The income for the support of schools for the ensuing year is derived as follows :

State school tax.....	\$80,714 94
State appropriation.....	4,820 81
Interest surplus revenue.....	723 11
	<hr/>
	\$86,258 86

This is an average for each child of school age in the county of \$5.10, an increase of fifty-one cents.

The schools have been visited, and the township meetings held as required by law.

---

## MIDDLESEX COUNTY.

RALPH WILLIS, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

I herewith submit my annual report of the condition of public schools of Middlesex county for the year ending August 31st, 1885.

Three new districts have been formed during the past year: No. 75 (Highland Park), in Raritan township, opposite the city of New Brunswick; No. 76 (South River), in Sayreville township, and No. 74 (Helmetta), in East Brunswick township.

In the last-named district a commodious school-house has been built and furnished by the liberality of Hon. Geo. W. Helme; and in each of the other new districts, Nos. 75 and 76, a school building

is in process of erection. It gives me pleasure to add that in each of two old districts, Nos. 14 and 37, arrangements have been completed for a new school-house. Repairs, varying in cost, have been made to school-houses in many parts of the county, so that, with a few exceptions, our school buildings are in a creditable condition. Forty may be reported as very good, twenty-five good, seven medium, and one quite poor.

Quarterly examinations of teachers have been held with the usual proportion of failures, resulting mainly from the haste and undue preparation on the part of young ladies anxious to be teachers.

Every examination shows how small a proportion of teachers aim at anything higher than the lowest grade. Perhaps nine-tenths of the teachers of this and other counties of the State, are teaching, and, in some instances, have taught for many years upon a third grade certificate, simply because this found to suffice for nine-tenths of the schools within their reach. It is worthy of consideration, I think—since so much of the teaching in public schools is done upon this grade, and since so much is likely to be done—whether this grade should not include Book-keeping and the History of United States, supplying the places of these, in the second grade, with Physiology and English History.

Book-keeping, in particular, is a branch of study that ought to be included in every certificate, and be taught in the form of single entry, at least, in every miscellaneous school in the land.

I am sorry to be obliged to report, as usual, the neglected condition of many public school libraries. In some cases, they are quite lost, and in others a few dusty relics only can be found. With few exceptions, these libraries are little valued and little cared for in the agricultural districts. In such districts, they commonly receive no additions after the first purchase, and fall into disrepute for want of variety and freshness.

The monthly meetings of the Teachers' Association of Middlesex county have been well sustained by the numbers in attendance and the interest manifested in the subjects discussed.

School visitation have received full attention—none having been neglected, although some, at the time of making the visit, were found closed. Several schools have suffered interruption or depletion by prevailing sickness. To this part of my work, which covers so large a territory, there are hindrances and delays, incident to the condition of the weather and the country roads. I have, however, been favored with valuable assistance by my son, H. B. Willis, who is a graduate of the State Normal School, and who has filled important positions as teacher.

## MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

SIR—I have the honor to report to you my educational work in Monmouth county for another year. As formerly, I present herewith an epitome of the local finances for the coming year. Although this exhibit, with the minutest details of the money distribution, is served upon the school officers, yet there are many who would not see these bottom facts of the school finances, unless they see this exhibit in the annual report of the State Superintendent, hence its insertion in this place.

I must suggest again the necessity of advancing the age at which teaching is begun. Is it reasonable to look for old heads on young shoulders, and at sixteen can we expect to find the judgment that shall amount to a disciplinary force?

In regard to the examination, I think it is a wise change to allow the early summer examination to run two days, and to embrace all three grades, of course restricting the third grades to Friday, the first day of the examination.

In regard to the average, or footing up of the columns of the statistical report, the year just closed does not compare favorably with the previous one. The truth is, that never in my experience have children epidemics raged so extensively, compelling the closing of the schools a good deal in the winter. In some cases a pitiable fatality prevailed, and some of the teachers contracted the contagion and were sick a long time.

In my long experience I have been fortunate in getting in the annual reports of the District Clerks. Last year I was much chagrined that, for the first time, a clerk did not render his report until mine was in the hands of the State Superintendent. However, as it was a case of absconding, for reasons which made it seem pitiful to the man's friends, I did not enforce the penalty, but went to work and

collected the facts and thus supplied the want. Alas, this year of grace, 1885, has made me another similar visitation, and after waiting several weeks and each day looking at the hiatus which stretched across the tabulation in two straight lines, my heart became sick. So I had to get the data together from any and every quarter. The district in question has done so nobly in the item of raising money to build school-houses, and, moreover, being a little embarrassed financially, I could not find heart to inflict a penalty which, in its best aspects, only punished the taxpayers, and does not so much as touch the spot where the fault lies.

I am positive that the time set for the clerks' reports of the county is not the best. The truth is, that as a rule, at no time has the District Clerk so clear ideas of the financial condition of his district as he has at the time of closing the work of the school. The County Superintendents get the schedules of school moneys published early in the summer, and the clerks have the money statement in their hands then, both for the year closing and the new school year so soon to begin. I have for years asked an early report to me from the District Clerks, to which I must refer with gratefulness, since they comply generally with such good grace. I have observed, too, that the very clerks who work the hardest and are obliged to get up the most serious reports are generally the most accurate, also the earliest. By all odds the largest and most difficult district to work up is that of Long Branch, of which Dr. T. G. Chattle is the clerk, and yet his able report lay on my desk, all finished, by the first week of July.

It seems to me that if we have so complete an examination in early summer, the one in August could readily be dispensed with. An examination early in July, the same being the third and last one of the year, would come immediately after the graduation from our graded schools, and would thus be timely. Besides, do the best one can, these exercises are expensive; hence would ensue an economy which is desirable.

Arbor Day, although upon very short notice, and some of the schools closed because of sickness, was observed with spirit.

The visitations for the year number four hundred and sixty-five.

No. 85, of Long Branch, already possessed of a princely building, has widened her stakes and, in the expenditure of some \$25,000, has so enlarged and improved the present premises that it deserves to be called a palatial edifice. The Long Branch district is the only one in Monmouth that deserves to be known as carrying out the township system.

The graded school at Freehold has, through the oversight of its very efficient District Clerk, been improved by the painters and carpenters, at a generous expenditure.

## MORRIS COUNTY.

LEWIS W. THURBER, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

SIR—Complying with the requirements of law, I herewith respectfully submit my annual report of the condition of the schools in Morris county for the year ending August 31st, 1885.

I find, from the appended statistics, that we have suffered some losses, which, though not very serious ones, will be keenly felt. In the school census we find a falling off of two hundred and ninety-seven from that of last year. This loss will show itself in a lessened apportionment of school moneys from the State, and in the average salaries paid to teachers. The amount received this year from the State is \$56,412.64, a decrease of \$2,300.02. The number of districts in this county receiving \$350 is sixty, and of those receiving \$200 is twelve; this leaves us only thirty-five districts to receive a per capita distribution of the school funds remaining after the other two classes have received their appropriations provided for by law. Of the \$13,180.79 tax reported as having been voted for the payment of teachers' salaries, all but \$1,545 comes from the per capita districts. This tends to show that the burdens of taxation are unequally borne, and that while small districts receive more than their share of State funds, on a per capita basis, they are unwilling to resort to local taxation for the purpose of supplementing the amounts apportioned to them. A very light tax in these districts would do much towards increasing the efficiency of these schools, through better-paid teachers.

The average time that schools have been kept open is 9.5 months, against 9.1 months reported last year. The number enrolled on the school registers is one hundred and ninety-five less than last year. The average attendance, however, is but eleven less.

In visiting the schools I am pleased to note their continued improvement. The lessons are well learned, the children seem happy

at their work, but little difficulty is experienced in securing good order. Where these conditions are wanting a private talk with the teacher usually has the desired effect.

During the past year one hundred and fifty-eight teachers were employed; fifty-one males and one hundred and seven females. The average monthly salary paid males was \$54.43, against \$53.17 paid last year; the average paid females was \$35.44.

Up to the present time fifty-seven districts have availed themselves of the provisions of the Library act, and have received from the State one hundred and sixty-six appropriations. In the past year three districts received their first amounts, while eleven districts have made additions to their present libraries.

District No. 55, Chester, has come into the list of "very good," by the erection of a fine three-roomed school-house, creditable alike to the State and to the wants of this enterprising village. In the demolition of the old school-house in District No. 40, Bartleyville, another relic of by-gone days has disappeared. It has been replaced, however, by a neat and handsome building that conforms in architecture and convenience to the requirements of our present school system. Perhaps in no other way is our educational advancement more plainly shown than in the style of our school-houses. We still have a few "old-timers," which will have to be condemned unless a liberal and enlightened spirit shall take voluntary action in the matter.

At the regular quarterly examinations, held in Dover, two hundred and thirty-six candidates for teachers' certificates presented themselves. One hundred and twenty-eight of these receiving the averages required by the State Board of Education, were granted licenses. Of the number failing to receive the necessary averages nearly all were young persons who had never taught.

Trustees occasionally ignore the law by hiring persons to teach who have never qualified, thinking that a "permit" will be granted. It is hardly necessary to assure you that these parties have to chew the bitter cud of disappointment, and learn that deviations from established rules cannot be justified, unless in a matter of great exigency.

The demand of the State Superintendent for school work for the New Orleans Exposition was met by our teachers promptly sending the required specimens. Coming, as it did, at the beginning of the school year, before reviews could be made, and, in rural districts, before the larger pupils were enrolled, the specimens furnished could scarcely be called exhibition work, and only represented the everyday product of our school, showing the real work of teachers and pupils, and was such as can be duplicated at any time. It is with honest pride that we bow our acknowledgments to the complimen-

tary notices that Morris county school work received from official sources.

The observance of Arbor Day was general, nearly every school having exercises appropriate for the occasion. In accordance with instructions received from the State Superintendent, I prepared and issued the following circular :

*“To the Teachers of Morris County:*

“Chapter CIX., section 2, of the laws of New Jersey provides, ‘That on Arbor Day appropriate exercises shall be introduced in all the schools of the State, and that it shall be the duty of the several County and City Superintendents to prepare a programme of the exercises used on such day in all the schools under their respective jurisdiction.’

“Friday, April 24th, having been set apart by proclamation of Governor as ‘Arbor Day’ for the present year, it becomes my duty, in accordance with provisions of the foregoing act, to recommend a programme of exercises for the proper observance of this day—to be changed, however, by the teacher wherever it is found impracticable, and such other exercises substituted as may seem best adapted to the grades and circumstances of your respective schools.

“Upon receiving this circular give notice to your schools of the day and of your intention to observe it with appropriate exercises. Endeavor to secure a full attendance.

“Let your pupils invite their parents and friends to be present at the tree-planting, and send requests for the trustees to be with you.

“Urge upon your pupils for observing this day, and aim to enlist their enthusiasm in the work.

“The principal feature of the day will be the planting of forest trees upon the school grounds, by the wayside, or in other public places.

“It is recommended that the exercises of the morning session be preparatory, such as selecting the trees to be planted, procuring tools, preparing the ground, &c. Have the schools divided into bands corresponding to the number of trees to be used.

“Upon re-assembling in the afternoon, have appropriate selections read. Have a lesson on trees, including some of the following topics, as may be best suited: kinds of trees; their uses—shade, fruit, fuel, timber, &c. Uses of the parts of a tree—leaves, bark, sap, wood, roots. How trees affect the rain-fall of a country.

“Have pupils name all the different trees with which they are familiar, and have them tell their peculiarities of growth, habits, &c. In the actual tree-planting, have each scholar participate by putting on one or more shovelfuls of soil. Girls can assist also, by holding, tying, &c. As soon as a tree is set in the ground, let the children name it in honor of some eminent person, or give to it the name of

some cardinal virtue. Invite your visitors to make brief addresses. Where practicable, intersperse the exercises with singing.

"In closing the exercises, pledge each band to give the trees such care as may be necessary for their future growth and preservation. Record the day's proceedings, which record shall be kept for the inspection of the County Superintendent and other school officers."

Teachers and pupils were enthusiastic over the matter, and hundreds of trees mark an event that, we trust, shall be kept ever green in the memories of the scholars, serving to foster in them a greater love for their schools.

Permit me to say, in conclusion, that my whole time has been devoted to the duties of my office. These duties are often arduous and perplexing. The schools have, with two exceptions, been visited twice; consultations with trustees have been had as needed; apportionment of school moneys has been made; the quarterly examinations have been held; teachers have been encouraged, and, in some few instances, censured; where necessary, I have inspected boundaries and settled disputes concerning them. These, with an unlimited amount of correspondence, give but faintly an idea of the Superintendent's work.

---

## OCEAN COUNTY.

E. M. LONAN, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

In obedience to law, I have the honor to make the following report :

I congratulated myself last year that the school-house at Cedar Grove, in Union township, was destroyed by fire, and was in hopes to report that they had erected two houses to supply their wants.

They have been using their church for schools purposes, but, being at one end of the district, it is impossible for children to attend from the other end.

With two exception our school buildings are in most excellent condition.

While Point Pleasant is one of the finest villages in the State, noted as a fashionable watering-place, with its magnificent hotels and splendid cottages, their school buildings are inadequate to furnish facilities for the large number of children in the district. I have been "badgered" for the last three years in regard to school matters at Point Pleasant. It has been plot and counterplot. Two districts, Nos. 16 and 17, have been united or consolidated, then parted, and united once more, and then again set back as they formerly were. To tell you the truth, I am heartily sick of the whole transaction.

While our different District Clerks sent their census returns in promptly, I regret to say I have been much annoyed by their want of promptness in sending in their financial reports.

Examinations have been regularly held. I still retain my efficient corps of examiners. Although the questions are invariably pretty hard, I am happy to say we have less failures than in former years. For years I have endeavored to impress on school officers and parents the importance of visiting our schools. If there is any one thing that can make me intensely angry it is for parents to condemn a teacher without just cause.

It would promote the welfare of our common schools for parents to manifest some interest in them. A little reflection must show that it is a hard thing for the most skillful teacher to maintain an efficient school in the face of decided opposition on the part of the parents of his pupils. So, on the contrary, the benefits flowing from his work would be increased in a similar ratio by hearty and expressed support accorded by the patrons of his school.

I do not know how it may be in other counties of this State, but here, at least, there is too much indifference shown in the public schools. If it is worth while for the people of a district to tax themselves to build and maintain a school, it certainly is worth while to see to it afterward that the school is put to the use designed for it, and that, too, to best advantage. But in the majority of cases it appears that people are satisfied to form their opinions of the school their children attend from the vague and uncertain rumors circulating through the community—reports that are likely to do gross injustice.

If people would visit their schools frequently I am satisfied that the effect would be of the greatest benefit to both teachers and pupils. It would have a tendency to stimulate both to increased effort in

checking disorder, idleness and truantism on the part of pupils, and in putting teachers to the necessity of improving themselves for their business. There is certainly need enough of all these desirable results, and I am thoroughly convinced that they will never be attained until parents see that they have some duty in this matter as well as teachers and trustees.

When I hear a teacher declare that in the course of three or more years' service in a school not a parent has been inside of the school even once, and then when I hear the same parents in the district commenting and criticising the school with the utmost freedom, I am led to believe that they are placing too much confidence in their children's stories and liable to do injustice to a most excellent teacher—one who has his heart in the work. School difficulties would be avoided by a more frequent intercourse between parents and school.

Although a new thing, I am happy to say Arbor Day was generally observed.

---

## PASSAIC COUNTY.

J. C. CRUIKSHANK, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

It is not only a matter of form but of respect and duty to submit to the State Board a statistical report and general statement of the schools of Passaic county. The school boards are not perfect. The schools are not perfect. The school system, though good, is not perfect. But it is encouraging to note improvements and increasing popular interest. Good progress has been made, notwithstanding the county has been subject to annoyances, embarrassments and imperious dictation. The educator's work is to meet both prejudice and ignorance, though they are existing in high officials, or in the bronzed laborers of *natale solum*. Is it so, that we have had the education

of the people and children—a cause so good, undeniably good—overlooked by partisan faction? Have individual ideals become so prominent that they exclude from their thoughtful consideration both public and private rights? The citizen should be honored who studies his interior self, possessed of a feeling heart and inquiring mind, hungering for intelligent supplies, his only aim is to be useful in life not worthless.

“The clouds may drop down titles and estates,  
Wealth may seek us, but *wisdom* must be sought.”

The census numerators report twenty-three thousand and ninety-nine children between the ages of eighteen and five in the county, being an increase of seven hundred and forty-seven. The number of children registered as attending school are sixteen thousand three hundred and ninety-five, an increase of five hundred and twenty-four. Average number who have attended schools during the time they have been kept open, ten thousand four hundred and sixty-six, an increase of two thousand five hundred and eight. The seating capacity of the school-houses in the townships and cities is not sufficient. It only affords accommodation for twelve thousand four hundred and thirty-six. The number attending private and sectarian schools are estimated at one thousand five hundred and sixty-nine, and the number attending no school at five thousand one hundred and thirty-five, being six thousand seven hundred and four. Making no account of six thousand seven hundred and four, not considering them in the calculation, there are unprovided for three thousand nine hundred and fifty-nine. To present the tables as they are reported by the townships and cities:

	Number of pupils.	Seating capacity.
Acquackanonk.....	591	400
Passaic.....	2,412	1,100
Little Falls.....	518	265
Manchester.....	475	344
Wayne.....	541	388
Pompton.....	742	540
West Milford.....	782	580
Paterson.....	17,028	8,819
	<hr/> 23,099	<hr/> 12,436

Should not the three thousand nine hundred and fifty-nine have fit accommodations?

The teachers number two hundred and twenty-eight. The ratio to each is about fifty-five. The remedy—build additional school-houses; increase the number of school-teachers; enlarge educational facilities.

The total amounts received from all sources for public school purposes, are \$172,066.03. There has been appropriated of this sum \$24,587.60 to the payment of the teachers, thus supplementing the payment of teachers' salary to the State fund, to that amount. Now, how can this money be better expended to produce greater benefit than by enlarging educational facilities?

A new school-house has been erected in the southwest district of Little Falls, No. 7, at a cost of \$4,000. It is a substantial brick edifice, two rooms and basement, warmed by furnace. Another, long-time needed, at the Goffle, No. 11, Manchester township, at a cost of \$2,000. It is a neat wooden building. No. 8, Little Falls, brick, has been furnished with modern desks and painted. No. 21, Newfoundland, has also been furnished with new desks and repaired, an improvement long contemplated.

The County Teachers' Association is a good agency in local education. There are some inexperienced teachers in the county who should attend its meetings, and if they had the spirit of their profession, they might make a marked improvement in teaching. And as regards the more advanced, they have not become so apt but what the friction of an intellectual whetstone may be of advantage. Attendance would add to the teaching reputation.

A number of the county schools have libraries. The money has been in part collected by a faithful and energetic teacher. In course of time he leaves, successor takes no interest in the library, trustees do not appreciate the value of it. The library is neglected, the books are scattered. It is school property, and trustees should understand their responsibility, and be held accountable for its neglect or loss.

The great number rejected at the quarterly examinations were encouraged to present themselves by their teachers, and were not applicants for teachers' positions. The teachers are to be commended in their efforts to have their school-rooms ornamented by beautiful pictures, illustrating landscape, school exercises and Bible readings.

Passaic county has become prominent in the great asylum of the State. Strangers are copartners in its inheritance of liberty. Safety, power and protection are not in military camps, nor in the policeman's club, but in the boys and girls going to school, having in their satchels spelling books and testaments. In their education, they constitute the effectual and happy army of freedom—their education freemen's citadels and fortresses. The common school is the sentinel of liberty, the light-house of national independence. The empire of reason is theirs not of force. Hence it is they carry books, not bayonets; live in the schools, not in camps, and will use the ballot understandingly, not the cartridge-box. The early settlers in the county built the church and school-house. Their united instruction has made the county, though small of territory, great and prosperous. Influences

here are imperishable. Who would endanger reputation by arresting progress, or hesitate to provide greater means of education to meet the wants of the increasing population?

The worst people to govern are the half-educated. Incorporations and millionaires may build, to gratify their pride, the splendid pile of Grecian architecture, but the substantial country school-house must go up and be maintained, the memento of the State's prosperity. I know the position of the common school. It is an all-important factor. I have traveled through it, and the academy, the college and professional seminary. The public schools support the colleges. They have the care of them; they are the fountains. Warm the lower stratum, and the upper must and will be heated.

---

## SALEM COUNTY.

R. HENRY HOLME, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

I herewith send my seventh annual report for the county of Salem, and my first for the city.

We are still pursuing a conservative policy, profiting by our own experience and that of others, trying to keep out of ruts and yet adopting cautiously the many methods and means which are so full of promise, but often so poor in results.

The members of our City Board of Education are thoroughly alive to the advantages of good public schools, and during the year just passed have made important improvements. A new school-house has been built upon the grounds of the High School and the Intermediate Department transferred thereto. This has given an opportunity to start another primary room and permitted the removal of a partition in the Griffith street school-house, so as to

make one comfortable, well-lighted room where there were two ill-contrived and unhealthy ones. Another story has been added to the house for colored children and their school graded. Two teachers from Hampton, Va., have been employed and we feel confident of doing better work among them. The most promising feature, however, of our school work has been the employment of able teachers in our Primary Department. The members of our Board realize that no amount of good work during the last years of school life can make amends for a bad beginning, and they are therefore making earnest efforts to have the children start under good instructors. Our teachers are zealous and, in the opinion of the judges of the New Orleans Exposition, are doing good work.

I have attended as faithfully to the schools of the county as heretofore, and have visited very many of them more than twice. In many parts of the county I find an increasing desire to furnish good buildings. Nowhere is this feeling more fully evinced than in Pittsgrove township, which, though poor in material resources, will, when the projected building at Elmer is finished, have the best school accommodations in the county. Example, in building school-houses, has its influence upon other districts just as it has among individuals, and we can here see the effects of building one good house in the past. Especially do the citizens of District No. 69 deserve credit for the sacrifice they have made in erecting a convenient, commodious and well-appointed house. New houses have been built in Districts Nos. 28 and 29, Nos. 1 and 33 have repainted, No. 38 rebuilt, No. 61 repaired and refurnished, and a very commodious and well-planned new house has been begun in No. 64.

Although I was allowed very little time in which to communicate with our teachers, yet I received work for the New Orleans Exposition from every school but one, and that one had adjourned for a time on account of sickness of the teacher. Two or three sets of papers did not reach me in time to send them, but this was due entirely to the neglect of persons intrusted with their care. I am therefore justified in saying that one hundred per cent. of our schools furnished samples of our daily work. This fact shows, at least, that there is some degree of harmony between teachers and Superintendent.

In meeting the Township Boards of Trustees at the end of the school year, I always invite the Township Collectors to meet with us, and we now have scarcely a district in the county where the accounts of the District Clerk do not tally to a cent with those of the Collector.

In conclusion, I would say that we are trying to make the best use of the materials at our command.

## SOMERSET COUNTY.

W. T. F. AYRES, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

The following report of the public schools of Somerset county will, we believe, show them to be in a healthy and growing condition.

A comparison of statistics for the present year with those of the one preceding it, respecting the general condition of their finances, exhibits few, if any, variations worthy of note.

The amount of district tax voted for the payment of teachers' salaries is \$3,390, and that for building and repairing school-houses is \$7,990, making a total tax of \$11,380; less, by \$34.50, than that received last year.

There has been an advance in the value of school property. The present valuation is \$113,975, showing a gain of \$550.

The average salary paid to male teachers is slightly decreased. The fact might indicate a tendency toward that state of equilibrium which is the final outcome of all evolution, if there were a corresponding advance in the average salary paid to female teachers. Unhappily, this is not the case. They share the reduction.

The number of children reported in the school census is seven thousand five hundred and ninety-one, showing an increase of nineteen.

A very general and marked improvement is being effected in school buildings, their grounds and furniture. Perhaps no better gauge than this of the interest felt by the public in school work can be found. Judging by its indications, we are justified in saying that educational enthusiasm is spreading among our people.

Old desks, battered and scarred by years of contact with the restless activity of successive generations, are giving place to more comfortable modern ones. Improved heating apparatus is being regarded with more favor than the old "freeze-as-you-please" stoves. Stir-

ling District, No. 32, has erected a new and commodious building, but we are sorry to say that it was reported too late for the statistical report of school buildings.

Intelligence and good sense characterize our teachers, as a body. The study of the new methods of instruction that are constantly being brought forward by advanced teachers, and a rational conception of their practical worth, an endeavor to be well informed in current events; in a word, constant application and that "self-culture that, like conscience, never sleeps," should be, and are, the necessary results of such intelligence and good sense.

Eighty certificates have been granted during the year. Thirty-four, or about thirty per cent of the total number of applicants, have been rejected.

Fifty-schools were contributors to the New Orleans Exposition. Specimens of primary work highly creditable in design and execution formed a prominent feature in many of the exhibits, proving that teachers are alive to the importance of foundation-work in character-building.

Arbor Day was very generally observed. Fourteen districts reported interesting exercises. Those of Districts No. 31, 63 and 22 were quite elaborate and well conceived.

A Teachers' Association, endowed with all the energy and vigor of youth, has already been fruitful in good work. It has also shown itself, socially speaking, to be possessed of most goodly and pleasant ways.

No institute has been held during the year.

Library reports are unsatisfactory. A regulation of the State Board of Education, or the enactment of a law by the Legislature to the effect that teachers be constituted librarians, responsible for the books in their respective schools, would aid materially in making the libraries more important factors for good in our school system.

One hundred and fifty visits have been made to the different schools scattered over the county. Rapidly becoming familiarized with their individual characteristics, we hope in the future to bear witness to their steady growth and progress.

## SUSSEX COUNTY.

LUTHER HILL, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I have the honor to present herewith, my report for the school year, ending August 31st, 1885.

We had a school census in Sussex county, in 1870, of seven thousand eight hundred and thirty-six. This year we enumerate but six thousand two hundred and seventy-nine, which shows a loss of one thousand five hundred and fifty-seven in fifteen years, or somewhat over one hundred per year. The loss this year is unprecedented, being one hundred and ninety-two as compared with last year's census.

Schools have been kept open the same average time as last year, being nine months and twelve days. The enrollment is less, but the attendance has been more regular. There has been an advance in the average monthly salaries of both male and female teachers.

A new school-house, centrally located, has been built in District No. 10, which is a credit to the people of that district. A number of houses have been repaired and furnished with improved seating.

We have granted twelve first grade, nine second grade, and one hundred and twenty-nine third grade certificates, making a total of one hundred and fifty. One hundred and ten applications have been registered.

There is a commendable and successful effort on the part of teachers to reach a higher intellectual standard, and to merit something better than a third grade certificate. This leads to study and to mental growth on the part of the teacher, which has a decided effect for the better in the schools. Educational journals, which have been more generally taken and read, are also greatly assisting the teachers in their work. One of the best teachers of this State told me that he went to the New Orleans Exposition last winter that he might pick up facts for his school, saying that teachers were liable

to get into a rut unless they were constantly receiving new ideas and increasing their store of knowledge. It is therefore recommended that teachers consider themselves scholars so long as they are engaged in teaching.

To the further general advantage of the schools, trustees are inclined more than formerly to retain the same teacher a longer period. With few exceptions, where teachers are properly doing their duties, changes are not made excepting at the option of the teacher.

New libraries have been formed under the State Public School Library act in five districts, and the same number of districts have increased those already established.

A Joint Resolution, passed by the Legislature of New Jersey, and approved February 21st, 1884, authorizes the Governor "to issue a proclamation annually, setting apart a day in April for the planting of forest trees, and recommending that the day be devoted by the people to that purpose." By an act approved April 14th of the same year, it was made the duty of schools to observe Arbor Day with appropriate exercises. April 18th, 1884, was designated as Arbor Day by the Governor, at which time the above acts were not published. A few of our schools, however, voluntarily observed the day, and planted their commemorative tree. The past year the Governor designated April 24th as the second annual Arbor Day. A circular was issued by the State Superintendent, calling the attention of the County Superintendents to the acts above-named, and accordingly I directed the teachers of the county to observe the day in their schools by planting trees where practicable, and by suitable literary exercises. Most of the schools observed the day, and, judging from the reports that I have received, the exercises proved both interesting and profitable.

## UNION COUNTY.

N. W. PEASE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I have the honor to submit herewith my seventeenth annual report of the schools in Union county. The carefully-prepared tabulations, compiled from data furnished me by the local school officers, present facts more tersely and convincingly than any mere formal description can do ; still, in accordance with custom, this double infliction must be endured.

In comparing the statistics of the past year with those of the year immediately preceding, the progress made appears inconsiderable ; but if we compare the condition of our schools now with their condition seventeen years ago, we discover marked improvement, and it is encouraging to note how surely, and, in some years, how rapidly our schools have advanced in efficiency and usefulness. Still, defects there are, to be remedied, and errors to be corrected, but our work is winning its way to the hearts of our people and steadily gaining in popular favor and esteem. Some of the obstacles to success have been removed ; most of the notions of the people have given place to ideas reformatory and practical, many hitherto indifferent to our school system are convinced that our public schools are worthy of their attention and support, and that the promotion of intelligence and morality lies in the direction of popular education as provided by the State. Still, the fact that so many are not as yet individually interested, while the attention of others is so entirely absorbed in various business affairs, necessarily retards ; yet, if those who have the interests of our public schools in charge are faithful and discharge their important duties with wisdom and equity, their efforts will ultimate be crowned with success, and those who come after them will have cause to bless their deeds and cherish their memories.

One great source of difficulty—one which annoys every earnest

teacher and which often prevents thorough, systematic instruction in some of our schools—is irregular attendance. This is generally the fault of the parent rather than of the child. Through indifference, avarice or willfulness, the pupil is sent to school one day and kept at home the next, or perhaps he is sent one week and then kept out for a month. Because of this the child suffers much loss, but the class, the teacher and the public suffer loss as well.

To the public school teachers the people are under many and weighty obligations. What adult who, when a child, attended a public school, does not review the past with feelings of gratitude toward some faithful instructor? It affords me pleasure to say the people of this county seem to appreciate the worth of teachers, to value their services, to sustain them in their trying positions, and to seek to elevate the standard until the profession of teaching shall be recognized as readily as that of law or medicine. This profession is certainly second to no other. To train, educate and develop the plastic mind and heart of the child is a great and a delicate work. In fact, it is a mission none should dare undertake unless thoroughly equipped and trained for it. Teachers should not only be well educated and possess the faculty of imparting knowledge, but they should also possess ability, tact and wisdom not found in books or gained in schools. Nor should they be mere imitators. With respect to the teachers of this county, I would say I have generally found them worthy of the positions they hold, and with a single exception, they have ever shown a willingness to follow the suggestions of principal and Superintendent. Indeed, it is but justice to them to say that for me they have always manifested the kindest feelings and shown the highest respect.

Of our course of study and of the method of annual examination, but little has as yet been said. Perhaps a brief statement here may prove of some interest to others.

Appreciating the advantages of a better classification, eight years ago we arranged a graded course of study and instituted an annual examination to be held in June. After a period of six years, a revision of the curriculum was made and a brief manual of instructions and suggestions appended, in order that a more perfect uniformity in management and method might be secured. The results are highly satisfactory. It has been demonstrated that the small country schools, where only one teacher is employed, can be approximately graded, better classification established, and far more systematic work performed than ever before. In the larger schools, however, the improvement is most apparent. The division of labor, by which each class and grade has its own appropriate work laid out, each forming one of a series of links from the lowest in the primary to the highest or graduating class of the supplementary grade, is of the greatest value.

The advantages of this course of study cannot fail to be apparent to any intelligent, observing, reflecting educator. Under such conditions as are thus established, every competent teacher, on taking charge of a class, can readily survey her field, arrange a programme for her daily guidance in the subjects she is to teach, and for which she alone is responsible; and her success or failure in the work will be shown at the annual examination by the County Superintendent, and the facts duly reported to the local boards. A record of the results of each examination is also made in a book kept for the purpose in the Superintendent's office.

The course of study provides for five primary classes, the work covering a period of five years. Much care has been taken to provide for thorough instruction in this grade; for it is here schools often fail. All things being equal, if the foundation is well laid in the primary, the subsequent work will prove satisfactory; otherwise not. The grammar grade provides for three classes, three years, and the supplementary grade also for three classes, three years. Thus the course of study for the average pupil, furnishes work for eleven years. Few complete it in less time, many will take twelve or thirteen years. Beginning with the fifth primary class, we advance step by step through that grade, the first class of which forms the connecting link with the third grammar class, and supplies it with promotions after each annual examination. In the same way the third supplementary class is supplied with pupils from the first grammar class.

In connection with the more formal text-book lessons, we give much prominence to oral instruction, with objects, especially in the primary classes. It is all-important here that correct habits of thought, attention, memory, self-reliance and self-help be diligently cultivated. This can never be done by the use of merely formal lessons or study of text-books. It is in this grade especially, the voice, action and influence of the live, earnest teacher must be brought into play, as by a careful study of the mind of the child and diligent preparation for her work, employing the best methods, exercising sound judgment, great wisdom and inexhaustible tact, she daily trains and moulds the minds of her pupils. Such instruction tends to a healthy mental development; it inspires pupils with confidence in their own powers, cultivates facility of expression, and enables children to tell clearly and intelligently what they think of the subject or topic under consideration. Soon pupils thus trained, begin to use pencil and pen, and, with suitable encouragement, form simple sentences. This new mode of telling is exceedingly attractive to pupils, thought is stimulated, the power of expression rapidly developed, the mind disciplined, pupils deeply interested and unconsciously advanced, becoming more diligent, confident and

happy every day. In the grammar classes the same general plan is pursued. The aim is to enable pupils to secure a thorough understanding of the subject under consideration, to acquire the ability to discuss intelligently the principles involved, and to know their practical bearings rather than to be content with mere recitation of textbook verbiage. The mastery of a subject, a clear, correct understanding of principles and their applications, are considerations of primal importance. In the supplementary classes similar methods of an advanced type are employed. To produce thinkers is far better than to produce reciters, merely. Subjects and objects for thought must be brought forward by the teacher daily. Scattered all along our way, we, as teachers, find an endless variety of facts and truths in the progress of invention and discovery, also in science, literature, art and civilization. These should be wisely gathered up and presented to pupils in a manner adapted to their comprehension, and thus lay them under tribute to add to the knowledge, happiness and future usefulness of those under instruction. They should be encouraged to visit the work-shop, the artisan's bench, the manufactory and other kindred places, that they may gather information and valuable facts relative to the industries of the town, city or borough in which they reside. A boy will learn vastly more in a few hours thus spent than by the study of text-books only for weeks. The habit of inquiry and observation established in this way is of incalculable value. Nature also supplies an available, ever-present and inexhaustible fund for the observing inquirer. Wherever they go, our pupils may be trained to see, hear and learn lessons of profoundest wisdom from her unnumbered voices. It is the work of the teacher to point out the way, to suggest, to lead pupils to cultivate habits of observation, and thus bring them to acquire such practical knowledge as lies all about them, contiguous like atmospheric zones, inviting exploration and promising abundant reward.

In my official visits upon the schools I have found many evidences of the good resulting from the methods just mentioned. Pupils are more regular, more prompt, more deeply interested in their work, more self-reliant and self-hopeful, more intent upon discovering for themselves, more thoughtful, diligent and orderly.

Arbor Day was generally observed, trees planted and appropriate exercises employed. Many of the principals kindly furnished me with written reports, together with programmes of exercises. The effect has been wholesome, and the time well employed.

Quarterly examinations of candidates for teachers' certificates were regularly held, at which eighty-three candidates presented themselves. Certificates were granted as follows: Thirteen first grade, eighteen second grade and thirty-eight third grade. Fourteen candidates failed.

School visitation is the most pleasant and profitable line of work the Superintendent has to perform, and were the compensation adequate for his support, so that all his time could be spent in the duties of the office, far better results would ensue. There are twenty-one districts in the county, exclusive of cities. During the year sixty visits upon schools and one hundred and twenty-eight visits in individual class-rooms were made. This work consumed much time and occasioned much travel, but no department of the work has been richer in results. The schools have generally been found in a satisfactory condition.

Reports of school officers came promptly to hand, save in a few instances. More care should be exercised in forwarding teachers' reports, library reports and District Clerks' reports, from three districts. Special district taxes have been levied in all the districts save one, No. 21, Branch Mills. The interest manifested by the people of that district is not what could be desired. The trustees make every effort possible, but without avail.

Few changes of teachers have been made, save at Linden, No. 1. In that district the entire corps was not re-engaged in August for the following year. This course was considered best by a majority of the Board of Trustees. Mr. H. C. Wright, the principal, was highly esteemed and many of the people express deep regret that he is not to return.

Mr. O. A. Johnson, principal of the Westfield school, No. 10, has accepted a position in an adjoining State, and has been succeeded by Superintendent John A. Demarest, of Bergen county.

The Union County Teachers' Association has done good work the past year. Under the direction of President I. P. Tours, every session has been rendered highly interesting and profitable. Teachers of the county have furnished the essays and discussions, only two failing to respond to the President's call. A reading circle is now established in connection with the association. There is entire uniformity of text-books in the county. Most of the districts furnish books and supplies to pupils free of charge. This is wise and helpful in every way, and true economy as well.

The need of charts, appliances and apparatus for instruction, however, is deeply felt in several districts. It is expected that Boards of Trustees will give early attention to this matter. Its importance is too apparent to require further mention.

The number of graduates from the supplementary grade of our schools, in June last, was twenty-eight, distributed as follows: Five from Cranford, No. 9; nine from Westfield, No. 10; five from Scotch Plains, No. 14; one from New Providence, No. 18; five from Summit, No. 19; two from N. Roselle, No. 25, and one from Lyons' Farms, No. 28.

Graduating exercises were held at which crowded audiences evinced their interest and delight. I was present at three of them and can testify heartily as to their excellence.

In concluding this report I render sincere acknowledgments to teachers, school officers and patrons for the courtesy, respect and consideration uniformly shown me.

---

## WARREN COUNTY.

ROBERT S. PRICE, SUPERINTENDENT.

*Hon. E. O. Chapman, State Superintendent :*

SIR—In connection with my annual statistical report forwarded to you as the law requires, it gives me pleasure to submit this brief but encouraging statement of the condition of the public schools of Warren county. In compiling the statistical report I was able, by the assistance of the teachers and districts clerks, to make a full and correct report of the condition of every school in the county.

The number enrolled in the registers during the year was eight thousand seven hundred and five, being more than eighty-three per cent. of all the children of school age in the county, and a greater per cent. than has been reported for any previous year. When we deduct from the census the number attending private schools, and make a reasonable allowance for the number sick and those who, on account of other disabilities, are unable to attend school, it leaves but a very small per cent. of our children wholly neglecting their educational advantages.

There were employed one hundred and fifty-three teachers; sixty-one males at an average salary of \$42.46 per month, and ninety-two females at an average salary of \$31.12 per month. A majority

of the schools were kept open ten months, and the average time made was more than nine and a half months.

The number of children the school-houses will seat comfortably is eight thousand six hundred and sixty-nine, being fifty-six less than the number enrolled in the school registers. In Phillipsburg, Washington, Oxford and in some of the rural districts the increased attendance demands an increase in the seating capacity of our school buildings, which will undoubtedly soon be provided; for our people are learning that no better investment can be made than to furnish good educational facilities for their children.

In many of the districts the school property has been improved by repairing and refurnishing the buildings, and in some cases by fencing and beautifying the grounds. In District No. 16, Harmony township, principally through the efforts of an energetic clerk, a new and commodious school-house has been erected, on a large and convenient lot, and furnished with modern desks.

I issued a circular calling the attention of the teachers to the Governor's Arbor Day proclamation, and nearly every school observed the day by planting ornamental trees and holding exercises appropriate to the occasion.

Teachers' examinations were held at the appointed times and one hundred and sixty-two certificates were granted; three of the first, thirty-eight of the second, and one hundred and twenty-one of the third grade. Sixty-eight applicants were rejected. Among those receiving third grade certificates were a number from sixteen to eighteen years of age, graduates of our own schools. Two passed the examination under sixteen, the required age for a certificate. Many under the age of eighteen can pass the examination required of third grade teachers, but they are too young to properly govern a school, and should not receive certificates. They should not be enrolled as teachers before they have passed the age of enrollment as scholars.

Two hundred and four school visits were made during the year, and I have by these visits endeavored to encourage and aid both teachers and scholars, and, so far as possible for me to do, to promote the efficiency of the schools. Very few schools can be reached by rail, and I am compelled to make my visits with horse and carriage. This mode of traveling over the mountains of Warren, the great number of miles necessary to reach all the schools, is no easy task, yet the prosperous condition in which I find many of the schools and the cordial manner in which I am received by the teachers and scholars, makes it the most agreeable part of my work. Visiting schools seems to be the only way we have of ascertaining the ability and merit of teachers. The examinations test their

knowledge of books, but not their aptness to teach or their power to govern. Our teachers, with very few exceptions, are progressive and fully devoted to their work.

Commencement exercises were held by the schools of Phillipsburg, Hackettstown, Washington and Oxford, and the graduates acquitted themselves with credit. The people are interested in these exercises and large audiences attend them.

By the resignation of Mr. J. H. Brensinger, Superintendent of the schools of Phillipsburg, we lost an excellent teacher, and a gentleman of high educational attainments. His place has been ably filled by Mr. Edwin C. Beers, who has been for several years Principal of the High School. Mr. Beers is competent and energetic, and his efforts will undoubtedly meet with success.

We are heartily in sympathy with the Compulsory Education law, and are endeavoring to enforce it. In some districts, where no constable resides, Boards of Trustees have appointed truant-officers, and we hope, by the aid of the law, to greatly increase our school attendance. The law is both just and consistent, for the people, being compelled to pay tax to maintain free schools in the State for the purpose of having the children grow up self-supporting and to make them good citizens, have the right to ask for and to enforce a law compelling them to attend school and receive the benefit the money is designed to give.

The following items of interest are taken from our annual school data:

Total State school moneys.....	\$52,420 62
Amount received from State school tax.....	49,452 85
Amount received from State appropriation.....	2,967 77
Amount apportioned to each child from the \$100,000 State appropriation.....	.28085
New rate per child in districts receiving more than \$350 each.....	4.16260
Number of children, according to the school census of 1884.....	10,567
Number of children in districts receiving more than \$350 each.....	7,285
Number of children in districts receiving \$350 each.....	2,913
Number of children in districts receiving \$200 each.....	369
Number of districts in the county.....	88
Number of districts entitled to \$350 each.....	51
Number of districts entitled to more than \$350 each.....	26
Number of districts entitled to \$200 each.....	11

During the year I have given my undivided time to the schools, laboring faithfully to raise the standard of education in the county, and, through the assistance of Mr. J. L. Terwelliger and Mr. Edwin C. Beers, members of the County Board of Examiners, and the hearty co-operation of the teachers and of the State and county officers, I am gratified to know that some progress has been made.

# REPORTS OF CITY SUPERINTENDENTS.

## ATLANTIC CITY.

S. D. HOFFMAN, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I have the honor and pleasure to submit this my first report of the public schools of Atlantic City.

Since the last report made by my worthy predecessor, Dr. O. H. Crosby, he "has passed to that bourne whence no traveler ever returns," mourned by a large circle of friends.

During the last year of his faithful service, a fine, commodious building was erected on Arctic, below Texas avenue, in the western portion of our city. We now have three school buildings, of which we may be justly proud, and which may be classed "very good," and one, owing to improper ventilation, insufficient seating capacity, &c., "only middling."

Before another year, however, we will be absolutely compelled to supply greater facilities for the primary pupils in the central portion of our city, and the Board of Education will ask for a new building on Pennsylvania avenue, to take the place of the one referred to above as only middling.

Arbor Day was duly observed with appropriate exercises, tree-planting, &c., and an interest awakened that will doubtless assume greater proportions the coming year.

Our first Union Institute was held early in November by the teachers of Camden and Atlantic counties and our city teachers, productive of much good, and our thanks are hereby tendered you for

the encouragement and valuable instruction given, also to the Institute instructors, and especially to the very efficient County Superintendents, F. R. Brace and S. R. Morse, upon whom the burden fell.

The regular examinations have been held with gratifying results, the teachers all manifesting an earnest desire to secure higher grade certificates.

Regular stated meetings are held by our teachers for mutual improvement, and a lyceum formed wherein are found all the leading magazines, dailies and educational periodicals.

The greatest sympathy and harmony exist between the teachers and the pupils, the same being attested by the decreased percentage of demerits, tardiness and absence.

Of the nineteen teachers employed, fourteen were in service here last year, and eight have been teaching in our schools from three to five years.

Principals Morse and Hanson are doing excellent work, and are now busily engaged in getting up a lecture course, the proceeds of which will be used in purchasing more dictionaries, school apparatus, replenishing school library, &c.

The annual written examination was held in all the departments, the second week in May, and the promotions were made two weeks later. By thus having promotions later than in former years, a smaller percentage of pupils drop out before the close of the school.

My thanks are due and are hereby extended to the individual members of the Board of Education and to City Council, the first for their hearty co-operation in all things tending to the advancement of the best interests of our schools, in supplying new books, furniture, general appliances, &c.; the second for the kindly manner and unanimous action in making such liberal and general responses by way of appropriations.

The graduating exercises of our High School department were held in City Hall on the evening of June 5th, which reflected much credit upon both teachers and scholars, as per favorable mention made by the press.

## BRIDGETON.

WILLIAM EDWARD COX, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

Our work during the year just ended has been much the same as in previous years—we are sure we are doing no worse and we cannot honestly claim to be doing very much better. Our schools are well equipped and faithfully worked from day to day, and under our present regulations perhaps we cannot attempt anything different from our present management.

Our greatest difficulty exists in the Primary Departments—we have too few class rooms, and as a consequence frequently crowd from sixty to seventy-five in one room. When we consider the fact that over ninety per cent. of school-attending children have finished their school days at the age of fourteen, it would seem to be the wisest policy for all cities to provide the best of facilities in this department. I am afraid some of us are watching our neighbors to see existing evils in this particular, and excusing ourselves that we are no worse than they.

This condition makes the compulsory education law a dead-letter with us and we presume with the most of our cities.

The new school-house, which, as mentioned in our last report, we expected to occupy at the beginning of the calendar year, did not get finished, and so we could not enter it this school year. We are comforting ourselves, however, in the fact that our City Fathers have builded so wisely. The site is one of the best in the city. The building has eight rooms, and is almost a counterpart of our Second Ward school; heated with steam and provided with plenty of blackboards of solid slate. Some of our citizens criticised the location as being too far in the outskirts, but unless we are much mistaken less than five years will show the wisdom of the choice, for our city is growing rapidly in this direction.

TEACHERS.—At our annual election our corps of teachers were

again unanimously chosen, with the exception of Miss Virginia A. Osborn, who resigned. Miss Rosilla Babcock was elected in her place and Miss Anna G. Nicholson an additional teacher.

For the new building the following teachers were elected (the school being made the grade of secondary): Principal, Miss M. E. Foster, one of our most efficient and experienced teachers; and Misses Swing, Hubbs, Humphrey and Appelgate.

Near the close of vacation, Mr. W. F. Robinson, Principal of the Third Ward school, tendered his resignation in order to accept a position as Principal of a new school at Elizabeth, to which he had been unanimously called. It gives me great pleasure to add that Mr. Robinson was a most faithful and efficient teacher, whose efforts were constantly directed towards making his work more practical. For his successor, Mr. Alfred B. Ames was chosen. He comes to us very highly recommended, and is to fill the position held by his father about a dozen years ago.

At the re-organization of our Board Messrs. Loper and Trenchard retired and were succeeded by Messrs. Bright and Miner, and Mr. Bright was elected President.

Mr. Bright has been in the Board in former years and Mr. Miner is one of our most public-spirited citizens, and we have no doubt but that both will make valuable members.

---

## CAMDEN.

HENRY L. BONSALE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

Accompanying the specific statistical report on "the condition of the public schools," it is proper to say in a general way that we have taken especial pains to make our school buildings conform to the

most modern and enlightened requirements in heating, lighting, ventilation, drainage and other sanitary matters. Of thirteen buildings owned and operated by the Board, only one is in bad condition, and this will soon be dispensed with.

Educationally, Camden, the most considerable city in the lower part of the State, is exceeded by but three others, and, under the shadow of a great city, is compelled to keep abreast with advanced theory and practice. Following no patent plan and wedded to no hobby or ism, a corps of competent and conscientious district principals have nevertheless been induced to avoid the ruts of routine into which conservative schoolmen fall so easily, and from which they find it so difficult to extricate themselves in the graded system.

It is impossible, within the limits of a necessarily circumscribed communication, to even clearly outline what is meant in this statement. There has been nothing revolutionary here in the sense of accepting or rejecting any of the numerous "systems" formulated for the edification and comparison of educators. And yet we are conscious of having made substantial advancement. In brief, it may suffice to say that, in common with our county coadjutors, we have endeavored to make brains weigh as much in the balance as any other part of the educational machine. In a community where so large a proportion of the pupils attending are poor, the object is, while neglecting none of the branches of a full scholastic course, to admit of a free circulation through the different grades, and advance the apt student without a too nice regard for the rigid requirements of the general examinations, one of which more or less thorough inquisitions we find to be sufficient at the close of each year's term. That is, discarding the cramming for frequent examinations, which we are satisfied gives no true test of enduring capacity, we promote the deserving on monthly class average and general performance at any time desirable. Nor do we, without other good and sufficient reason, hold back the otherwise bright boy or girl who should be through school and out helping themselves and the parents who have helped them, because of failure, even, to show themselves "up" in some of the less essential branches. This plan we pursue on the theory that the great majority of the pupils can only take, retain and use the more practical knowledge imbibed, while those who have opportunity and inclination can take nine grades in nine or nineteen years, if they will, where the element of time is of no value in the "finishing" of an education. This latter consideration applies to those whom we train for teachers, and who must show proficiency in what is equivalent to the high or normal school course.

We will build one new twenty-thousand-dollar school-house this year, which, among other accommodations, will contain a room for meetings of the Board of Education which are now held in a school-

room, the lack of room necessitating the utilization of every square foot of floor space. With a rapidly-growing population, we should have still more ample accommodation, being compelled to adopt the half-day session plan in the primaries, which, however, has been found to work well.

---

### ELIZABETH.

J. AUGUSTUS DIX, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

In my annual report, two years ago, I mentioned the fact that the sum of \$15,000 had been put in the tax levy for the purpose of building a new school-house, and last year I stated that unexpected difficulties, arising from our unfortunate financial situation, had necessitated so much delay that we were only then in a position to begin the work.

On the second day of December, 1884, the corner-stone was laid, with appropriate ceremonies, and then work ceased for the winter. It was resumed, however, in the spring, but as the appropriation of 1883 was inadequate, the contract price for the building being \$23,723.67, and as no further appropriation could be secured, the condition of the city preventing the ordinary tax levy, it became necessary to resort to an act passed in 1882 (P. L., p. 250). This law permits the site of a new school building to be mortgaged, the building, when erected, to become additional security. As the law requires the interest on such loans to be levied by the same officers who assess school taxes, and as the property itself is not subject to taxation for any purpose, the security is ample. It was found that about \$15,000 would be needed to complete the building and properly equip it, and a special committee was appointed to raise the money under the act referred to, either by the loan of the whole amount from some institution or individual, or by small loans from

different persons, bonds to be issued, secured by a mortgage to a trustee. The latter course had to be adopted, and the committee having met with sufficient success to warrant it, the work has been pushed forward and the building will no doubt soon be completed.

In the meantime, preparations for the organization of the new school have been made and a principal has been appointed. There were between thirty and forty applications for the position, and, after diligent inquiry, Mr. W. F. Robinson, of Bridgeton, N. J., was selected. The teachers of schools formerly known as Nos. 5 and 6 have been transferred to his care, although occupying, temporarily, the quarters in use last term. The new school is known as No. 4, and, although a large building, will probably be well filled as soon as it is opened. This suggests the subject to which I have so often called attention in the past—the great lack of sufficient school accommodations in this city. This state of affairs has existed for a long time, but this year matters were made worse by the burning of School No. 6, on the twentieth of March. This was a frame building, rented by the city, and used as a primary school; it was in the district for the new school and was to be discontinued on the completion of the latter. Temporary accommodations were secured for the scholars belonging to No. 6 in a dwelling-house opposite the new school and in School No. 5, certain classes in the latter school being transferred to School No. 2 and placed in cloak-rooms, temporarily fitted up as class-rooms. The use of these cloak-rooms was a great inconvenience, but was rendered necessary because it had been found impossible to secure other quarters. The new school-house will provide much-needed accommodations in the western part of the city, but our necessities are so great that we should at once have three more buildings for primary schools; one in the Second ward, another in the Fifth, and a third in the Eighth.

The appointment of Miss M. E. Habberton as instructor in industrial drawing, mentioned in my last report, has given great satisfaction. Although the exhibit for the New Orleans Exposition was prepared but a comparatively short time after she took charge, one of the three samples of school-work from New Jersey, presented to the French Commissioners, at their solicitation, was a volume of drawings from Elizabeth.

The past year has witnessed no marked changes in methods of school-work. The appointment of experienced teachers in the lowest primary classes, the half-day attendance in crowded rooms in the primary departments, the war with tardiness, all continue as heretofore. Our system of teachers' certificates and the requirement that candidates without previous experience as teachers should visit the schools, study our methods, assist in teaching or do such other work as the principals may assign to them, have continued to give satisfaction and seem well adapted to the circumstances in which we are

placed. As this matter has of late attracted considerable attention, I would refer any one interested in the subject to detailed descriptions of our methods to be found in my reports to the State Superintendent in 1881 and 1882.

The examination of the graduating and second classes in the High School Departments, upon printed questions issued by me, began on Monday, June 15th, and closed Tuesday, June 23d, and the examination of the graduating classes in the Grammar Departments began Wednesday, June 17th, and also closed on the 23d. The number graduating from the High School Departments was eighteen, from the Grammar Departments, fifty-eight. Two scholars in the graduating classes in the High School Departments, and thirteen in the Grammar Departments failed. The number examined in the second High School classes was twenty-nine, and of these three failed. In the High School Departments scholars were required to obtain an average of seventy five per cent. without falling below sixty per cent. in any study. In the Grammar Departments the average required was seventy per cent. and the minimum allowed in any study was fifty per cent.

The papers used were the following :

#### GRAMMAR DEPARTMENT.

##### SPELLING.

The *principal* of the *teachers' institute* lectured on *physiology* and *astronomy*. The *legislature* is in session at the *capitol* in Trenton. *Scholars* should become *versed* in the *principles of science*, and should *practice* those of *morality*. A *geometrical series* *progresses* by a common *multiplier*. The *gladiators* entered the *arena* of the *amphitheatre*. *White bears* *inhabit* *arctic regions*. *Mathematical treatises* are much used in *engineering*. *Bread* is raised with *yeast*. A youth bred in *idleness* may well be *pitied*. Large quantities of *flour* are shipped to Chicago. *Wolves* prey upon *weaker animals*. A *suitable* site was *selected*. The city was *razed* to its *foundations*.

##### ENGLISH GRAMMAR.

1. What is meant by *case* in nouns and pronouns? How many cases are there?
2. What is a preposition? Give a list of ten words commonly used as prepositions.
3. How are adjectives regularly compared? What is the difference between an adjective and an adverb?

4. Write a *proper* noun; a *common* noun; a *collective* noun, and an *abstract* noun.

5. Correct the following in regard to capitals and punctuation :  
mister jones. will you please Excuse my Son james next monday at 10 o'clock

peter SMITH

6. Decline each of the personal pronouns.

7. Write a sentence or sentences containing eight different parts of speech (or classes of words), and above one word of each class write the name of the part of speech to which it belongs.

8. Write a regular verb and an irregular verb, giving the principal parts of each.

9. Write a sentence (or sentences) in which *that* is properly used as a *relative pronoun*; an *adjective*; a *conjunction*.

10. What determines the number and person of a verb? Have the nominative and objective cases of nouns different forms?

#### ARITHMETIC.

1. Three men gain \$2,640, of which B. is to have \$6 as often as C. \$4 and A. \$2; what is each one's share?

2. What will be the cost of removing the earth from the cellar of a house 48 ft. 9 in. long, 32 ft. wide, and 9 ft. deep, at 57 cents per cubic yard?

3. A teamster agrees to cart 132 bbls. of flour for a merchant on Monday, 84 on Wednesday, and 108 on Friday; what is the largest number he can carry at a load, and yet have the same number in each load?

4. If I own  $\frac{5}{7}$  of a farm, and sell  $\frac{2}{3}$  of my share for \$2,300, what is the value of the whole farm at the same rate?

5. A pasture of a certain extent supplies 30 horses for 23 days; how long will the same pasture supply 21 horses?

6. Henry Smith bought of John Clarke, of Louisville, Ky., as follows: Dec. 10th, 1884, 7 pairs calf boots, @ \$5.75; 6 pairs ladies' gaiters, @ \$3.25; 10 pairs children's shoes, @ \$1.75; Jan. 10th, 1885, 12 pairs coarse boots, @ \$3.12 $\frac{1}{2}$ . Make out and receipt the bill, as clerk of John Clarke.

7. Extract the square root of 1,104,601.

8. What is the amount of \$1,450.40 from April 19th, 1872, to August 3d, 1873, at 6 per cent.?

9. A cistern can be emptied by 7 pipes of equal capacity in 35 minutes; in what time can it be emptied if only 5 pipes are open?

10. Change .0003 to a common fraction and reduce to its lowest terms.

Change  $\frac{3}{800}$  to a decimal.

## UNITED STATES HISTORY AND CONSTITUTION.

1. Who occupied the coast of North America when the first European explorers came? What has been their history since the arrival of Europeans?

2. How and by whom was Rhode Island founded? What were the habits of the settlers in this colony as to religious toleration?

3. Who first proposed independence in the Continental Congress? When was this? Who wrote the Declaration of Independence? When was it adopted?

4. Who was Benedict Arnold? What treason did he plan? Describe the capture of Andre.

5. What was the Missouri Compromise? In whose administration was it virtually repealed, and how?

6. Who was Capt. John Brown? What did he attempt to do? Describe his raid.

7. Give an account of the formation of a Confederacy in the slave States? What occurred at Fort Sumter early in 1861?

8. Describe the contest between the "Monitor" and the "Merri-mac." What was the "Emancipation Proclamation?" When and by whom was it issued?

9. How often and at what time does Congress assemble? Under what circumstances and by whom may extra sessions of Congress be called?

10. What officer is Commander-in-Chief of the army and navy of the United States? In whom is the power to make treaties lodged, and what consent is necessary? What is treason against the United States?

## GEOGRAPHY.

1. Name three rivers, each forming part of the boundary between the United States and some other division of North America.

2. The rivers Rhine and Rhone—which is the French and which is the German river, and which flows northerly and which southerly?

3. In which State are the White mountains? In which the Green mountains?

4. In what State, and on the shore of what, is Chicago situated?

5. What two ranges of mountains are on the boundary line between Europe and Asia?

6. If a line be drawn on a map of the world, from Greenland to the Cape of Good Hope, what ocean will it cross? From Alaska to Cape Horn? From Africa to Australia?

7. What mountain system in the United States is nearly parallel

with the Atlantic coast? Into what do the rivers on the eastern slope flow, and into what those on its western slope?

8. What body of water, in size approaching the Gulf of Mexico, is comprised within the limits of North America?

9. What countries of Africa border on the Mediterranean sea?

10. What country of South America has no sea coast? What large river flows through Venezuela?

## HIGH SCHOOL DEPARTMENT.

### SECOND CLASS—PHYSIOLOGY.

1. What is the bony frame-work of the body called? How many bones are there? How do bones grow? How does a broken bone heal?

2. How many bones unite to form the spinal column, and what are they called? By what are these bones separated? Where is the spinal cord located?

3. What are the uses of the muscles? What are voluntary muscles? Involuntary muscles? Give an example of each.

4. Describe the process of digestion.

5. Define digestion, absorption and assimilation of food. What is the alimentary canal?

6. Of what does the blood consist? What are the arteries? The veins? The capillaries?

7. How does venous blood differ from arterial blood, and how and where is it changed into arterial blood?

8. What is the average temperature of the human body? How and where is the heat of the body generated? How is it distributed?

9. What are the uses of the hair? How does a hair grow? Is there any feeling in a hair?

10. State some of the evil results of rapid eating. Should we labor or study just before or after a meal? Give the reason for your answer.

### UNIVERSAL HISTORY.

1. Give a sketch of the career of Alexander the Great.

2. Who were the Gracchi, and what measures did they propose? Tell what you know about them.

3. Give a brief account of Alaric, Attila and Genseric.

4. State the peculiar features of the Feudal System. What were the effects of this system upon the manners and state of society of the Middle Ages?

5. Sketch the character and career of Alfred the Great.
6. State all you can about Mary, Queen of Scots.
7. What were the causes of the French Revolution? Narrate the events that led to it.
8. Give an account of the Reign of Terror.
9. Give the history of Prussia during the reign of Frederick the Great.
10. Who was Oliver Cromwell? Tell what you can of his career.

## NATURAL PHILOSOPHY.

1. What is mass? Density? Weight? A solid? A liquid?
2. What do you understand by "centrifugal force?" Is it really a force? Give the reason for your answer.
3. What is a lever? Describe and give an example of each of the three kinds.
4. What is a simple pendulum? Explain the use of the pendulum in time-pieces.
5. Define cohesion. Adhesion. Give an example of each. What is capillary attraction?
6. What is energy? What is a foot-pound? A horse-power?
7. What is the amount of atmospheric pressure to the square inch on the human body? Why is the body not crushed?
8. Which moves with the greater velocity, sound or light? Give an illustration.
9. Into what seven colors may solar light be decomposed, and how? What phenomenon in the heavens is produced by the decomposition of solar light?
10. Explain why a straight stick plunged into water appears to be bent?

## GRADUATING CLASS—ALGEBRA.

1. Reduce  $\frac{b}{x + a^{-1}}$  to a simple fraction.
2. A. and B. can perform a piece of work in 8 days; A. and C. in 9 days, and B. and C. in 10 days; in how many days can each perform it alone?
3. Required the  $n^{\text{th}}$  power of  $-6a^3 b^8$ .
4. Expand  $(3a + 2b)^4$ .
5. Required the value of  $\sqrt[5]{243x^5y}$ .
6. Reduce  $4\sqrt{\frac{3a^3}{8b}}$  to its simplest form.

7. Find the value of  $\sqrt[3]{16a^3b} + \sqrt[3]{4a^2b} + \sqrt[3]{54a^3b} + \sqrt[3]{a^2b}$ .

8. Given  $\begin{cases} x^2 + y^2 + x + y = 18 \\ 2xy = 12 \end{cases}$  to find the value of  $x$  and  $y$ .

9. A sum of \$1,000 has to be divided equally among a number of persons, but two new claimants appearing, it is found that each person will receive \$25 less than he expected. Required the original number of persons.

10. Two farmers drove to market 100 sheep between them, and returned with equal sums. If each of them had sold his sheep at the same price that the other actually did, the one would have returned with \$180 and the other with \$30. At what price per sheep did they sell respectively, and how many sheep had each?

#### GEOMETRY.

1. What is a plane figure? A triangle? Prove that in every triangle the sum of the three angles is equal to two right angles.

2. What is a parallelogram? A rectangle? Prove that the opposite sides and angles of every parallelogram are equal to each other.

3. What are the first and third terms of a proportion called? The second and fourth? What are the first and fourth also called? The second and third? Prove that if four magnitudes are proportionals, their like powers and roots will also be proportional.

4. What is the circumference of a circle? What is an arc of a circle? Prove that two parallel straight lines intercept equal arcs of the circumference.

5. Prove that a circle may be circumscribed about, and another inscribed in, any regular polygon.

#### ENGLISH LITERATURE.

1. Who wrote the *Canterbury Tales*? Tell what you can about this work.

2. State what you know about the *Old English Ballads*. When and by whom were they gathered into a volume?

3. What is Shakespeare's position in English literature? How does he portray character? How does he express strong emotion?

4. Name the principal works of John Milton. Which is the most famous and to what class of writings does it belong?

5. Who wrote *Hudibras*? *Pilgrim's Progress*? *The Complete Angler*? Tell what you know about *Pepys' Diary*.

6. Give a short account of John Locke and his writings.

7. Give a short account of Alexander Pope and his writings.
8. Who wrote *The History of the Decline and Fall of the Roman Empire*? *The Seasons*? *The Elegy Written in a Country Church Yard*? *The Waverley Novels*? *Childe Harold*?
9. Who wrote *The Culpit Fay*? *Evangeline*? *The Scarlet Letter*? *The Sketch Book*? Which was the first successful novel by an American author?
10. Give a brief account of Bryant's poems, and state the most striking characteristics of his poetry.

## NATURAL HISTORY.

1. Into what sub-classes are Mammals divided? Name a representative of each sub-class. To which sub-kingdom do they all belong, and why?
2. What is the cause of the wide range of varieties in the dog family? Describe the wolf and its habits. What is said of its relation to the dog?
3. What is said of the structure and habits of the common Mole? Describe the arrangements of a mole hill.
4. How are the Cervidæ distinguished from the other families of the Ruminants? What is the office of the "velvet," and how is it disposed of when no longer needed?
5. How do the Moschidæ differ from the deer family? What gives them their name? How is the musk obtained? What is said of the chemistry of this secretion?
6. In what way are birds classified? What are the two divisions of birds?
7. What does the order of Amphibia include? From what does their name come? What is said of their metamorphosis? How do they differ from other reptiles? What is said of their tongues?
8. How do fishes use their air bladder? What is said of the use of the tail and fins in swimming? How is the fish adapted in its nervous system and its senses to its mode of life?
9. Describe the manner in which the silkworm makes its cocoon. Describe the mode of its exit. What are the native countries of the silkworm? What is said of the silk manufacture?
10. What is said of the symmetry of the Radiates? What are the type-families among them? What is said of the locomotion of the Radiates? What of their resemblance to vegetables?

## ASTRONOMY.

1. What are the cardinal points of the horizon? How are they determined? What names are given to the intermediate points?

2. At what angle do the ecliptic and equinoctial cross each other? What is this angle called? What does this prove?

3. Which are the *Major Planets*? The *Terrestrial Planets*? What are the *Minor Planets*? What is their number?

4. How does the velocity of a planet in its orbit vary? When would it be uniform? Why? In the case of what bodies is this true?

5. Do the planets revolve in the same plane? What is meant by *inclination of orbit*? What are *nodes*?

6. What can you say of the position and appearance of the solar spots? What is the black portion called? The dusky border? What changes occur in their number and appearance? What can you say of their duration?

7. What hypothesis is advanced to account for the solar spots? How do the spots appear to move? About what is the time of a complete revolution? What is inferred from this?

8. When is it new moon? Full moon? First quarter? Last quarter? How can the time of a revolution of the moon be found? Why is the synodic period longer than the sidereal period?

9. What can you say of the velocity of comets? The number of comets? Their size? Masses and densities?

10. What are multiple stars? Primary stars? Variable stars? Temporary stars? Lost or missing stars?

#### RHETORIC.

1. What is the derivation of the word *rhetoric*? What did it originally signify? To what has it since been extended? In its widest acceptance, what does it comprehend?

2. What is the object of the useful arts? What of the elegant arts? To which does rhetoric belong?

3. What is *Taste*? What does this term literally signify? What can you say of the universality of *Taste*? What can you say of the difference between individuals in respect to the possession of *Taste*?

4. Prove that pleasurable emotions are not produced by mere impressions on the external senses? To what is the difference in the impressions produced by the same object at different times attributable?

5. Which of the five senses are incapable of affecting the imagination? When do they contribute to the effect produced on this faculty? What senses alone are capable of kindling the imagination? Which produces the more striking impressions?

6. What word is used as an equivalent for *sublimity*? To what are these terms applied? Describe the emotion produced by sublim-

ity. What is the principal source of the sublime? What is the simplest form in which sublimity develops itself?

7. What is the subject of *humor*? How does humor compare with wit in duration? What prevents humor from being tiresome? In what departments of literature is humor extensively employed? What is the aim of humor?

8. What is *mannerism*? From what do the varieties of style take their rise? What is meant by the essential properties of style? Mention them.

9. What is a *history*? An *historical sketch*? What is the difference between a *history* and *annals*? What two things are essential to a good history?

10. What is fiction? What is meant by the *Plot* of a fictitious composition? What is essential with respect to a plot? How is the reader's interest often kept alive to the end? Next to a good plot, what is most important to success in fictitious composition?

#### MORAL PHILOSOPHY.

1. What is right or virtuous action? What is the nature of wrong or sinful action? What is the motive to wrong action?

2. Analyze love, self-denial, faith.

3. Analyze ambition, avarice, pride and vanity.

4. What do you understand by impulsive virtues? Name examples. What do you understand by imitative goodness?

5. What is the seat of moral depravity? In what does it consist? What is moral consistency? Is outward consistency absolutely attainable to finite beings?

6. What is government? Law? What are sanctions? What two kinds of sanctions? What form of government is legitimate?

7. What is the nature of guilt? Can any subsequent virtue offset it? Can it be canceled by punishment? What is the effect of pardon?

8. Define liberty? What is license? What are the limits of toleration? May our liberty of action be limited by our own conscientious convictions? By the consciences of others? By the imperfect views and infirmities of others?

9. What is the origin of the right of property? Mention some of the methods by which property may be rightfully acquired. What are the liabilities of property? What is the general standard of value?

10. What is veracity, as a virtue? What is the significance of the oath? Its rightfulness? How may the obligation of veracity be violated? Discuss the question as to the limits of the obligation of veracity.

## HOBOKEN.

DAVID E. RUE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

The annual report of the condition and progress of the schools of this city is respectfully submitted for the year ending August 31st, 1885.

Our schools occupy six buildings, four of which are owned by the city and two are rented. The sanitary arrangement of our schools is much improved, several important changes having been made during the year. The addition to School No. 1, consisting of six class-rooms, was occupied in February, and was wholly inadequate to meet the wants of the district. Notwithstanding this increase of accommodation, a large number of children will be turned away this fall for the want of room and denied the right and benefit of a free education. With an increase of eight hundred and twenty (820) in the school census for this year, the erection of a new school building is merely a question of time, which cannot be put off much longer.

Our schools are classified as follows :

Normal School.....	1
High School.....	1
Grammar Schools.....	4
Primary Schools in same buildings with Grammar Schools.....	4
Primary Annexes.....	2
Evening School.....	1
Total.....	13

**NORMAL SCHOOL.**—This department of our school system remains unchanged since last year's report. The work of the year was very satisfactory in all the classes. At the annual examination fourteen members of the school received diplomas of graduation.

The regular examinations in our Grammar Schools and High School for promotion and graduation, were held during the month of June with gratifying results. Forty-five (45) pupils were graduated from the High School, which is the largest class ever graduated from that institution.

COMMENCEMENT EXERCISES.—The annual commencement of the Public High School was held in the First M. E. Church, June 24th, at 8 P. M. The programme consisted of essays, recitations and music. The graduates showed unmistakable signs of superior training and culture, and were the recipients of many flattering tokens of esteem. The chief feature of the evening was a stirring educational address by Governor Leon Abbett, who paid a glowing tribute to the school and spoke in strong terms for the cause of higher education.

These gatherings meet with popular favor and are instrumental in awakening new interest in educational matters.

INDUSTRIAL EDUCATION.—Strong efforts are being made by many of our citizens to arouse public interest in the cause of industrial education. A meeting, presided over by General George B. McClellan, was held for this purpose at Castle Point, the residence of the late Edwin A. Stevens, where the feasibility of introducing it into our public schools was freely and ably discussed, and resulted in organizing a society, which sets forth its special object in the following preamble: "The object of this association is to encourage and promote in the cities of New Jersey, the training of both sexes in the industrial arts which affect the home, afford means of self-support, and aid in mental development." The Board of Education has expressed its willingness to concur with the society in its object, and before the termination of another year, the plan will have been given a fair trial, and will, no doubt, prove a successful and popular innovation.

EXPOSITION WORK.—Special mention should be made of the high order of work sent to the Exposition at New Orleans. No special preparation was made for this purpose, but specimens of work done in the class-room from day to day, were selected and copied on blanks prepared for the occasion by the State Superintendent.

The subjects treated included Mathematical operations, Rhetoric, Physical and Political Geography, Physics, Composition, Book-keeping, History, Astronomy, Literature, Analysis and Parsing, Arithmetic, Drawing, Translations from the German Language, a large variety of primary work, and an original poem written for the occasion by one of the high school pupils, Miss Ida J. Lull.

The work throughout was highly commendable for arrangement and neatness, and was rewarded by the Exposition with a Certificate of Merit.

ARBOR DAY.—All of our schools observed the day for the first

time. Each school prepared a programme for the occasion, consisting of singing, addresses, and essays on subjects appertaining to the day. While the exercises were of a high order and peculiarly interesting, it is to be regretted that the main object of the day, that of tree-planting in our public parks and streets, was wholly neglected. A special programme for its future observance in this direction, is under preparation, which will no doubt add to the interest already evinced.

**TEACHERS' MEETINGS.**—The regular Teachers' Association has met from month to month, and has been to a high degree successful. The exercises consisted principally of lectures relative to school-work, and were delivered by the following educators:

"Order in the School Room," by Hon. John A. Demarest, Superintendent of Public Instruction of Bergen county; "The Wonders of Yellowstone Park," by Prof. Leroy Fairchild; "Literature versus Mathematics," by Prof. Brainerd Kellogg, of the Brooklyn Polytechnic Institute; "Curiosities of American History," by the Rev. John Moore, of Brooklyn; "The Best Method of Teaching Penmanship," by Prof. Ellsworth, of New York City.

These lectures were all able and instructive, and were highly appreciated by our teachers.

**EVENING SCHOOL.**—The evening school held in School No. 1, was open as heretofore, four months. Eight classes were organized, two of which were for girls. The object of the evening school is not appreciated by all for whom it is intended, but still many avail themselves of the advantages afforded, who otherwise would remain hopelessly ignorant of the ordinary branches of a common school education. The school was in session sixty-seven (67) nights; there were eight (8) teachers. The total number in attendance was four hundred and fifty-five (455), and the average attendance one hundred and seventy-two (172).

During the year there were seven (7) resignations and one (1) death.

Miss Selina F. Jackson was appointed a teacher in October, and although she taught but five months, gave great promise of future usefulness. She was the beloved of her own home, and her early death was lamented by all her associates.

Upon taking a retrospect of the year's work, I am convinced that at no period of an experience of sixteen years in the schools of this city, have such gratifying results been shown. The teachers have been faithful to their trusts, and have labored zealously at all times to raise the standard of the schools.

The Board of Education has granted every request calculated for the welfare of the department, and has inaugurated salutary reforms which have fully established the necessity as well as the wisdom of their adoption.

## MILLVILLE.

J. A. BOLARD, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

Since sending my last report in 1883, many changes have taken place in our schools which render their efficiency much greater than in former years.

The additions that have been made to school buildings in different parts of the city have to a great extent removed the pressure upon the primary departments and furnished means and opportunity for the accommodation of nearly all the children of the city. We have yet to complain of the number and location of our school buildings, as much better results could be accomplished if the buildings were fewer in number and greater in size. Many of the buildings are pleasantly located but have too little space allotted for play grounds and ornamental purposes.

GRADE.—At the beginning of last year a new course of study was introduced, beginning with the lowest primary and extending through the High School. It is already in excellent working order and promises to place our schools on a par with any in the State. We have thoroughly incorporated Grube's system of teaching numbers, supplemented by Dolan's drill-tables. The work of grading has been carefully performed and a determined effort has been made on the part of all the teachers to support the work already accomplished. The benefit of the new grade manifests itself throughout every department of our schools. Both pupils and teachers evince a deeper interest in their work and are brought into closer communion, a condition of affairs greatly to be desired.

Particular attention has been given to language lessons, original composition and declamation, branches hitherto very much neglected.

It is proposed in the near future to give some attention to industrial drawing as well as music, not as separate studies but as supplementary work to the regular grade.

The primary departments of our schools are in a healthy growing condition, and will, I think, compare favorably with any other in this section of the State. The teachers are active and energetic and are working to the best of their abilities.

In the Intermediate and Grammar departments an effort has been made to render the work of the pupil practical as well as educational. We have not been content with teaching the facts of history and geography, while we left uneducated the faculty to use them. We have not been content to impart a knowledge of grammar as a skeleton of language, and yet leave the pupil without the power to clothe and beautify it with life and thought. The effort has been made to teach our children to understand principles instead of memorizing facts.

In accomplishing these results the teachers and principals of these departments have been wide awake and efficient.

In order to facilitate the introduction of the course of study and render it uniform throughout the city, monthly examinations have been held with the best of results. We have endeavored to cover the whole field of elementary instruction without overloading or overtaxing either pupils or teachers.

**HIGH SCHOOL.**—With the regrading of our schools the course of study in the High School was extended so as to become a means of liberal culture to its pupils in Natural Science, Mathematics and Language. The course now is similar to what it was some ten or fifteen years ago, and ought never to have been reduced; but some so-called *practical* men in our Board of Education, who had a more practical knowledge of the means of earning the necessities of life than they had of the course of study pursued in the High School, so reduced it that it could hardly lay claim to a good Grammar course. The High School is, and should be, the crowning glory of the whole system. The value of its opportunities, in affording to the children of the rich and poor alike a higher education, its potent instrumentality in elevating them to a higher standard of morality, and making them men and women of worth and character, well fitted to assume the responsible functions of citizenship, cannot easily be estimated. One of the most important functions of the High School in this community is the fitting of teachers for the public schools. In no way could suitable teachers, in sufficient numbers, be found, if recourse could not be had to the public High Schools.

The graduating class of last year contained thirteen members—eleven young ladies and two gentlemen; of the ladies, all but one have already entered or intend entering upon the work of teaching. The young men are filling important and responsible positions. Much complaint is made in this city against our Board of Education for employing such young persons as teachers, and perhaps with

Millville - 1888

some degree of reason, but on the other hand, the Board feels that it has no alternative, as it would be political suicide for them to go abroad for teachers, so great is the prejudice of the citizens against employing any but home talent. Many of these, in time, make excellent teachers, and perhaps, after all, the city has as good a right as any other community to suffer for the errors of youth and inexperience which must necessarily attend any community that educates its own teachers.

The commencement exercises were worthy of note, being held in the Opera House, which was packed full of people, many being obliged to go away unable to get even standing-room, thus manifesting the interest taken by the people of our city in educational matters.

**TEACHERS' ASSOCIATION.**—In September, 1884, an organization of the teachers was formed. Its meetings are held semi-monthly and the time devoted to the discussion of practical questions pertaining to the every-day work of the school-room, and general literary culture.

In addition to the regular work, a number of lectures have been delivered before the association by leading citizens, on live topics of the day, which the teacher, in the discharge of his duty, finds little time to study.

**SCHOOL LIBRARY.**—One of our greatest advancements during the past few years has been the establishing of a school library. Entertainment was given and with the receipts of these, together with State aid, we have now an excellent library of over one hundred volumes, which are placed at the disposal of teachers and pupils.

Our purchases have been exclusively works of reference and those pertaining to the profession of teaching, and afford both teachers and pupils an opportunity of obtaining the latest and best methods of teaching. We hope, in the near future, to be able to enlarge our stock with literature and science. Nearly every teacher now subscribes to some educational publication.

**PARENTS.**—Educationally considered, there is among parents a great variety of opinions and actions. While it is true that of all the personal agencies connected with our schools, there are none who should be so much interested as parents, it is also true that few manifest this except by words. Such, whether somewhat intelligent or ignorant, are foremost in finding fault with the school law, with trustee, superintendent or teacher, and often class us all in the same category. With these, taxes are too high, teachers are not more than half as good as they used to be, and are paid too much for the work they perform, are too strict or not strict enough, teach new-fangled ideas by outlandish methods, &c., &c.

Fortunately these are a minority in almost every community, and

the evil they do is overbalanced by the more intelligent. But, to sum up, parents are entirely indifferent. If they would visit our schools more and pay less attention to what their own or what their neighbor's children say, there would be less cause for complaint; pupils would be stimulated, teachers encouraged, and the good objects of our school more nearly realized.

As an evidence of the condition of our schools I might mention the fact that we were one of the nineteen cities in the State that received Certificates of Merit at the recent New Orleans Exposition. We were not first, neither were we the last in this list, and we think, take it all in all, we will fairly average.

In closing this report, we have little but words of commendation to offer for all concerned with our school department, and we firmly believe that a foundation is laid for a new and successful era of advancement for the cause of public education in the city of Millville.

---

## NEW BRUNSWICK.

CHARLES JACOBUS, A. M., SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

SIR—I herewith present to you some facts and figures concerning the schools of New Brunswick, of which, however, I have had the charge for only a part of a year.

The number of children of legal school age as shown by the last report of the Board was four thousand seven hundred and thirty-one. Of these two thousand six hundred and seventy-nine were enrolled in the public schools, and distributed and graded as follows :

High school, four years.....	210
Grammar school, two years.....	312

Intermediate, two years.....	504
Primary, Bayard street, four years.....	536
Primary, Carman street, four years.....	539
Primary, Guldin street, four years.....	339
Primary, French street, four years.....	239
Total .....	<hr/> 2,679

Private and parochial schools admit a large number of scholars.

The per cent. of attendance for the year based upon the average roll in the several departments has ninety-six and one-half.

The entire year has witnessed only three hundred and thirty-six cases of tardiness, with a loss of time in these cases of seven hours and forty-eight minutes.

A careful reckoning, on the basis of attendance twice a day, shows that, on an average, only one pupil in twenty-three hundred was tardy. The pride manifested in this feature reflects great credit upon all concerned.

In assuming the responsibilities incident to my position, I have received the heartiest co-operation, and met with a desire to have the friction, naturally to be expected from a change in the superintendency, as little as possible. The city of New Brunswick has reason to be proud of its faithful corps of teachers. These meet at the High School every month for mutual improvement, in the way of discussion of methods, questions, and the presentation of thought upon different topics by the Superintendent, under whose supervision the meetings are held.

In our duties we feel the need of more co-operation on the part of parents in the mental and moral features of our work, in the holding up of our hands, and the strengthening of our hearts.

The report concerning the library is one of special importance. This is in the High School building and scholars from the High School and the Grammar School have access thereto. Four hundred and thirty-nine volumes have been added in the past year, making altogether a well-selected library of over two thousand five hundred volumes.

The labors of the Superintendent are directed especially towards a high moral standard and as great a thoroughness as is possible in mental features, trying to have the mind not crammed with facts but naturally developed, so as to have the scholar able to think independently instead of trying to advance on mental stilts or crutches.

Increased advantages are promised in the High School in the shape of apparatus, and much more attention will be paid hereafter to experiments connected with the studies of natural philosophy and chemistry.

Faces of parents are rarely seen except in cases of discipline, and these are mainly interviews with the teachers, frequently hindering instead of aiding class work.

Of one thing I am extremely desirous, and that is retaining those teachers best adapted to primary work in the primary schools. Frequently teachers devoid of actual experience are selected for this important work. In most places salaries are so adjusted that it is for the interest of teachers pecuniarily to seek for higher grades in which to teach, while they may be the best qualified to give instruction in the lower grades, in which, if they labor, they should receive compensation equal to that which they might receive in more advanced grades. Changes seem to be taking place in this respect, and it is possible that New Brunswick may yet be affected thereby.

•

---

## ORANGE.

U. W. CUTTS, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent:*

The report of enrollment and the various statistics required have already been forwarded.

The school accommodations in this city were somewhat increased at the beginning of the year by the enlargement of the Valley Primary building to double its former capacity. The growth of population already demands some additional provision, particularly for the children of the southeastern part of the First ward. At present, being enrolled in the Park Avenue School, they are obliged to walk a considerable distance and to cross the railroad track at times of day when trains are frequent.

An appropriation for the establishment of an evening school was made during the year, and the classes have already been started, with

encouraging success. Seven classes, with an enrollment of nearly three hundred pupils, assemble in the High School building for five evenings of the week. There have been no public evening schools in Orange for several years, though several private undertakings have been carried on successfully. For those desirous of obtaining a better education, and who, on account of age or other reasons, are unable to attend the day schools, such an enterprise, rightly conducted, must afford a valuable opportunity.

A class of nine members graduated from the High School in June, six having completed the course of four years, and three pupils that of three years. Of the four young ladies of the class, three intend to become teachers. The graduation exercises were held in Music Hall, at that time the largest place of assemblage in the city, before an audience filling the edifice. The diplomas were presented to the graduates by Commissioner C. H. Mann, with an appropriate and inspiring address. *372 1 90*

The general progress of the schools has been very satisfactory. Without speaking in detail of the various studies, I venture to quote from the Superintendent's annual report to the Board of Education, for the year 1884-5, in regard to industrial drawing: "The wisdom of the plan of introducing industrial drawing into the schools, a few years since, has been fully proven by its success. The capability and the enthusiasm of the instructor, Mrs. Vermilye, are proving very effective in developing an interest and accomplishing thorough work in this department. In the younger primary grades, the regular teacher of the class gives instruction, the work being under the supervision and aided by the suggestions of the special teacher. Plain lines and simple forms are given at the beginning of the course. The child is taught to observe carefully, to imitate with pencil and crayon, to reproduce from memory, from dictation and from objects. Modeling in clay of spheres, cubes and quadrangular prisms has also been done, particularly by the pupils of Miss Morehouse's class, Lincoln Avenue School, and has been shown to be a valuable part of the work. The drawing from objects is an important feature. Original designs, beginning with the simplest, are required at every step, and there is a continuous development of the inventive powers. Going from grade to grade, the study of curves, with their incorporation into designs, also that of the more difficult geometrical forms of perspective, light and shade, and the construction of working drawings, are taken up in course. The mental training and the discipline of eye and hand are of the first importance, while the instruction is such as to be of practical benefit to the pupil in various ways after leaving school. The work contributed to the educational department of the New Orleans Exposition included original designs from pupils of all the schools."

## PHILLIPSBURG.

EDWIN C. BEERS, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I entered upon the duties of my position on the thirteenth day of February, 1885, after the schools had been working almost three-fifths of the school year under the plans prepared by my predecessor. At that late day nothing remained for me to do but to finish the work the ex-Superintendent had mapped out for the year 1884-85, and to prepare for the annual examinations which were then close at hand.

On visiting the different schools I found that the teachers were laboring diligently, but could not make the proper progress on account of the crowded condition of the schools. Before the expiration of two months a Secondary School was organized in the Bruch building, to which I promoted the most advanced pupils from three Primary Schools, and relieved one crowded Secondary School by transferring some pupils from the lowest grade.

One source of trouble has been the desire to accommodate all the children who applied for admission. The course I have endeavored to pursue is, to limit the maximum number in attendance to the seating capacity of the room. Crowded school-rooms injure the health of the pupils, impair the efficiency of the teachers, destroy the order and discipline in the schools and retard their progress. The time for erecting a school building has come. What was needed as a convenience is now demanded as an imperative necessity.

The Primary Departments offer a promising field for future work. I deprecate any system which makes the Primary School a training-school for the novice and promotes the successful primary teacher to a different grade. Where inexperienced teachers are trained, only talented teachers should be employed and competent teachers retained.

Mr. C. E. Griffin, a graduate of Lafayette College, was elected Principal of the High School near the close of the second term.

The English course has received careful attention during the past year, and improvements will be made from time to time until the true standard has been reached. The eleventh annual commencement of the High School was held at the Main Street M. E. Church, on Friday evening, June 26th, when eight young ladies and two gentlemen graduated in a manner which was alike complimentary to themselves and their teachers. The exercises throughout were unusually interesting and of a very high order.

The progress made by the schools has been observed and their defects noted. The schools have not yet reached that proud position where improvement is no longer possible. Supported unanimously by the Board of Education, I shall labor faithfully and earnestly to promote the welfare of all the schools, and raise the standard of education to meet the many requirements of a progressive age.

---

## RAHWAY.

G. R. LINDSAY, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I made my annual report to our Board of Education last April, and I do not know that I can say much in addition, except that our four schools are all well filled with pupils, and under the guidance of able and efficient instructors. The curriculum is as complete as that of any of the graded schools in the State. In addition to the regular studies, I have obtained the permission of our Board to introduce a new feature of instruction for the benefit of the Grammar Departments of our schools. On the last Friday afternoon of each month, the Grammar Departments of all the schools are called together in one of the school-houses, to listen to a lecture on some subject from some one of our doctors, clergymen, lawyers or

scientists. Already we have had lectures on Chemistry with demonstrations, and Physiology with demonstrations, and from one of our local artists on Drawing and Perspective, with blackboard demonstrations. This assemblage we call our "School Lyceum," and has proved, so far, to be a most efficient method of instruction as well as a splendid source of pleasure to the pupils. We let the boys and girls run the business themselves; they elect their presiding officer and secretary and introduce the lecturer. The result is that it is one of the most pleasing spectacles to see these pupils conducting, in good order and with becoming gravity, an institution that is to be a source instruction to them as well as entertainment. Besides the lecture the pupils contribute to the entertainment by musical performances, and if we happen to be short of a lecturer, provide among themselves speakers, essayists and musicians to supply the entertainment. I find, as a result, that the best order is obtained in our schools, and an interest awakened in studies among the pupils that is very gratifying. I also propose shortly to bring up before the Lyceum the question of starting a museum for all our schools. As I have plenty of room in one of our school-houses for my purpose, I propose to put the matter in the hands of some of the pupils to be elected by the Lyceum as a board of direction. The curiosities are to be contributed by the pupils from their own work. I think I shall succeed in making things interesting for our pupils, and of turning out as good a class of scholarship as our schools generally turn out. I propose also to get up a reading circle among our best pupils with reference to showing them the gems of English literature.

The general health of our schools is good. I have insisted that all children shall conform to the law and be vaccinated, and this mandate has been generally complied with.

I do not know of any other matter upon which to report to you, but I am always pleased to hear from you, and will endeavor to co-operate with you in all things for the advancement of the children of our State.

## TRENTON.

T. H. MACKENZIE, SUPERINTENDENT.

*To E. O. Chapman, State Superintendent :*

I beg leave to submit my report of the public schools of the city of Trenton for the year ending August 31st, 1885.

Although I have very little to add to the tabulated statement sent to you at the close of the summer term, yet I am pleased to be able to give a good account of our stewardship.

The citizens of Trenton still continue to exercise the same interest in everything that tends to the advancement of our public schools that they did when they inaugurated the free school system in the State.

Although there have been no marked strides made in the improvement of our public schools during the year, yet they are pursuing the even tenor of their way with perceptible indications of improvement everywhere.

The Board of School Trustees have always been able, by the liberal appropriations made by Common Council, to erect commodious and well-appointed school-houses, well ventilated, well furnished and in good sanitary condition.

We have fourteen school-houses in use, with a seating capacity of three thousand three hundred and ninety-four. Twelve of these are owned by the city and two are rented.

We employ seventy-four teachers, fifty-two of whom teach in the Primary Departments, twelve in the Grammar Schools and ten in the High School.

Our teachers, with but a few exceptions, are faithful and intelligent and quite a number are zealous in their professional work.

But our system of examinations, and particularly that of judging the capacity of a teacher by the percentage of her promotions, does much, I fear, to impair the work of an intelligent teacher.

In her anxiety to promote her pupils, she ceases to teach in order to cram her pupils with sufficient facts to pass the examination.

It is said of Socrates, the greatest secular teacher the world has ever had, that he could not produce a single pupil who could show a modern examiner what he had gained. His method was, not to burden his pupils with facts, but to train their minds to acquire facts. As a general rule, I find that those who have had a Normal School education pay more attention to the training of their pupils' minds than those who have been educated elsewhere.

This suggests, to my mind, the propriety of instructing the graduates of our High School in the methods of teaching.

Our Grammar Schools, known respectively as Academy and Center Street Grammar Schools, have each a male principal with a salary of \$1,200 a year, and five assistant female teachers, each of whom receives a salary of \$500 a year.

Principals and teachers alike are earnest, faithful and intelligent, and much good work is being accomplished by them. Their influence for good is not confined to the Grammar Schools alone, but is felt by every school in the city.

The Academy and Center Street Grammar Schools had, respectively, one hundred and fifty-six and one hundred and thirty-six pupils enrolled at the close of the summer term, and promoted to the High School from the former forty-one out of fifty candidates, with a general average ranging from seventy-five to ninety-eight, and from the latter, twenty-one out of forty-one candidates with a general average ranging from seventy-five to ninety-five.

As an evidence of the interest manifested by our teachers, they have joined themselves into a society termed "The Teachers' Association." They meet monthly for conference and exchange of thought as to the best methods of teaching.

And I am pleased to say that, although it has been in existence but a short time, it has been productive of much good, awakening a more lively interest in their profession.

I trust the time is not far distant when every teacher in the city will feel that it his or her incumbent duty to attend those meetings and thus do what he or she can to advance the interest of our public schools.

Our High School, the crowning glory of our schools, is centrally located, making it comparatively easy of access to every pupil in the city.

This school is divided for convenience of study into junior and senior departments.

Its corps of teachers is a male principal receiving a salary of \$1,500 a year, and nine assistant female teachers, five in the senior department with a salary of \$600 a year, and four in the junior department with a salary of \$550 a year. The principal and teachers of this school have been selected on account of their peculiar fitness for their individual positions. 7

*Trenton, N. J. 1891*

*2001*

The fact that they are giving general satisfaction, and also the fact that they have been largely instrumental in making it what it is generally acknowledged to be—one of the most thorough High Schools in the State—is an evidence that the Board have made a wise selection.

We find that the High School is not only useful to those who avail themselves of the more liberal education they receive there, but it also serves as a stimulus to teachers and pupils of the Grammar and Primary Departments.

The High School is the goal to which the ambitious pupil strives to attain, and to attain it he knows that application to study is necessary.

There were three hundred and forty-nine pupils enrolled in this school during the year. Twenty-three of this number were in the A class, and graduated after having passed the prescribed examination.

In order that you may form some idea of the standard of our High School and its curriculum, I will submit the following papers used in the examination of the last class of its graduates :

#### EXAMINATION FOR GRADUATES, JUNE, 1885.

##### ASTRONOMY.

1. What is astronomy? What is the difference between a fixed star and a planet? What is the Milky Way and of what is it composed? Name six noted astronomers?

2. Who was called the "Father of Astronomy"? Who established the Copernican system? Give Kepler's three great laws? Name the primary planets? How many minor planets have been discovered and where are they situated?

3. Give Bode's law. Define parallax, equinox, nadir, occultation, eclipse, nebulae, zenith, declination, right ascension and year?

4. Name the twelve signs of the zodiac? Define perigee, aphelion, superior conjunction, ecliptic and zodiac?

5. What are sun spots? What is the zodiacal light? Describe the planets Mars and Venus and tell by what other names Venus was known?

6. Name three double stars? Name six equatorial constellations? Name five circumpolar constellations? Name three southern constellations?

7. How far is the moon from the earth? How does the moon appear when viewed with a telescope? Describe the planets Mercury and Jupiter? Name the largest asteroid?

8. How many satellites has Jupiter? Give an illustration to rep-

represent the comparative size of the sun and the planets? In what six respects are the primary planets alike? What is a comet? Describe the parts of a comet?

9. Name ten stars of the first magnitude? Into how many magnitudes are the stars divided? What causes the difference in the brightness of the stars?

10. What does the nebular hypothesis propose to explain? What facts in the solar system form the basis of the hypothesis? State the hypothesis?

#### NATURAL PHILOSOPHY—A CLASS.

1. Define Natural Philosophy, matter, body, atom, pore, molecule, element, density, inertia and friction? Name the seven important properties of matter and define each one?

2. What is force? Name and define three forms in which all matter exists? Define weight? Name and define the four kinds of molecular attraction? Name the seven great forces in nature?

3. Define malleability, ductility, flexibility, tenacity and brittleness? Give the law of gravitation? What is the difference between absolute and specific weight? Give the law of falling bodies? What is the difference between center of gravity and center of magnitude of a body?

4. Define uniform, accelerated, compound, reflected and simple motion? Define projectile? Define centrifugal and centripetal force? Name the six elementary machines? Name the principal agents of power?

5. What is a lever? An inclined plane? Name, define and give an example of the three kinds of levers? Give the distinction between a fixed and a movable pulley? Define wedge, screw, rotary motion and rectilinear motion?

6. Name the five orders of architecture? What is the science of hydrostatics and hydraulics? Name and define the three classes of water-wheels? What is pneumatics? Atmosphere? Vacuum? Name the properties of air, and what amount of pressure is exerted by the air?

7. Define valve, acoustics and sound? How does the transmission of sound vary? What is the velocity of sound? Define echo, discord, harmony, octave and musical sound?

8. Name six sources of heat? Name the three ways by which heat may be communicated? Name and define three ways in which heat may be disposed of? Name and define three effects of heat?

9. Name and define four classes of clouds? Define dew, frost, hail, wind and rain? Define constant, variable and periodical winds?

Define luminous, transparent and opaque bodies? Name and define six classes of lenses?

10. Name the seven primary colors? Name the three simple colors? Name two ways by which electricity may be excited? What is a magnet? Describe a Leyden jar? Name and define two kinds of electricity?

#### GEOLOGY—A CLASS.

1. What is Geology? Name the three subjects of which Geology treats.

2. Define ore, carbonate and silicate. Name four examples of each. What is the difference between granite and syenite?

3. What are crinoids, rhizopods and foraminifers? Name five ways in which rocks were made.

4. Define alluvium, detritus and roches moutonnées. How were these last made? Where are they found?

5. How were mountains made? Give the table of the geological ages.

6. What do we mean by Archæan rocks? What metal is found in Archæan strata?

7. Name the three great limestone deposits of Paleozoic time. Where is each one found? What is the Silurian age called? Why?

8. Describe the making of coal. Name and locate the coal areas in North America.

9. What was Mesozoic time noted for? How is Cenozoic time divided? Define the Champlain and Reindeer periods and tell when they occurred. When is it probable that man was in existence?

10. Was man evolved from the man-ape? Give the breaks in the evolution chain. Name three differences between man and the man-ape.

#### PHYSIOLOGY—A CLASS.

1. What is the human skeleton? Give its uses and tell how many bones it contains, in the adult.

2. Give the composition of bone. How may a bone be tied in a knot? Why do not small children often break their bones?

3. Describe the skin and tell its uses. What causes difference in complexion? How does nature provide a dressing for the hair?

4. Describe the process of digestion, absorption and assimilation, from the time the food enters the mouth till it is converted into blood.

5. Give the composition of the blood. Describe the whole process of circulation. What ought to be done in case of a cut artery, before the doctor arrives?

6. What is the cerebro spinal nervous system? What is the sympathetic system? Why do salt and bitter flavors often induce vomiting?

7. Describe the brain. What is the reflex action of the spinal cord? Does alcohol in any form ever confer any real or permanent strength?

8. Name the senses and their organs. Name the coats and humors of the eye. What can be done to remedy near-sightedness or far-sightedness?

9. Describe the external ear; the middle ear; the internal ear.

10. What must be done in case of poisoning by laudanum, ammonia or arsenic; in case of asphyxia from drowning, coal gas, &c.?

#### BOTANY—A CLASS.

1. What is Botany? Name the organs of vegetation and those of reproduction.

2. What are monocotyledonous and dicotyledonous plants? Name the parts of a flower. What are its essential parts?

3. Name and define the two great classes of stems. Give the two great classes of leaves.

4. Draw the following, viz., primate leaf, palmate leaf and parallel-veined leaf; also, a raceme, corymb, umbel and cyme.

5. When are flowers symmetrical, complete, regular, perfect, staminate, pistillate, monœcious or diœcious?

6. What is the difference between an air-plant and a parasitic plant? What is a perianth?

7. What is pollen and what is its use? What are syngenesious, monodelphous and polydelphous stamens?

8. In what ways may a pistil be compound? Define placenta, spadix and spathe.

9. Into what two classes are all flowering plants divided? Name the divisions under each.

10. What is grafting and layering? What kind of a fruit is a strawberry? Where and what are its so-called seeds? Name six great uses which plants serve to man. How do they furnish all his food, whether animal or vegetable, and all his clothing? Trace and make an analysis of the plant before you. [N. B.—The plant given was the *Vaccinium Stamineum*, or Deerberry.]

#### CLASSICS—CICERO'S ORATIONS.

1. Mention some of the contemporaries of Cicero. Manilian Law, § IV. Translate *Sed de* — putetis. How much did the terms

Quirites and Romani differ? Give the rule for the case of *ei*; reasons for the mood and tense of *videatur*. Parse *vobis*. Explain the construction of *suscipiendam*; of *putetis*. Compare *vera*, and form adverbs from its degrees of comparison. Give rule for the gender of oratione.

2. Catiline, II., § VI. Translate *Quid — hostem*. Give the case of *domi*. Account for mood and tense of *interfectus essem*. Who was Jupiter? Construction of *eum*. Compare *potius*. From an adjective form *hostem*, and give the meaning of the derivative termination.

3. Catiline, III., § IV. Translate *Tum ille — conjungeret*. Decline *ille* in the singular. Form an iterative verb from *dixit*. Construction of *præsidis*; of *consilio*. Give a synopsis of *exciperet* through the moods, using the second singular. Inflect the present subjunctive of *uteretur*.

4. Catiline, IV., § VI. Translate *Ille etiam — Catilinæ*. Give rule for the gender of *volnus*. Why is *ne* (*ne quid*) used? Decline the plural of *hie*. Principal parts of *arcessit*, *interficiendos*, *diripendam*. Parse *vastandam*.

5. Citizenship of Archias, § V. Translate *Sed quoniam — proconsole*. What is the force of *ne* — *quidem*? Write the dative plural of *census*. Give genitive plural of *civitates*. Show how the nominative of *legibus* is found; give rule for its gender. What was the census? Force of *quoniam* here.

#### VIRGIL—ÆNEID.

1. Give a brief account of the life of Virgil. Write the topics of the first six books. Translate Book I., 548–554. Locate "*Sæculis regionibus*." Write the nominative singular of *sanguine*. Form an adverb from *clarus* and compare it. Give principal parts, passive, of *tendere*. Why is *petannis* in the subjunctive?

2. Translate Book II., 749–757. Synonyms of *murus*; give the distinctive meanings. Write a synopsis of the second person singular of *sequor*. Decline *caput*. Construction of *lumine*; of *dornum*. Account for the repetition of *si forte*. Who were called *Danai*. By what other names does Virgil designate them?

3. Translate Book III., 68–76. Compare *prima*, *pius*, *gratis-sima*, *lenis*. Decline *maria*, *crepitans*, *litora*, *portu*. Parse *prochimur*, *revinxit*.

4. Translate Book V., 405–411. What kind of a derivative noun is *Anchisindes*? Decline *talis*. Give the nominative of *putore*. Parse *ipse*, *pondus*, *senior*. Decline *si quis*. Account for mood and tense of *vidisset*. Who was *Hercules*?

5. Translate Book VI., 174-182. Give the construction of *congerere*; of *securibus*. Form a noun of agency from *educere*. Write out the first two lines, mark all the quantities, divide into feet, mark the ictus of every foot. Denote the *cæsura*.

## LATIN PROSE COMPOSITION.

1. I have planted a tree, the fruit of which I hope soon to behold. The rule of expediency is the same as that of honor.

2. There is no one but knows that the past cannot be changed. That you may be able to die courageously, obey the laws of virtue.

3. There were some who denied that virtue and vice were contrary to each other. We cannot object to others dissenting from us.

4. It makes a great difference, whether death be a perpetual sleep, or the beginning of another life. On the top of the Alps the cold is so great that the snow never melts there.

5. How is it that all of you prefer death to slavery? Experience, the best master, has taught us many things. It is of great consequence to you that you should remember your friends.

## ANABASIS.

1. Name the dialect of the Greek language in which the *Anabasis* is written. Give a brief account of the expedition of Cyrus to meet his brother? Delineate the route of the Ten Thousand?

2. Translate Book III., Cap. 1, § 26. Parse *ἀκούσαντες* in full, and tell why it is used here? Decline *πάντες* and *τις*? Give rule for the case of *φωνῇ*? Write a synopsis of *εἶπεν* (moods)? Give reason for the mood of *φλναροίη*; of *δύνατο*? Form a verbal adjective from *πείσας*? Decline *ὅστις* in the plural?

3. Translate Book III., Cap. 3, § 1. Explain the construction of *τούτων λεγθέντων*? Write and inflect the indicative, perfect, middle of *λεγθέντων*, explaining each euphonic change? Give a synopsis of *ἀνέειπεν* (tenses of the indicative)? Principal parts of *ἀπελθόντες*? Analyze *ἐρρίπτουν*?

4. Translate Book III., Cap. 1, § 14. Account for the mood of *βλάψαι*? Why is *μή* used here? Compare *πολλῇ*, *ὀλίγοις* and *μεγάλῃ*?

5. Translate Book III., Cap. 4, § 1. Give the principal parts of *μείναντες*; what relation does the participle express here? Syntax of *ἡμέραν*; of *ἀλλῇ*? Account for the use of *μή*, and for the mood which immediately follows it? Give the construction of *αὐτοῖς*? Give the rules for the use of *αὐτός* generally?

## ILIAD.

1. How are the dialects of the Greek language distinguished? In which of these dialects is the Iliad written? What is meant by the Hellenistic dialect? Translate Book I., 450-455. Give rule for case of *μυς*; of *Τενέδοιο*. Parse *ἴψαο*. Write Attic forms for the three preceding Greek words.

2. Translate Book I., 572-576. Decline *σφῶ* throughout. Give Attic form for *χρῆσινα* and compare it. Inflect *νικῶ* and give a reason for each euphonic change.

3. Translate Book II., 339-344. Write the nominative and vocative singular, and dative plural, of *ἀνδρῶν*. Decline *τ* in the singular; account for its loss of accent in this verse. Explain the *θ'* in *ἔθ'*. Give the force of the ending of *ενθάδ'*.

4. Translate Book II., 411-418. Write the genitive of *Ζευ*. Compare *μέγιστε*. Give principal parts, mood and tense of *ἐλφειν*. Write the Attic form for *πολέες*, and compare it.

5. Translate Book II., 454-458. Mark the feet of verse 455, with the quantity of each syllable.

## GREEK PROSE COMPOSITION.

1. Mention the chief uses of the particle *ἄν*. Give the rule for final clauses; for object clauses after verbs of striving; after verbs of fearing.

2. Write the four forms of ordinary conditional sentences. Give the uses of the participle.

Translate into Greek:

3. They all said that the king had sent them and that they wished to make an alliance with the Greeks.

4. If you do what I just now told you, you will have all things whatsoever you wish.

5. I told him that if these men had not departed, the city would have been saved.

6. You would be very happy should you endeavor not to do those things. Remember the counsels of your friends.

7. O, that you would help me to conquer my enemies.

8. Would that he were alive, for then we would not fear that our enemies would injure us.

9. After these things, a battle having taken place, the Greeks were victorious.

10. I congratulate you on finishing this work. The remembrance of these exercises will often remind you of instructors and school-mates.

## BOOK-KEEPING.

Complete the following set.

Write check in 2d date.  
 Write sight draft in 5th date.  
 Write note in 10th date.  
 Write note in 15th date.  
 Write check in 15th date.  
 Write draft in 19th date.  
 Write receipt in 20th date.

TRENTON, N. J., June 1st, 1884.

Commenced business with the following—		
Cash on hand.....	\$2,000 00	
Cash on deposit in First National Bank.....	5,000 00	
A. J. Cole's note, dated April 1st, @ 30 da.....	200 00	
1,000 bu. wheat @ .75.....	750 00	
J. Wheeler owes me on acc't.....	100 00	
— 2 —		
Sold E. G. Folsom 800 bu. wheat @ \$1.		
Rec'd in payment, cash.....	200 00	
His acceptance, our favor, @ 60 da.....	500 00	
Balance on acc't.....		
— 3 —		
Bought of T. C. Merchant, 200 bbls. flour @ \$5.		
Gave in payment our note @ 40 da.....	500 00	
Check on First National Bank.....	300 00	
Balance on acc't.....		
— 5 —		
Sold Geo. Soule our sight draft on E. G. Folsom.....	100 00	
Rec'd in payment, cash, \$40		
Balance on acc't, \$		
— 6 —		
Discounted E. G. Folsom's acceptance of 2d inst. @ 7 per cent.		
Deposited cash in First National Bank.....	450 00	
— 9 —		
Paid clerk salary, per check.....	35 00	
— 10 —		
Bought of J. C. Bryant, warehouse valued at.....	4,000 00	
Gave in payment 200 bu. wheat @ \$1.		
Note at 30 days, \$1,000.		
Mortgage, \$1,000.		
Balance on acc't, \$		

12	
Rec'd cash of J. Wheeler, on acc't.....	\$60 00
14	
Discounted our note of the 3d inst., favor T. C. Merchant, proceeds paid per check.	
15	
Bought of H. E. Hibbard, James Tasker's note of \$1,000, payable 30 days after June 1st, and indorsed by H. E. Hibbard, "without recourse." As this note is considered doubtful, we buy it at a discount of 25 per cent. Gave in payment, our check on First National Bank.	
16	
Discounted for J. Warner, Wm. Green's note of \$200 @ 30 da., discount off, 33 da. Proceeds paid per check.	
17	
Received cash in full of A. J. Cole's note, with interest.	
18	
Gave J. C. Bryant check on bank, to apply on account.....	500 00
19	
Accepted Geo. Soule's draft on us, favor William Cook, in full of his acc't.	
20	
Paid T. C. Merchant cash on account.....	75 00
21	
Received of J. H. Goldsmith, \$5,000 on deposit.....	5,000 00
Gave him certificate of deposit on Third National Bank, New York, \$3,000; our certificate, \$1,000; pass book, \$500; placed the balance to his credit, \$	

## LOGIC.

1. Define and illustrate singular, general, collective, concrete, abstract, positive and negative terms? Explain extension and intension?

2. Give the rule of inference and the rule for things which vary periodically? In what does all correct reasoning lie? What is a general law of nature? When do we classify things together?

3. Give the logical method for dividing each genus and the rea-

sons for that division? What is the difference between reasoning by generalization and reasoning by analogy?

4. Define deductive and inductive reasoning, give the history of inductive reasoning, and give an example of reasoning by induction and name the steps.

5. Give the principles which govern the distributing of subject and predicate, and prove by example.

6. Write a syllogism and prove it by all the rules.

7. Define conversion; name and define the kinds of conversion; give an example of the different kinds of propositions and their converse.

8. Define a disjunctive syllogism, give an example and the rule. Define a hypothetical syllogism, give an example and the rules.

9. Define crucial instance, experimentum crucis, subject, predicate, sign of quantity, copula, antecedent, consequent, alternatives, begging the question.

10. Define a fallacy, name and define the forms of fallacy, and give an example of each form.

#### CHEMISTRY.

1. Define Chemistry, element, symbol, quintivalence, electrolysis, combustion, respiration, chemical attraction, compound and mixture.

2. Name twenty elements and their proper symbols.

3. Give the symbol for the following compounds: Water, carbonic dioxide, nitric acid, sulphuric acid, hydrochloric acid and nitrous oxide. Define a chemical and a physical change and give an example of each one.

4. Tell how the following substances may be prepared: Oxygen, nitrogen, hydrogen, carbonic dioxide, chlorine, sulphuretted hydrogen, nitrous and nitric oxides, gun cotton and mercuric iodide.

5. Name the Haloid group. Give the chemical and physical properties of each member of this group. Give an account of phosphorus. Name five forms of carbon and five of silica.

6. How is ozone prepared? Give its properties. Describe the process of obtaining silver from its ores. What are the products of combustion?

7. Give the test for arsenic, iodine and carbonic dioxide. What will dissolve gold? What will dissolve silver? State the difference between cast iron, wrought iron and steel. For what is nitrous oxide used?

8. What are mordants? Name three. What elements do we find in the following substances: Marble, slate and sand? Name four classes of rocks. How may sulphur be made to assume another form?

9. Give an account of potassium and sodium. What element does not unite with oxygen? In what fruits do we find the following acids: Oxalic, tartaric, citric and malic?

10. Name the principal ores of iron. Name an important ore of copper. What is an amalgam? What are compounds of sulphur, phosphorus and silica called? Name two characteristics of carbon.

## ALGEBRA.

1. Two sportsmen at Creedmoor shot alternately at a target. A. hits the bull's eye 2 out of 3 shots and B. 3 out of 4 shots; both together hit it 34 times. How many shots did each fire?

2. What factor can be removed from  $\sqrt{162 a^3 b}$ ? Given  $\sqrt{x^2 - 4ab} = a - b$ , find the value of  $x$ . Find the cube root of  $8a^3 - 84a^2x + 294ax^2 - 343x^3$ .

3. The product of two numbers is 900, and the quotient of the greater divided by the less is 4. What are the numbers?

4. What number is that to which if 10 be added and from which if 10 be subtracted, the product of the sum and difference will be 156?

5. Find the value of  $x$  in the following equations:

$$(a.) \quad x^2 - 4x = -3.$$

$$(b.) \quad \begin{cases} x^2 + y^2 = 13. \\ x + y = 5. \end{cases}$$

6. Find a fraction from which if 6 be subtracted from both terms, it will become  $\frac{1}{2}$ ; and if 6 be added to both terms it becomes  $\frac{3}{4}$ .

7. Prove that  $(a - x^3 + x^3 - a^3 = 3ax(x - a))$ . A company discharged a bill at a hotel by paying \$8 each; if there had been four more to share in the payment they would have paid \$7 apiece. How many persons were there?

8. Find the value of  $x$ ,  $y$  and  $z$  in the following equations:

$$1. \quad -x + y + z = a.$$

$$2. \quad x + y - z = c.$$

$$3. \quad x - y + z = b.$$

9. A drover bought a flock of sheep for \$120, and if he had received 6 more for the same sum the price per head would have been \$1 less. Required the number of sheep.

10. A. sold cloth for \$39, and thereby gained as much per cent. as the cloth cost. What was the cost of the cloth? Two purses contain \$300. If you take \$30 from the first and put it in the second each will then contain the same amount. Required the sum in each purse.

## ARITHMETIC.

1. Find the greatest common divisor of 4,004 and 5,772. Find the least common multiple of 10, 16, 24, 32 and 48.

2. Multiply eighty-seven thousandths by fifteen millionths. Write 25,000 in Roman numerals. What is the length of the side of a cubical box which contains 389,017 solid units?

3. What is the value of  $\frac{5}{8}$  of  $\frac{3}{4}$  of  $\frac{5}{4} \times .0075$  when reduced to a simple fraction? Find the square root of 403.6081.

4. A room is 3 meters, 2 decimeters long; 2 meters, 8 decimeters, 5 centimeters wide, and 2 meters, 5 millimeters high; find the surface of the walls in ares, and the quantity of air it contains in steres.

5. What is the amount of \$1,450.40, from April 19th, 1872, to August 3d, 1873, at 7 per cent? If \$400, at 7 per cent., in 9 months, produce \$21 interest, what will be the interest on \$360 for 8 months, at 6 per cent?

6. Reduce .3945 of a day to lower denominations. Find the compound interest on \$600 for 2 years, 6 months, at 5 per cent.

7. Find the present worth of \$1,200 for 2 years, 6 months, at 10 per cent. Find the proceeds of a note of \$570, due in 90 days, discounted at a bank at 7 per cent.

8. What is the area of a triangular board whose sides are 12 feet, 18 feet and 24 feet, respectively?

A ladder 125 feet long, with its foot in the street, will reach on one side, to a window 75 feet high, and on the other side to a window 100 feet high; how wide is the street?

10. Sold a quantity of cloth for \$440 and thereby gained 10 per cent; how should I have sold it to gain 25 per cent? A. lost  $5\frac{1}{2}$  per cent. of his money and had \$2,835 remaining; required all his money.

## GEOMETRY AND TRIGONOMETRY.

1. What is a polyedron, a parallelogram and a cube, a prism and a right prism? Draw a figure to represent each one.

2. What is a pyramid and a frustum of a pyramid? What is the slant height and altitude of a pyramid? What is the slant height and altitude of the frustum of a pyramid? Draw a pyramid and the frustum of a pyramid and mark the slant height and altitude in each figure.

3. Demonstrate the theorem—Similar triangular prisms are to each other as the cubes of their homologous sides.

4. Demonstrate the theorem—The convex surface of the frustum of a pyramid is equal to one-half the sum of the upper and lower bases multiplied by the slant height.

5. What is a cylinder cone, frustum of a cone and a sphere? Draw a figure to represent each one. How do you find the surface and the contents of a sphere?

6. Name the three round bodies of Geometry. Define zone and spherical segment.

7. Define logarithms, characteristic and mantissa. Of what does plane trigonometry treat? Name the parts of a triangle and how many must be given to find the remaining parts?

8. What do you mean by the supplement and the complement of an arc? Define sine, tangent, secant and co-secant.

9. Demonstrate the theorem—In any plane triangle the sides are proportional to the sines of the opposite angles.

10. In any triangle  $abc$ , let  $ab = 460$  feet;  $bc = 690$  feet, and the included angle  $82^\circ 42'$ ; required the other parts. I am on one side of a river and wish to know the distance to a tree on the other side. I measure 400 yards by the side of the river and find that the two angles formed by this line and the lines from its extremities to the tree are  $82^\circ 40'$  and  $36^\circ 14'$ ; find the distance to the tree from each extremity of the line.

#### MORAL PHILOSOPHY.

1. Define Moral Philosophy. Upon what is it based? Where do we obtain the material for Christian Moral Philosophy? Between what may a choice arise?

2. Give the three most important proofs for thinking that the will is free. Give the two objections to the freedom of the will, and answer each objection.

3. What do you mean by the springs of action? Name the springs of action and tell by what each one is controlled. Name and define the classes of affections, and give a short account of the affections of each class.

4. Give the distinction between absolute right and relative right. When is ignorance of the right excusable? How is conscience educated? What is an indifferent act? What is law?

5. Give the office of law. Why do various nations have different laws? Is it right for us to do anything which may not be wrong and yet the law forbids it? Why is smuggling wrong? Of what benefit is civil law?

6. Give the duties of citizens with regard to government, magistrates and laws.

7. Give the distinction between natural rights and legal rights. When are the rights of the individual sacrificed for the well-being of the community? What are exterior motives and how do they act?

8. Name and define the cardinal virtues and tell why they are so called. What kind of qualities, with regard to active and passive, do we find in patience, submission and courage? What is the difference between a bad law and an immoral law? Which one is to be obeyed and which one disobeyed, and why?

9. Give all the duties which we owe to ourselves.

10. Give all the duties which we owe to others: first, having the controlling principle, benevolence; second, the principle, justice.

#### INTELLECTUAL PHILOSOPHY.

1. Give the distinction between animals and vegetables, and between man and other animals.

2. Define instinct. Give the distinction between instinct and reason. Give the difference between mind and matter. Why is the mind's immortality doubted? What proof have we that the mind is immortal?

3. Name the senses, tell where each sense is located, what knowledge is obtained by each sense, and how each sense may be improved.

4. Define sensation. How many causes combine to produce sensations? Illustrate. Give the office of the nerve, the brain and the membrane. Define perception, and give the offices of sensation and perception. In how many respects do sensation and perception differ? Explain each one.

5. Define entity, nonentity, objective entities, subjective entities, intuition, consciousness, materialism, transcendentalism, primary knowledge. Give the theory of innate ideas.

6. Define conception. Give the distinction between conception and memory, and conception and imagination. Name the different classes of subjects of consciousness, and give an example of each class.

7. Define attention, and give the rules for securing fixedness of attention. Explain divided attention. Define association. Give all the causes which control our associations, and illustrate each one.

8. Name the powers which men and brutes have in common, and those which distinguish men from brutes. Give the characteristics of mathematical reasoning and of moral reasoning. Give the qualities of a good reasoner.

9. Define abstraction, classification, generalization, judgment, dreaming, monomania, imagination, induction, reason, somnambulism.

10. Name the different schools of philosophy; give the founder, the belief, and the followers of each school.

## GRAMMAR.

These ages have no memory, but they left  
 A record in the desert *columns strown*  
 On the *waste* sands, and statues fallen and cleft,  
 Heap'd *like* a host in battle *overthrown*;  
 Vast ruins, *where* the mountain's ribs of stone  
 Were *hewn* into a city; streets *that* spread  
 In the dark earth, where *never* breath has blown  
 Of heaven's sweet air, nor foot of man dares tread  
 The long and perilous ways—the *Cities* of the Dead.

1. and 2. Analyze the sentence.
3. Parse column, strown, waste.
4. Parse like, overthrown, where.
5. Parse were hewn, that, never, Cities.
6. and 7. Correct and give reasons:
  - a. He first spoke against, and then voted for the bill.
  - b. His uncle and him attended the same church.
  - c. If you are unwell, go and lay down.
  - d. It is difficult to clearly understand the author's meaning.
  - e. Will you permit him and I to go?
  - f. I intended to have went home early.
  - g. It is only me said the frightened lad.
  - h. I have not and never can consent to such a proposal.
  - i. Either of the three books will do.
  - j. Who did you meet?
8.
  - a. When is that preferable to who or which?
  - b. What is the number of a verb that has two subjects connected by and?
  - c. What is the number of a verb that has two subjects connected by or or nor?
  - d. What is the number of a verb whose subject is a collective noun?
  - e. After what verbs is the sign to omitted?
  - f. When are nouns in the objective case without a governing word?
  - g. How may we express possession without using the possessive case?
  - h. Give the distinction between personal pronouns and relative.
  - i. Give the distinction between finite verbs and infinitive.
  - j. When do we use the present infinitive instead of the present perfect?

9. Define declension, parsing, case, mood, auxiliary verbs, conjugation, impersonal verbs, subjunctive mode, participle, subordinate proposition.

10. Write a sentence to contain what used as a relative.

Write a sentence to contain a subject clause.

Write a sentence to contain an object phrase.

Write a sentence to contain that used as a relative.

Write a sentence to contain but used as a preposition.

Write a sentence to contain a participle used as an attribute.

Write a sentence to contain a possessive noun, plural number.

Write a sentence to contain an attribute clause.

Write a sentence to contain a conjunctive adverb.

Write a sentence to contain a participle with an object.

#### RHETORIC.

1. From what may beauty and sublimity in nature arise? Give the requisites for beauty and sublimity in composition.

2. Define diaries, news, editorials, autobiography, reviews, essays, treatises, biography, memoirs, annals.

3. Write a complete business letter.

4. Answer an advertisement for a book-keeper, enclosing a letter of recommendation.

5. Define poetry, an epic poem, give the requisites of a good epic, name the best epics. In what respect are epic and dramatic poetry alike? In what do they differ? Name and define the divisions of poetry and give the writers of each division.

6. Define lyric poetry. Name and define the divisions and give the writers of each division. Define didactic poetry and name some didactic poetry. Define elegiac poetry and name some elegiac poems.

7. Write a letter of introduction and a note of acceptance.

8. Define a lampoon, satire, wit, pun, oration, sermon, metrical romance, farce, opera, melodrama.

9. Define rhyme and give its origin, define rhythm, versification, alliteration, single, double and triple rhyme, blank verse. Give the construction of Spenserian, rhythm-royal, sonnet, short and common metre. Upon what does the kind of foot depend?

10. Give the metre of the following :

- a. On the mountain's top appearing.
- b. To spread imagination's wildest wing.
- c. But we steadfastly gazed on the face of the dead.
- d. Earth has no sorrows that Heaven cannot heal.
- e. There is a calm for those who weep.
- f. Rouse him like a rattling peal of thunder.

- g.* And I loved her the more when I heard.
- h.* The deer, half seen, are to the covert wending.
- i.* Nimrod, the hunter, was mighty in hunting and famed as the ruler of cities of yore.
- j.* Through the courts at deep midnight the torches are gleaming.

## UNITED STATES HISTORY.

1. When does the authentic history of America begin? What nations took part in voyages of discovery and exploration?
2. Name the principal discoveries of these nations; tell when made.
3. Name the first permanent settlement by the English. When, where and by whom was New Jersey settled?
4. What were the kinds of government among the colonies? Tell in what the difference consisted.
5. What was the cause, result and terms of treaty of the French and Indian War?
5. Give the cause, result and terms of treaty of the Revolutionary War. Name five important battles of that war.
7. What war occurred in Madison's, Polk's and Lincoln's administration?
8. Name an important event during the Colonial period. Name an important event during the time of Jackson. Name an important event during the Civil War. Name an important event during the year 1876.
9. How did the Civil War close? What were the terms on which Lee surrendered?
10. What was the first Territory which the United States acquired by purchase? Name other acquisitions of territory.

## ENGLISH LITERATURE.

1. Give a sketch of the Victorian Age, its poetry, its prose, its historical events and practical inventions.
2. Who is the poet laureate of England? What does laureate mean? How old is the custom? How were honors paid to poets in the other countries of Europe? Who was the first poet laureate of England? Name seven of England's great laureates.
3. In what departments of poetry has Tennyson written? Tennyson was a Pre-Raphaelite in youth; define the term in poetry and art. Name Tennyson's master-piece. Characterize "In Memoriam."

4. Who is the greatest female poet of England? Name her greatest poem. Characterize it and give quotation from it.

5. Give quotation from Jean Ingelow and Carlyle.

6. Name the triumvirate of Victorian novelists. Who was George Eliot? Name five novels by George Eliot.

7. Who is "Owen Meredith"? Name some of Tennyson's later poems. What honor was conferred upon Tennyson?

8. Who is regarded as the foremost of the "New School of British Poets"? Who were the leaders of this school; what was their aim? Characterize the style of Bulwer.

9. Contrast Dickens and Thackeray. Name five novels of each. Who is the most versatile writer of the Victorian Age? Name his greatest work.

10. Give from "In Memoriam" a quotation illustrating a domestic scene, a metaphysical disquisition and some proverbial phrases. Illustrate by quotation Tennyson's excessive use of alliteration.

#### GRECIAN HISTORY.

How may the History of Greece be divided? What is meant by the Heroic Age? Give an account of the principal events of the Heroic Age. What was an Olympiad?

2. Who were Lycurgus; Draco? Name the seven wise men of Greece and the motto of each? What was the Age of Despots?

3. Give the cause of the Persian War? Name the leaders on each side. Give an account of the battles of Marathon, Thermopylæ and Himera. Give the result of the Persian war.

4. Give an account of the "Retreat of the Ten Thousand." What was the cause and result of the Peloponnesian War? What states in succession ruled Greece?

5. Give the plan of Alexander the Great. What was done by his successors? What was the result of the conquests of Alexander the Great?

6. What was the cause and result of the Social and Sacred wars? Who was Demosthenes? By whom was Greece finally conquered?

7. Characterize Athens and Sparta. Give account of Grecian literature, its poetry, its drama, its history and its oratory.

8. Give an account of education among the Athenians and Spartans.

9. Name the styles of Grecian architecture, and a building which illustrates each style. How are these styles distinguished?

10. Name the twelve principal gods of the Greeks. Give an account of the Religious Games.

## SPELLING.

trafficking	haggard	balance	movable
impanel	choice	divisible	intermittent
apostasy	cupola	capitol	apothegm
laboratory	occurring	woefully	schism
lachrymal	embarrassment	unparalleled	melodeon
distill	avarice	cannibal	expedite
ellipsis	calamitous	militia	taciturn

## UNITED STATES CONSTITUTION.

1. What is a constitution? What six distinct purposes are declared in the preamble to the Constitution?

2. How many, and what departments of government are established under the Constitution? Of whom is the Senate composed? How are vacancies in the House of Representatives filled? Who is president of the Senate?

3. How often does Congress assemble? When? Where must all bills for raising revenue originate? Give the clause relating to the passage of a bill.

4. Name five powers delegated to Congress by the Constitution. In what cases may a writ of habeas corpus be refused? How is a President chosen?

5. In what is the Judicial power of the United States vested? What is appellate jurisdiction?

6. How may amendments to the Constitution be proposed? Give the thirteenth and fifteenth amendments.

7. What vacancies can the President fill? In what case does the president of the Senate vote?

8. What is a reprieve? What is treason against the United States?

9. What are the necessary qualifications for a Representative, Senator, President?

10. Of whom does the President's Cabinet consist? Name the members of the present Cabinet.

#### AMERICAN LITERATURE.—NATIONAL AGE.

1. What writers first called attention to American thought? Who is called the "Father of American Poetry"? Who is the poet-laureate of America? Who has been called the "Quaker Poet"? Who is called the "Poet Painter"?

2. Give characteristics of the style of Bryant, Longfellow, Whittier and Lowell. Name ten of Longfellow's poems. Compare Longfellow with Whittier and Lowell.

3. Name the best lyric poems of Oliver Wendell Holmes. Give an account of Alice Cary. Illustrate her style by a quotation.

4. Give quotation from the writings of Bryant, Longfellow, Whittier, Lowell, Taylor.

5. Give quotation from Boker, Bancroft, Emerson and Webster.

6. Who was called the "American Goldsmith"? Why? What his great merit as a writer? Name five of his works. Give quotations.

7. Name the trio of American historians; the principal work of each, and characterize the style of each.

8. How are Cooper's novels classified? Give a quotation from "The Pilot." What is Hawthorne's masterpiece?

9. Characterize Mrs. Stowe's greatest work. Give quotation.

10. Who was called the "Sage of Concord"? Over what name did Holland write? Name two leading orators of America.

#### ELOCUTION.

1. Define elocution; what is good elocution? Define orthoepy, expression, articulation, accent and oral elements. How is voice produced?

2. Define emphasis, inflection, slur, modulation and monotone.

3. What is absolute and antithetic emphasis? Give four rules for inflection.

4. What are pauses, grammatical pauses and rhetorical pauses?

5. Tabulate elocution.

6. Give the sounds of all the letters of the alphabet. Give four words having the long sound of the following letters: *a, e, i, o, u*.

7. Pronounce the following words: area, sachem, ally, dauntless, piano, finale, decorous, abdomen, coffee, acclimated, telegraphy, finance, legislator, museum, sonorous, magazine, compensate, dynamite, diplomacy.

8. Read the following selections for inflection, emphasis and pitch:

1. Ye crags and peaks, I'm with you once again!  
I hold to you the hands you first beheld,  
To show they still are free. Methinks I hear  
A spirit in your echoes answer me,  
And bid your tenant welcome to his home  
Again! O, sacred forms, how proud ye look!  
How you lift your heads into the sky!  
How huge you are! how mighty and how free!

2. Soldier, rest! thy warfare o'er,  
Sleep the sleep that knows not breaking!  
Dream of battle-fields no more,  
Days of danger, nights of waking.  
In our isle's enchanted hall,  
Hands unseen thy couch are strewing,  
Fairy streams of music fall,  
Every sense in slumber dewing.  
Soldier, rest! thy warfare o'er,  
Dream of fighting fields no more;  
Sleep the sleep that knows not breaking,  
Morn of toil, nor night of waking.

9 and 10. Read the following selections for quality of voice:

1. O hark, O hear! how thin and clear,  
And thinner, clearer, farther going!  
O sweet and far, from cliff and scar,  
The horns of elfland faintly blowing!  
Blow! let us hear the purple glens replying!  
Blow, bugle; answer, echoes, dying, dying, dying!

2. How ill this taper burns!  
Ha! who comes here?  
Cold drops of sweat hang on my trembling flesh,  
My blood grows chilly and I freeze with horror.
